

**FORTY-FOURTH ANNUAL REPORT
OF THE
ARKANSAS RIVER
COMPACT
ADMINISTRATION**

**1992 Compact Year
November 1, 1991 to October 31, 1992**

THE ADMINISTRATION

**FRANK G. COOLEY
Chairman and Representative of the United States**

**DAVID W. WALKER,
CARL G. GENOVA, and JAMES G. ROGERS
for Colorado**

**DAVID L. POPE,
LOLA FOX, and RANDY HAYZLETT
for Kansas**

**307 South Fifth Street
Lamar, Colorado 81052**

**TO THE PRESIDENT OF THE UNITED STATES,
THE GOVERNOR OF THE STATE OF KANSAS, AND
THE GOVERNOR OF THE STATE OF COLORADO,**

SIRS:

Pursuant to Article VIII of the Arkansas River Compact, the Arkansas River Compact Administration submits its Forty-Fourth Annual Report covering Compact Year 1992, November 1, 1991 through October 31, 1992, as follows.

1. MEMBERS of the ADMINISTRATION

- **Representative of the United States:**
Frank G. Cooley; Meeker, Colorado
- **Colorado Representatives:**
David W. Walker; Denver, Colorado (Nov. 1, 1991 - Feb. 2, 1992)
Sarah Duncan; Denver, Colorado (Feb. 3, 1992 - July 31, 1992)
Eugene I. Jencsok; Denver, Colorado (Aug. 1-14, 1992)
Daries C. Lile; Denver, Colorado (Aug. 15, 1992 - Oct. 31, 1992)
Carl G. Genova; Pueblo, Colorado
James G. Rogers; Lamar, Colorado
- **Kansas Representatives:**
David L. Pope; Topeka, Kansas
Lola Fox; Syracuse, Kansas
Randy Hayzlett; Lakin, Kansas

2. OFFICERS of the ADMINISTRATION (as elected Dec. 10, 1991)

- **Chairman:** Frank G. Cooley
- **Vice Chairman:** Carl G. Genova
- **Treasurer:** James G. Rogers
- **Recording Secretary:** Bernice Carr
- **Operations Secretary:** Steven J. Witte

3. STANDING COMMITTEES (as appointed Dec. 10, 1991)

- **Administrative and Legal Committee:**
Lola Fox (Chair), David W. Walker
- **Engineering Committee:**
Carl G. Genova (Chair), David L. Pope
- **Operations Committee:**
Randy Hayzlett (Chair), James G. Rogers
- **The Representative of the United States, Frank G. Cooley, is an ex-officio member of all standing committees.**

4. MEETINGS

- Annual Meetings: Lamar, Dec. 10, 1991; Lamar, Dec. 8, 1992.
- Special Meetings: Telephonic, June 22, 1992; Telephonic, July 20, 1992; Denver: Aug. 10, 1992.
- Engineering Committee: Denver, Aug. 10, 1992; Lamar, Dec. 7, 1992
- Operations Committee: Lamar, Dec. 9, 1991; Lamar, Dec. 7, 1992
- Administrative & Legal Committee: did not meet

Minutes (transcripts) of the Annual Meetings are not included in this annual report. Minutes were provided to the Compact Administration and to each state previously. Copies of the minutes are also available upon request from the Administration office in Lamar. The minutes of the Annual Meetings also contain summaries of the Engineering and Operations Committee meetings.

Three Special Meetings were held during the summer of 1992 to discuss and plan the Administration's response to a lawsuit filed against it, certain Colorado water officials, and the U.S. Army Corps of Engineers by two Colorado ditch companies (Highland Irrigation Co. and Nine Mile Canal Co.). Case No. 92-1151 was filed in U.S. District Court, District of Colorado, on June 8, 1992. The Administration filed its answer on July 22, 1992. The case was stayed by Court Order on August 20, 1992 pending resolution of the Kansas v. Colorado litigation by the U.S. Supreme Court. At the December 8, 1992 Annual Meeting the Administration retained outside counsel, Mr. William Hillhouse of Denver, Colorado, to represent it in this matter.

