

2012 Statewide Roundtable Summit

Feb. 29th 1-5 pm IBCC Meeting ♦ Feb. 29th 5:30-7 pm Reception ♦ March 1st Statewide Summit 8-5 pm
Omni Interlocken Resort, 500 Interlocken Boulevard, Broomfield, CO

Summit Goals:

- **Goal 1:** Explore roundtable portfolios for several scenarios and their commonalities and differences
- **Goal 2:** Brainstorm initial common implementation elements across portfolios to help inform further Basin Roundtable portfolio development
- **Goal 3:** Identify implementation elements that need cross basin dialogue
- **Goal 4:** Initiate long and short-term implementation efforts to meet both consumptive and nonconsumptive needs

Table Questions:

Part Two: Table Discussions on Implementation

3:30 – 4:45 – New Supply

- 1) How can Colorado River Water be used to address the 2050 Demands from SWSI? These demands are - west slope demands, oil shale, Front Range demands, nonconsumptive needs, increased agriculture in the Yampa Basin, increased power generation, etc.
- 2) Given the competing future demands for Colorado River Water, what additional activities need to take place to better analyze how we should all use Colorado River Water to meet those demands? (e.g. planning, analysis, engineering, costing, identification and understanding of issues that need to be addressed, stakeholder discussions, studying compensatory storage for a transbasin project, comparative project evaluation, etc.).
- 3) What do we do now and what do we preserve for the future?
- 4) Does what you've learned confirm your roundtable's portfolios or
- 5) do you think you need to make changes? If so, what changes?
- 6) What are the two most critical aspects of your conversation that you would like the CWCB, IBCC, and other roundtable members to know?
