Part Two: Table Discussions on Implementation

- 1) Will storage be necessary to implement your portfolio? What types of storage do you think will be most successful in the future and should be evaluated? What barriers need to be overcome to implement storage projects in Colorado?
- 2) Does your basin have enough storage to implement the different parts of the portfolio(s)?
- 3) Does what you've learned confirm your roundtable's portfolios or do you think you need to make changes? If so, what changes?
- 4) What are the two most critical aspects of your conversation that you would like the CWCB, IBCC, and other roundtable members to know?