At its December 7, 1992 meeting the Operations Committee reviewed the "Annual Report of the Operations Secretary Concerning the Operation of John Martin, 1992" (hereinafter "Oper. Sec. 92 Report") and recommended its acceptance and approval which was given by the full Administration at the December 8, 1992 Annual Meeting. Much of the data contained in this annual report is derived from that report.

In February 1992 Mr. David Walker resigned as Director of the Colorado Water Conservation Board (CWCB), and no longer served on the Administration. Colorado was represented by acting Directors of the CWCB, until Mr. Daries C. Lile was appointed as the new Director, effective August 15, 1992. At the December 8, 1992 Annual Meeting Mr. Lile was introduced and welcomed to the Administration, and a brief resolution acknowledging Mr. Walker's service was adopted.

5. FISCAL

Article VIII E.(1) of the Compact provides that expenses incident to the administration of the Compact not paid by the United States shall be borne by the states on the basis of 60% to Colorado and 40% to Kansas. Budgets for such expenses are prepared annually, and the states are assessed their proportionate share of the budgeted expenses at the beginning of each Fiscal Year (FY). The Administration's FY runs from July 1 to June 30. The fiscal affairs of the Administration for Compact Year 1992 involve portions of the Administration's FY 1991-92 (11/1/91 to 6/30/92) and FY 1992-93 (7/1/92 to 10/31/92). The Treasurer reported on the financial status of the Administration for the relevant periods of those fiscal years at the Annual Meetings held on December 10, 1991 and December 8, 1992.

At the December 10, 1991 Annual Meeting the following budget actions were taken:

- FY 1991-92 budget previously adopted was reviewed and left unchanged with anticipated expenses of \$40,550;
- FY 1992-93 budget previously adopted was revised to reflect anticipated expenses of \$46,175;
- FY 1993-94 budget was adopted with anticipated expenses of \$43,105.

Copies of these budgets are included in this report as Appendix A-1.

At the close of the fiscal year on June 30, 1992 the Administration had a cash balance of \$22,382 as shown in the FY 1991-92 Auditor's Report accepted at the December 8, 1992 Annual Meeting. The Auditor's Report is included herein as Appendix A-2. On December 7, 1992 the Administration had a cash balance of \$48,538 as reported by the Treasurer and shown on Appendix A-3.

6. FACTS ABOUT THE JOHN MARTIN RESERVOIR PROJECT

The John Martin Reservoir ("JMR") Project was built by the United States Army Corps of Engineers ("Corps of Engineers"). The project was authorized by Congress in the Flood Control Act of June 22, 1936 when the federal responsibility for flood control throughout the country was assigned to the Corps of Engineers. It is located on the Arkansas River, 58 miles upstream from the Colorado-Kansas Stateline and 18 miles upstream from the City of Lamar, Colorado. Construction of the project began in the fall of 1939, but work was suspended due to World War II from the spring of 1943 to the spring of 1946. The project was completed in October, 1948, at a cost of about \$15 million. The War Department Civil Appropriation Act of June 24, 1940 changed the name of the project from Caddo Reservoir Project to John Martin Reservoir Project, in honor of the late Congressman John A. Martin of Colorado. It is operated by the United States Army Corps of Engineers, Albuquerque (New Mexico) District. The Corps stations a resident reservoir manager at Hasty, Colorado, adjacent to the project.

The JMR Project is a part of the comprehensive plan for the control of floods and the development of water resources in the Arkansas River Basin. A 1986 resurvey of the reservoir, in official use since February 1, 1988, shows 259,562 acre-feet of storage capacity above elevation 3851.87 for flood control protection of the fertile Arkansas River Valley downstream of the dam. The release of stored flood waters is planned so that, when combined with flows originating downstream from the dam, the capacity of the river channel will not be exceeded. Downstream flood damages prevented by JMR already exceed the cost of the project, and total project benefits to date have surpassed the \$117 million mark.

The reservoir also provides 348,683 acre-feet of storage space for conservation and recreation purposes below elevation 3851.87. JMR supplies water to irrigated lands as far downstream as Garden City, Kansas. The conservation pool can store up to 338,639 acre-feet of water for irrigation. Upon request of the Arkansas River Compact Administration, irrigation water for downstream water users is released by the Corps of Engineers through outlet works in the base of the dam.

