**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan and water conservation in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. This means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health. Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

Dear CWCB,

I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.

As our state's communities grow, our rivers are becoming increasingly strained and drained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.

Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for water conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.

Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address. It is incongruous that Colorado has dealt with this issue earlier, so it is extremely important that have given it the importance water issues deserve. It is most important to have a really serious water conservation plan. After all, dumping water on Kentucky blue grass in a semiarid (moving to arid) state is rather foolish.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**To close, I would like to say that my wife and I are walking our talk on this issue. We are moderately water conservative and our total daily water use average over the past 13 years has been about 75 gallons/day. Such limited use is clearly doable.**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

## The Rivers I Care About

Sat Jan 25 2014 14:10:32 GMT-0700 (MST)

ID: 143cb3d6989c28af

From: Drew Beckwith <drewbeckwith@gmail.com>

To: cewaterplan@state.co.us

CC:

Dear CWCB,

Thank you for initiating the development of our first ever state water plan, and for highlighting the importance of water conservation in your recent State of the State address.

As many more people move to, and adopt our state (just like me), our rivers are taking the brunt of unwise water management. We need to change the status quo. We need our rivers to be clean, healthy, and flowing - the exact reasons that make Colorado such a special place to live. If our rivers continue to be trashed by excessive diversions, we'll have nothing to offer our fish, tourists, recreational enthusiasts, and my children.

This new Water Plan has the potential to prescribe a new and innovative path forward. I urge you to stand up and , push for urban conservation, and for cities to live within their means. We need to stop looking to the West Slope to solve our water issues.

Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future.

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Dear CWCB,**

**As a citizen of Colorado, I am writing in support of your efforts to create the first ever statewide water plan. I want to thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**I know that the population of Colorado will continue to grow; and since CO is a semi-arid state, our water supply and our rivers will be increasingly strained beyond the point where we are now, which already strained. That means we need to change something or some things.**

**We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations. This Colorado Water Plan has to potential to do that. I especially want cities to live within their means. One thing in particular that bothers me a lot, is hearing that some communities have requirements that each house has a green lawn. It seems very short sighted to me for communities to require lawns that have to be watered 2 to 3 times a week when we live in this semi-arid climate. We need leeway or rules that encourage native plants that require little water.**

**I especially urge you to stop taking water from the Western Slope to solve our water problems on the eastern slope. Soon the western slope won't have enough water. I also urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We also need to help agriculture modernize and increase efficiency. We need to maintain working landscapes and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

Dear CWCB,

I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.

As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.

Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.

Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

CC:

Dear CWCB,

A statewide water plan is essential - thank you for your leadership in this area. Please continue to lead by making the plan environmentally responsible and accountable to future generations of people and wildlife. We can do much better through conservation and efficiency - we don't need more reservoirs and river degradation.

Jarett Zuboy

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations. And as the planet grows too: we are about to reach 8 billion of us, CO could set the stage for the rest of the world!**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. **Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Dear CWCB,**

**I recently read Colorado Water Law for Non-Lawyers. I knew before reading the book that water law was contentious but I didn't realize how complicated it was. I read the book because water and how we conserve and use it will mean the difference between economic survival and indeed, perhaps individuals survival in the future.**

**As our state's communities grow, our rivers are becoming increasingly strained. That means we need to change the status quo. We need our rivers to be clean and flowing - to support our fish and wildlife, tourism, recreation, and future generations.**

**Colorado's Water Plan has the potential to chart an innovative path forward for our state. I urge you to stand up for measures to protect and restore our rivers, push for conservation, and for cities to live within their means. We need to help agriculture modernize and increase efficiency, and stop looking to the West Slope to solve our water issues. We need to maintain working landscapes, support growing communities, and protect river health.**

**Please ensure that Colorado's Water Plan uses our state's ingenuity to "be prepared" for our water future."**

**Dear CWCB,**

**I am writing to support your efforts to create the first ever statewide water plan. Thank you for reiterating the importance of the plan, and water conservation, in your recent State of the State address.**
