Appendix A - Quantified Allowances for Future Water Uses

Big Dominguez Creek – 4-10CW185

	Maximum Storage Volume Allowed – AF (Total of all new water rights)	Max Diversion Rate – cfs (April 15 – June 30)	Max Diversion Rate – cfs (July 1 – October 31)
Private Parcels	100	3.30	0.198
USFS	1.14	0.066	
BLM	1.0	0.11	
Notes for Private Parcels:			
1. Storage volumes are for all purposes including, irrigation, stock watering, wildlife and any augmentation required for non-exempt uses. If a pond is constructed under an exempt use, such as a livestock tank filled with water from an ephemeral channel, that pond is not counted against the allowance.			
2. Domestic use is assumed to be an exempt use and is not included in this allowance.			
Notes for BLM and USFS lands:			
1. The storage volumes identified for the BLM and USFS are for stock water purposes only. The ponds may be filled with water from surface diversions, spring diversions, or well diversions. If a pond is constructed under an exempt use, such as a livestock tank filled with water from an ephemeral channel, that pond is not counted against the allowance.			
2. The maximum diversion rate for all BLM and USFS ponds from July 1 – October 31 is assumed to be 0.033 cfs/pond.			
3. The diversion rates shown in the table are for multiple purposes including: livestock watering, wildlife watering, and recreation. The diversion rates may be used to satisfy water needs for developed facilities, such as campgrounds, or may be used for mores dispersed uses such as wildlife watering. Exempt uses, such as livestock watering well operating at 15gpm or less, will not count against this allowance.			

Little Dominguez Creek – 4-10CW184

	Maximum Storage Volume Allowed – AF (Total of all new water rights)	Max Diversion Rate – cfs (April 15 – June 30)	Max Diversion Rate – cfs (July 1 – October 31)
Private Parcels	1	0.033	0.033
USFS	0.76	0.066	
BLM	2	0.22	
Notes for Private Parcels:			
1. Storage volumes are for all purposes including, irrigation, stock watering, wildlife and any augmentation required for non-exempt uses. If a pond is constructed under an exempt use, such as a livestock tank filled with water from an ephemeral channel, that pond is not counted against the allowance.			
2. Domestic use is assumed to be an exempt use and is not included in this allowance.			
3. The maximum diversion rate is based on extremely limited natural water supply to the only privately owned parcel within the watershed. The allowance assumes that one pond could be constructed with a diversion rate of 0.033 cfs into the pond.			
Notes for BLM and USFS lands:			
1. The storage volumes identified for the BLM and USFS are for stock water purposes only. The ponds may be filled with water from surface diversions, spring diversions, or well diversions. If a pond is constructed under an exempt use, such as a livestock tank filled with water from an ephemeral channel, that pond is not counted against the allowance.			
2. The maximum diversion rate for all BLM and USFS ponds from July 1 – October 31 is assumed to be 0.033 cfs/pond.			
3. The diversion rates shown in the table are for multiple purposes including: livestock watering, wildlife watering, and recreation. The diversion rates may be used to satisfy water needs for developed facilities, such as campgrounds, or may be used for mores dispersed uses such as wildlife watering. Exempt uses, such as livestock watering well operating at 15gpm or less, will not count against this allowance.