Recreation and favorable fish and wildlife habitats are also provided by the project. In 1965 Congress authorized a permanent pool to improve habitat and recreation values at JMR. The Administration subsequently approved the use of up to 15,000 acre-feet of storage space at JMR for these purposes. Colorado provides water to the permanent pool pursuant to procedures adopted by the Administration. Reservoir lands are open to public use for outdoor recreation, water sports, fishing,

boating, and camping. During construction some embankment material was obtained from a 75-acre tract of land immediately downstream of the dam. This excavated area, averaging 12 feet deep, filled with water and formed Lake Hasty, now used for year-round recreation. North of the reservoir, a half-mile segment of the historic Santa Fe Trail has been enclosed by a fence and marked with an appropriate sign.

John Martin Dam consists of a concrete gravity structure 1,644 feet long and 120 feet high, and an earthfill structure 2,600 feet long. The concrete gravity structure contains a spillway controlled by sixteen 30 foot by 64 foot tainter gates and their operating machinery. There are earthen wing dams on either side of the main dam. The north wing dam is 3,880 feet long, connecting to the earthfill structure of the main dam at the north abutment. The south wing dam is 5,807 feet long and connects to the south end of the concrete structure of the main dam. A bituminous-surfaced roadway, 21 feet wide, extends along the crest of the north wing dam, main dam, and south wing dam. The overall length of the structure is 2.6 miles. Detailed project data, based on the 1986 resurvey, is shown below.

DAM

Total length, feet	13,945
Maximum height above streambed, feet.....	118
Width of roadway on dam, feet	21

SPILLWAY

Total length, including piers, feet	1,174
Crest gates, 30' x 64', each	16
Discharge capacity, cfs	639,200

OUTLET WORKS

Sluicing conduits, 6' x 7.5', each	4
Regulating conduits, 4' x 4', each	2
Total outlet capacity at elevation 3,851, cfs	14,700

RESERVOIR

Capacity at elevation 3,870, acre-feet	608,245
Flood control storage, acre-feet.....	259,562
Conservation and recreation storage, acre-feet.....	348,683
Water surface at spillway crest, acres.....	8,975
Water surface at top of conservation pool, acres	11,645
Water surface at top of flood control pool, acres	17,151
Drainage areas, square miles	18,915

7. COOPERATIVE STUDIES and ACTIVITIES

Article VIII.G.(1) of Arkansas River Compact requires the Administration to cooperate with the chief official of each of the states of Colorado and Kansas charged with the administration of water rights in their respective states, and with the Federal agencies in systematically determining and correlating the facts pertaining to the flow and diversion of the water of the Arkansas River and to the operation and siltation of John Martin Reservoir and other related structures. Article VIII.G.(2) requests the Director of the United States Geological Survey ("USGS"), the Commissioner of the United States Bureau of Reclamation, and the Chief of Engineers, United States Army, to cooperate and collaborate with the Administration and with the appropriate state officials in such determinations and correlations of stream flow and related data. Under the By-Laws of the Administration, these cooperative studies and activities are assigned to the Engineering Committee of the Administration.

During the year covered by this report the Administration has received excellent cooperation from all agencies referred to in the foregoing provisions of the Compact. The USGS has continued the operation of the compact gaging stations and the analysis of and compilation of the hydrologic data presented in this report and used in the administration of the Compact. The USGS also reported to the Administration on a variety of water resource studies it was conducting in the Arkansas River Basin. The Corps of Engineers continued to operate the conservation pool of John Martin Reservoir in accordance with the terms of the Compact and the resolutions and orders of the Administration. The Corps informed the Administration of its plan to conduct new capacity surveys at John Martin and Trinidad Reservoirs during 1993. The Corps also reported on the pending allocation of excess space at Trinidad Reservoir and on channel capacity problems along the Purgatoire River downstream of the City of Trinidad.

