

Summary

This is an application for surface water right and approval of plan for augmentation, including exchanges. Applicant's plan for augmentation utilizes downstream sources to replace water by exchange. It appears that Applicant does not have a local replacement source.

CWCB Appropriations

The CWCB holds the following instream flow water right that could be injured by this application:

CWCB Case No.	Stream/Lake	Amount (cfs)	Approp. Date	Watershed	County
5-95CW291	Roan Creek	1.75/1.25	11/6/1995	Parachute – Roan Creek	Mesa, Garfield

Potential for Injury

The proposed application could cause injury to CWCB's instream flow water rights if proper terms and conditions are not included for operation of the augmentation plan. Applicant does not currently have upstream replacement water that can provide replacements to the instream flow water right; therefore, Applicant must be required to, and have the ability to, curtail water use at times the ISF is not satisfied.

Other Objectors

Other objectors include Bluestone Water Conservancy District, Jessie and Donnis Coates, United States of America – Bureau of Land Management, and Chevron USA, Inc.
