# Colorado Watershed Protection -Healthy Rivers Fund

### COALITION FOR THE UPPER SOUTH PLATTE

Final Report 2007 Award-0782 July 21, 2009

Work is (finally) completed for the four key components of our Watershed Protection Fund grant. By Category:

### Forest Restoration:

CUSP's crew has continued forest restoration efforts throughout the watershed, with a goal of reducing the risk of additional catastrophic fire. Funding from the grant was specifically used to help with our Neighborhood Fuel Reduction (aka chipper) program, that works with HOAs and large-property private landowners on property cleanup, and for helping operate the Divide Slash Site, which empowers individual small-lot owners to clean up their own yards and bring material to a central site. In 2007 and 2008 these programs received cash

funding from the City of Woodland Park (\$24,000), Teller County (\$40,000), and the participating landowners (\$34,298). Through these two programs CUSP helped private landowners protect approximately 3900 acres of fire prone lands.

### **Environmental Education:**

CUSP's Environmental Education

Coordinator has worked with students from throughout the Front Range and the watershed over the last two years. She has created valuable partnerships with the City of Aurora Forests to Faucets programs, led expeditionary learning in the watershed with such projects as the Happy Meadows monitoring program with Woodland Park High School (student's data is being used in developing the NEPA document for Happy Meadows), and the Tree-Cycle program which has students replanting in the Hayman with trees they grow in the classroom. Cash donations

that have helped support this program include Hillsdale Foundation (\$20,000); IREA (\$4,000), SPEB (\$12,000) Toshiba (\$9,000) and Captain Planet Foundation (\$6,500). Our EE coordinator logged 7100 student contact hours over two years and approximately 200 teach the teacher hours.

### Rampart Range:

In cooperation with the USFS and Wild

Connections, CUSP helped with major restoration in the Rampart Range Motorized Recreation Area. Our crew and voluneers stabilized an area where OHV users were dropping off an existing road system by creating rock structures. We also created hardened crossing points on two stream crossings; completed two fencing projects, constructing 200' of post and rail fence using logs from onsite to preclude continued access by OHVs to sensitive hillslopes that drain directly into small tributary creeks to the South Platte; and closed about 200 feet of entry area on two trails, at both ends of each trail.

### Happy Meadows/Sportsman's:

Planning is still creeping along on this project, but it took an exciting turn since the application originally was submitted that will make it a far better project with much greater impact. At the time when the proposal was submitted our thought was that work would be restricted to the USFS Happy Meadows segment, but through two years of intensive work with an in-holding HOA, Sportsman's Paradise, we brought them into the project with a commitment to redevelop a diversion structure that has caused serious upstream and downstream ecosystem and habitat problems, a commitment to create a wetland on several acres of sediment fields

created by the old diversion structure (a cobbled together dam that is not stable, and would create even more problems if it failed in a high flow event), and a commitment to help reduce continuing sediment that comes from their roads and uplands! This means we will now be working on approximately 8,000

feet of stream instead of 5,000 feet, and greatly improving habitat and water quality over what just doing the Happy Meadows portion would have yielded. We hope to implement construction in 2010. None of this would have happened without the support of the CWPF. Funding from this grant specifically has been applied to developing the diversion redevelopment concept and planning time attributed to working with the private landowners on that specific piece. (Plans attached as PDF files.) Matching funds include CUSP cash toward contractors, CUSP staff time toward planning on both Happy Meadows and Sportsman's, and USFS planning time to date (as detailed below.)

# CWPF BILLABLE EXPENSE SUMMARY FOR THIS REPORT — HAPPY MEADOWS PLANNING

Description	\$
CONTRACTOR: CRANE & ASSOCIAES	\$7,620.00
CONTRACTOR: FIN UP HABITAT CONSULTANTS	\$1,320.00
CUSP STAFF	\$4,193.00
SUBTOTAL CASH EXPENSES	\$13,133.00
Total Grant Funds Requested	\$7,000.00
CREDITED AS MATCH (CUSP Cash)	\$6,133.00
USFS In-Kind Match (Monitoring and data collection)	\$24,000.00
Total Project Match	\$30,133.00

### **OVERALL FINAL SUMMARY DATA**

Description	\$
Grant Funds Requested for Rampart Range	\$7,500.00
Match Rampart Range	\$133,447.00
Grant Funds Requested for Env. Education	\$4,000.00
Match Environmental Education (From Hillsdale Foundation, Toshiba, IREA SPEB, Captain Planet)	\$51,500.00
Grant Funds Requested for Forest Restoration	\$3,500.00
Match Forest Restoration (From Teller County, Woodland Park, Landowners)	\$98,298.00
Grant Funds Requested for Happy Meadows	\$10,000.00
Match Happy Meadows (From SPEB, Sportsmen's Park County, CUSP Cash)	\$30,133.00
Total Projects	\$338,378.00

# Rampart Range

## OHV AREA STABILIZATION

COALITION FOR THE UPPER SOUTH PLATTE April 9, 2009

Work on the Rampart Range portion of our Watershed Protection Fund grant has now been completed. Volunteers put in 307 hours at two different sites in the Rampart Range area. They worked at stabilizing an area where OHV users were dropping off an existing road system by creating rock structures, and creating hardened crossing points on two stream crossings; and they completed two fencing projects, constructing 200' of post and rail fence using logs from onsite to preclude continued access by OHVs to sensitive

hillslopes that drain directly into small tributary creeks to the South Platte.

### OVERALL SUMMARY - Rampart Range

Description	\$
Total Grant Funds Requested for Rampart Range To Date	\$7,500.00
Total CUSP Cash Match	\$827.78
Total In-Kind Match	\$3619.64
USFS Cash Match	\$129,000.00
Total	\$140,947.42.

### CWPF BILLABLE EXPENSE SUMMARY — Rampart Range

Description	\$
ROCK (172 TONS@26.18 delivered)	\$4,502.96
SEED (102 @ 6.25)	\$637.50
MISC FENCING SUPPLIES (NUTS, BOLTS, WASHERS, ETC.)	\$133.08
GENERATOR RENTAL	\$85.00
FUEL	\$138.00
PROJECT MANAGEMENT (100.17 HOURS@20)	\$2003.40
Total	\$7,500