8. WATER SUPPLY and RESERVOIR OPERATION

John Martin Reservoir ("JMR") is operated pursuant to the "Resolution Concerning an Operating Plan for John Martin Reservoir" ("Operating Plan" or "Operation Plan") adopted by the Compact Administration on April 24, 1980. Minor revisions to the Operating Plan were made on May 10, 1984 and December 11, 1984, but the plan has remained unchanged since 1984. Accordingly, a system of water storage accounts exists at JMR into which reservoir inflows are distributed for physical release at a later date. While these accounts have often been referred to as "Article II" and "Article III" accounts, the correct designation, based on the organization of the Operating Plan Resolution, is "Section II" and "Section III" accounts. This report uses the term "Section" or "agreement" whenever referring to the various accounts established pursuant to the Operating Plan. More specifically, the Operating Plan created the following account system at JMR:

- Accounts established by Section II
 - Kansas account
 - Colorado Irrigation District 67 ditch accounts (Fort Bent Canal, Keesee Canal, Amity Canal, Lamar Canal, Hyde Canal, Manvel Ditch, X-Y/Graham Ditch, Buffalo Canal, Sisson-Stubbs Ditch)
 - Kansas transit loss account
- Accounts established by Section III
 - Amity Great Plains Reservoir account
 - Fort Lyon Canal account
 - Las Animas Consolidated Ditch account

In addition to these accounts, water is also accounted for at JMR as conservation storage and in the permanent and the flood control pools.

An overview of general reservoir operations during Compact Year 1992 is summarized in Table 1. This table reflects actual reservoir operations showing the volumes of water physically stored, released, and evaporated at JMR between November 1, 1991 and October 31, 1992. During the year 74,896.79 acre-feet of water was stored in JMR, 13,327 acre-feet evaporated, and 56,671.50 acre-feet was released to downstream users. This operation resulted in an increase in contents for the year of almost 4,900 acre-feet. The remainder of this section provides a detailed description of reservoir operations.

NOTES

[1] Peak contents, 70,800 AF; reached on April 4, 1992.
[2] Source: Oper. Sec. 92 Report Tables I, II, VI, and VIII (includes City of Lamar temporary sub-account operations).

The 1992 Arkansas River Compact Year and the winter season for JMR began at 0001 hours November 1, 1991 with 8,386.58 acre-feet in the reservoir distributed as shown in Table 2. Winter storage officially ended at 2400 hours on March 31, 1992 with a total inflow to the reservoir of 65,500.42 acre-feet. Conservation storage received 37,944.32 acre-feet of water which was held for subsequent release to the various Section II accounts after March 31, pursuant to the Operating Plan. An additional 27,556.10 acre-feet was stored at JMR during the period November 15, 1991 to March 15, 1992 pursuant to Section III of the 1980 Operating Plan and the Pueblo Winter Water Storage Program ("WWSP"), as shown on Table 3.

NOTES:

[1] Inflow stored at JMR during the period Nov. 15, 1991 through March 15, 1992 pursuant to Section III of the 1980 Operating Plan and the Pueblo WWSP.

[2] Not a physical release from JMR, WWSP water allocated to individual Section III Operating Plan accounts on March 16, 1992 as follows:

<u>Account</u>	<u>Total Allocation</u>	<u>Transfer to transit loss</u>	<u>Net to Account</u>
Amity	20,242.17	7,084.76	13,157.41
Ft Lyon	2,741.50	959.52	1,781.98
Las Animas	3,841.34	1,344.47	2,496.87
Total	26,825.01	9,388.75	17,436.26

[3] Source: Oper. Sec. 92 Report, Table II, and monthly accounting sheets for Section III account distribution.

No water was bypassed through the reservoir during the winter season. Several transfers into and between accounts did occur. These transfers adjusted the volume of water owned by individual entities, but did not change the total contents of JMR. In November the excess water in the transit loss account, 3,770.56 acre-feet, was reallocated to the Kansas and District 67 Section II accounts. On March 16, 1992 the 26,825.01 acre-feet of WWSP water held in the JMR conservation pool was distributed into the appropriate Section III agreement accounts. Following this distribution, 35% of each individual Section III account inflow was reallocated to the transit loss account, a total of 9,388.75 acre-feet. After these actions, the allocation of the reservoir contents at the conclusion of the winter compact storage period on March 31, 1992 was as shown on Table 4. The total contents on March 31, as rounded and published by the USGS, was 70,600 acre-feet which agrees with the value of 70,591 acre-feet measured by the Corps of Engineers and used by the Operations Secretary in his 1992 Report.

