**Intrastate Water Management and Development Section  
Colorado Water Conservation Board  
1580 Logan St. Suite 600  
Denver, CO 80203**

**Dear Colorado Water Conservation Board,**

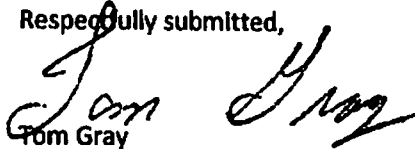

**The Yampa-White River Basin Roundtable is recommending a grant request from the Raw Water Users Board and the Town of Rangely in the amount of \$12,500 for use in developing a flow study for the expansion of a currently limited raw water system. The current raw water system is used exclusively by the taxing entities for the schools, parks, hospital, golf course, town and cemetery.**

**The purpose of the study will be to examine the current distribution system flows, storage and pumping station and determine how to phase in an expansion of each of these components to supply raw water usage to commercial and residential users for irrigation purposes throughout Rangely.**

**The attached presentation and letter describe the request as it was presented to the Yampa-White River Basin Roundtable. The Town of Rangely is eligible to apply for the grant as it is a unit of Local Government.**

**Thank you for considering this request and if you have any questions or need additional information please contact my office.**

**Respectfully submitted,**

  
Tom Gray

**Yampa-White Basin Roundtable Chairman**

**Cc: Peter Brixius – Town Manager – Rangely, Alden Vanden Brink – Utilities Supervisor - Rangely**