NOTES

[1] Source: Oper. Sec. 92 Report, March accounting sheets.

The summer storage season began at 0001 hours April 1, 1992. Transfer of 36,275.20 acre-feet of winter conservation storage into the Section II accounts began on April 1, 1992 in accordance with the Operation Plan and was completed on April 17, 1992. Conservation storage operations are detailed in Table 5. During the period April 1 to 18, 2,163.17 acre-feet of summer conservation storage was accumulated. After a reduction for evaporation this water was also distributed to the Section II accounts. Kansas received 40% of the April conservation storage transfers (15,236.05 acre-feet) and the Colorado District 67 ditches received 60% (22,854.11 acre-feet), a total of 38,090.16 acre-feet. With moderate runoff there were no flood control operations during Compact Year 1992, as reflected in Table 5A, Flood Pool Operations. Peak contents in JMR of 70,800 acre-feet was reached on April 4, 1992.

During June, July, and August 1992 brief periods of high runoff resulted in additional summer inflow of 4,499.97 acre-feet to conservation storage. After reduction for evaporation, 4,498.30 acre-feet was subsequently transferred to the Section II accounts, Kansas receiving 40% (1,799.32 acre-feet), and Colorado District 67 ditches 60% (2,698.98 acre-feet). No other inflows to conservation storage occurred during the remainder of the year.

NOTES

- [1] No flood pool operations in CY 1992.
 [2] Source: Oper. Sec. 92 Report, Table IX.

During the summer storage season 1,914.44 acre-feet was stored in the Amity Canal Section III account pursuant to the Great Plains Reservoir ("GPR") decree. Another 818.79 acre-feet was temporarily stored in a sub-account of the Ft. Bent Canal account for reregulation of the City of Lamar's transmountain Fry-Ark water under procedures approved by the Administration and described in the Operations Secretary Report. No water was stored in the permanent pool at JMR during the summer season. Combined operations of all the accounts established by Sections II and III of the Operating Plan are shown in Table 6. Operations of the Section II and III accounts during Compact Year 1992 are separately shown in Tables 7 and 8.

NOTES

- [1] Winter inflow stored at JMR per Pueblo WWSP, summer inflow per GPR decree.
- [2] Releases include 9,388.75 AF [March] and 546.82 AF [summer] [35% of inflow] transferred to transit loss account, a total of 9,935.57 AF. Additional transfer against May 352.08 AF inflow to Amity account made Nov. 1, 1992, see 1993 accounting.
- [3] Inflows and releases do not include transfers between Section III accounts.
- [4] Source: Oper. Sec. 92 Report, Tables III, IV, V, and monthly accounting sheets.

Kansas called for releases from its account of 11,074.55 acre-feet during a single run from July 7 to July 21, 1992. A separate transit loss account release of 1,475.22 acre-feet was made to support deliveries of Kansas account water to the Stateline. Operations of the Kansas and transit loss accounts are summarized in Tables 9, 10, and 11, and detailed on a daily basis in Appendices B-12 and B-13.

The procedure used to calculate deliveries of requested releases is described in an annual agreement between the states. The Stateline flow attributed to Kansas demands for releases from JMR is calculated using a lag/rundown period to account for the transit time between JMR and the Stateline. Generally, deliveries begin 2 days after the release from JMR commences and continue for up to 7 days following the end of the release. The agreement for 1992, dated Dec. 10, 1991, states in part:

"3. Credit for delivery to Kansas will stop at the Stateline 7 days after the end of the run at JMR. No credit for over delivery will be carried forward to any subsequent run..."

4. When the daily average flow at the Stateline exceeds the demand, delivery will be credited at not to exceed 105% of the demand."

The total Stateline flow on days of Kansas demands, determined pursuant to this agreement by the Operations Secretary using provisional data was 17,867 acre-feet. This provisional flow remained unchanged when USGS discharge records were finalized and published. Of this Stateline flow, 14,541 acre-feet was determined pursuant to the annual agreement to be a credited delivery against the releases from the Kansas account.

The operation of the transit loss account in Compact Year 1992 is shown in Table 11. Inflows to the transit loss account are by transfer of 35% of Section III account inflows, as required by the Operating Plan. Releases were made as necessary to support deliveries to the Stateline during the period of Kansas demand. The November 1991 release was the reallocation of excess transit loss account water to the other Section II accounts, and was not a physical release from the reservoir.

NOTES

[1] Inflows are transfers from Section III accounts.

[2] Transit loss account totals included with Section II accounts in Table 7.

[3] Nov. 1991 release is reallocation to Kansas account (11/35) and to Colorado ditch accounts (24/35) pursuant to the 1980 Operating Plan and annual agreement.

[4] Additional inflow to transit loss account re Amity made on Nov. 1, 1992.

[5] Source: Oper. Sec. 92 Report, Table VII.

Combined operations of the Section II accounts for the ditches in Irrigation District 67 of Colorado are shown in Table 12A. The data in Table 12A includes amounts resulting from reregulation of the City of Lamar's transmountain Fryingpan-Arkansas Project water in a temporary Ft. Bent Canal sub-account. In July, 1992, 818.79 acre-feet was delivered into this sub-account, 15.69 acre-feet was evaporated, and 803.10 acre-feet was released from JMR to the Ft. Bent Canal for recharge of the city's well field. Combined Section III accounts operations were previously shown in Table 8. Total releases from all Section II and III accounts to Colorado ditches during the 1992 Compact Year totaled 44,121.73 acre-feet, as summarized in Table 12B.

NOTES

- [1] Source: Oper. Sec. 92 Report, Table VIII

Compact Year 1992 ended at 2400 hours on October 31, 1992. JMR contained 13,284.87 acre-feet, as determined by the Operations Secretary accounting, which agrees reasonably well with the 13,600 acre-feet subsequently published by the USGS. An adjustment to reservoir accounting was made by the Operations Secretary on November 1, 1992 by crediting approximately 320 acre-feet of additional inflow to conservation storage. This reconciled the records of JMR contents for the start of Compact Year 1993. JMR contained approximately 4,900 acre-feet more water than at the beginning of Compact Year 1992. The final contents were allocated as shown in Table 14.

NOTES		
[1] Source: Oper. Sec. 92 Report, Table XIII.		

The technical data for this section was compiled by the staff of the Colorado Water Conservation Board using data from the Annual Report of the Operations Secretary Concerning the Operation of John Martin, the USGS, the Colorado Division of Water Resources, the Kansas Division of Water Resources, and the minutes and correspondence of the Arkansas River Compact Administration.

9. GAGING STATIONS

The USGS operates eight gaging stations, as included in Appendix B, under their "Collection of Basic Records" program and through funding agreements with the Corps of Engineers and the Administration. For federal fiscal year 1991-1992 (October 1, 1991 to September 30, 1992) the Administration approved cooperative agreements with the Kansas and Colorado Districts of the USGS in the amount of \$26,450. The Administration was assessed one half of this amount, or \$13,225. These funds were used for supplemental stage and flow measurements at compact gaging sites in Colorado and Kansas, the operation of one station (Arkansas River near Granada, Colorado), and the preparation of records for this annual report. In 1992 the USGS installed a data collection platform (DCP) on the Arkansas River at Lamar, Colorado gage. As of 1992 all compact gaging stations are now linked via satellite to water resource management offices. The immediate retrieval of real time flow data has improved the administration of water deliveries under the Compact.

In general, streamflow records of satisfactory accuracy were obtained at the compact stations. Emphasis was again placed on obtaining more field data, particularly in the form of discharge measurements at various stages of flow. Additional measurements were also made by personnel of the Colorado State Engineer which were incorporated into the records as appropriate. The only significant problem at the stations during the year was the continuing unstable channels and controls.

10. FINDINGS of FACT by the ADMINISTRATION

There were no findings of fact made by the Administration during Compact Year 1992.

11. INVESTIGATIONS

There were no investigations undertaken by the Administration during Compact Year 1992.

12. CHRONOLOGY of EVENTS in KANSAS v. COLORADO LITIGATION

During Compact Year 1992 the trial in the liability phase of the litigation continued intermittently before the Special Master, Arthur L. Littleworth, in Pasadena, California. Various motions were filed during the period regarding additional discovery and admissibility of evidence. As of December 16, 1992 all evidentiary presentations in the liability phase of the litigation had been completed. Also during 1992 the Special Master issued orders dismissing Kansas' claims regarding Trinidad Reservoir and several counterclaims filed by Colorado.

13. RESOLUTION HONORING DAVID W. WALKER

RESOLUTION

WHEREAS, Mr. David W. Walker, in his capacity as Director of the Colorado Water Conservation Board, served as a representative from the State of Colorado to the Arkansas River Compact Administration; and

WHEREAS, Mr. Walker ably and steadfastly represented Colorado's interests with equanimity and fairness in a gentlemanly manner during his association with the Administration.

NOW, THEREFORE, BE IT RESOLVED by the Arkansas River Compact Administration that it does hereby express its gratitude and appreciation to David W. Walker for his outstanding service, dedication, and courtesy to the Administration and to the states, and further extends to him its best wishes for health and happiness in the future.

BE IT FURTHER RESOLVED that the Administration honor Mr. Walker for his service by including this Resolution in the Administration's 1992 Annual Report and instruct the Recording Secretary to send a copy of the Resolution to Mr. Walker.

Entered this 8th day of December, 1992, at the Annual Meeting of the Arkansas River Compact Administration held in Lamar, Colorado.

Frank G. Cooley, Chairman

Gary L. Anderson, C.P.A.
Ronald D. Anderson, P.A.

September, 2, 1992

We have audited the accompanying statements of assets, liabilities and equity - cash basis - of the Arkansas River Compact Administration as of June 30, 1992, and the related statements of revenue collected and expenses paid for the year then ended. These financial statements are the responsibility of the Administration's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Our examination was made in accordance with generally accepted auditing standards and accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

As described in Note 1a, these financial statements were prepared on the basis of cash receipts and disbursements, which is a comprehensive basis of accounting other than generally accepted accounting principles.

In our opinion, the financial statements referred to above present fairly, in all material respects, the assets and liabilities - cash basis - of the Arkansas River Compact Administration as of June 30, 1992 and its revenue collected and expenses paid during the year then ended, on the basis of accounting described in Note 1a.

Anderson & Company, P.C.

ARKANSAS RIVER COMPACT ADMINISTRATION
NOTES TO CASH BASIS STATEMENTS
June 30, 1992

NOTE 1 - Summary of significant accounting policies:

- a. The Administration maintains financial records using the cash basis of accounting. By using the cash basis of accounting, certain revenues are recognized when received rather than when earned, and certain expenses and purchases of assets are recognized when cash is disbursed rather than when the obligation is incurred.

NOTES:

[1] Transmountain water diverted into the Arkansas Basin through a facility is generally delivered to some type of storage prior to use. The values reported reflect water diverted into the basin, generally to storage, and are not necessarily measured as flow below Pueblo.

[2] Twin Lakes ownership: Colorado Spgs. 54.65%, Pueblo 23.14%, Aurora 4.3%, others 5.75%. (also known as Independence Pass Tunnel).

[3] Homestake ownership: Colorado Spgs. 50%, Pueblo 50%, Aurora 1%. (also known as Carlton Tunnel).

[4] Busk-Ivanhoe ownership: Pueblo 50%, Aurora 49%, others 1%. (also known as Hoosier Tunnel).

[5] Values show amount of transmountain water "delivered into the Colorado Springs potable water system" from the Blue and South Platte Rivers via Hoosier Tunnel and Montgomery Pipeline, as shown in Table 2 of City's Blue River letter report for water year 1992 (October data from subsequent report).

[6] Aurora owned transmountain water is generally redirected into and used in the South Platte River Basin via the Otero Pump Station and Spinney Mountain Reservoir. Total imports for Compact Year 1992 should be reduced by 17,979 AF to reflect water used by Aurora outside the Arkansas Basin.

B-17
1992
