1. PARTIES

This Grant Agreement (hereinafter called “Grant”) is entered into by and between Lower Arkansas Valley Water Conservancy District (hereinafter called “Grantee”), and the STATE OF COLORADO acting by and through the Department of Natural Resources, Colorado Water Conservation Board (hereinafter called the “State or CWCB”).

2. EFFECTIVE DATE AND NOTICE OF NONLIABILITY.

This Grant shall not be effective or enforceable until it is approved and signed by the Colorado State Controller or designee (hereinafter called the “Effective Date”). The State shall not be liable to pay or reimburse Grantee for any performance hereunder, including, but not limited to costs or expenses incurred, or be bound by any provision hereof prior to the Effective Date.

3. RECITALS

A. Authority, Appropriation, And Approval

Authority for the agency entering into this Contract arises from Colorado Revised Statutes (CRS) 39-29-109(2)(c), 37-75-104(2)(c) and 37-75-102 et al., and Senate Bill 06-179 adopted by the 2006 General Assembly, and a sufficient unencumbered balance thereof remains available for payment. Required approvals, clearance and coordination have been accomplished from and with appropriate agencies.

B. Consideration

The Parties acknowledge that the mutual promises and covenants contained herein and other good and valuable consideration are sufficient and adequate to support this Grant.

C. Purpose

The Water Supply Reserve Account will be expended to to enhance the Draft Arkansas Basin Implementation Plan (Plan or BIP) between Draft and Final submittal to the Colorado Water Conservation Board (CWCB) and incorporation in to the Colorado Water Plan (CWP). The Arkansas Roundtable (Ark RT) elected to solicit input from the stakeholders in the basin through a Public Outreach initiative; specifically, orienting the annual Arkansas Basin Forum to the topics of the Basin Implementation Plan and Colorado's Water Plan, by organizing and hosting a total of 17 public meetings and maintaining a website. The input received in that process needs to be integrated in the Draft Plan along with greater detail regarding the municipal supply gap. A disaggregation of the municipal gap, and alignment with potential solutions brought forward during the Outreach Initiative, will provide a clearer picture of regional projects and methods to address the Basin's needs. The tasks identified in this scope of work will refine and improve the Draft Arkansas BIP. The format for Tasks follows the Basin Implementation Plan (Plan) Draft Guidance.

The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

ii. Obligations and Rights

iii. Payments

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made. Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

C. Remedies Not Involving Termination

The State, in its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. ii. Withhold Payment

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Demand removal of any of Grantee's employees, agents, or Sub-grantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

v. Intellectual Property

Statement of Work - DRAFT

WATER ACTIVITY NAME – Arkansas Basin Implementation Plan – Phase 2
GRANT RECIPIENTS – LOWER ARKANSAS VALLEY WATER CONSERVANCY DISTRICT
FUNDING SOURCE - Statewide Account / Basin Account

The following is a Scope of Work to enhance the Draft Arkansas Basin Implementation Plan (Plan or BIP) between Draft and Final submittal to the Colorado Water Conservation Board (CWCB) and incorporation in to the Colorado Water Plan (CWP). The Arkansas Roundtable (Ark RT) elected to solicit input from the stakeholders in the basin through a Public Outreach initiative; specifically, orienting the annual Arkansas Basin Forum to the topics of the Basin Implementation Plan and Colorado's Water Plan, by organizing and hosting a total of 17 public meetings and maintaining a website. The input received in that process needs to be integrated in the Draft Plan along with greater detail regarding the municipal supply gap. A disaggregation of the municipal gap, and alignment with potential solutions brought forward during the Outreach Initiative, will provide a clearer picture of regional projects and methods to address the Basin's needs. The tasks identified in this scope of work will refine and improve the Draft Arkansas BIP. The format for Tasks follows the Basin Implementation Plan (Plan) Draft Guidance.

Consultants. This Scope of Work includes three (3) consultants: a Consumptive Consultant, a Nonconsumptive Consultant and a Project Manager, referenced collectively as "Consultants." Where an individual entity has sole responsibility for an activity, that entity is designated.

Executive Summary

According to the BIP guidelines the executive summary of the Arkansas BIP will be included in the CWP.

Consultants Responsibilities

Task 0.0 – Executive Summary

The Executive Summary in the Draft Plan is a progress report. Project Manager will revise and finalize the Executive Summary of the Arkansas BIP.

- Redraft Executive Summary, present to Executive Committee and Ark RT, revise for final submission.

Section 1: Arkansas Basin Goals and Measurable Outcomes

The Draft Plan included a total of four (4) Storage Goals, four (4) Municipal Goals, five (5) Agriculture Goals and eight (8) Nonconsumptive Goals. These goals will be revised and further articulated in the text where appropriate. New goals may be added based on a review of the input and further dialogue by the Ark RT.

Consultants Responsibilities

Task 1.0 – Goals and Measurable Outcomes

The Consultants will work with the BRT to revise and finalize the basin's goals and measurable outcomes for input into the CWP.

- Include new goals as identified in review of the input forms
- Develop Measurable Outcomes, Actions and Challenges to complete the Nonconsumptive Goals table

Section 2: Evaluate Consumptive and Nonconsumptive Needs

2.1 Nonconsumptive Needs

This section of the Plan reviewed and documented nonconsumptive needs in the Arkansas Basin. Section 2.1 currently describes the progress to date and contains appendices of historic documents, including the Nonconsumptive Toolbox.

This section of the Plan will be enhanced and finalized by performing the items listed below.

Consultants Responsibilities

Task 2.1 – Nonconsumptive Needs

Nonconsumptive Consultant will work with the nonconsumptive needs committee to address comments or questions on the draft BIP. Coordination between the input received in the Public Outreach initiative and the nonconsumptive needs committee will generate minor edits to the current BIP draft. The Consultants will submit revisions to the Project Manager for inclusion in the final Arkansas BIP, to inform the Colorado Water Plan (CWP) and for inclusion in SWSI.

- Meet with the Nonconsumptive Needs Committee to revise Section 2.1 of the Draft
- Update Appendices as appropriate

2.2 Consumptive Needs

This Section of the Draft Plan summarized the historic studies by the Ark RT and the methodologies applied in SWSI 2010. The Draft Plan also highlighted the local and regional nature of the municipal gap, the need for greater definition of interrelationship between agriculture and the environment and the pressure on agricultural water resources from increasing farm efficiency. An update of this section will disaggregate the gap into sub-regions. Within that disaggregation, the Consultants will distinguish between those groundwater resources that have been depleted and now require replacement sources of supply, those groundwater resources that have been depleted for economic benefit and are unlikely to ever be replaced, those groundwater resources that are challenged by water quality or other constraints besides depletion and groundwater systems in support of agriculture (center pivots, drip systems) that require increase augmentation under the SEO's Efficiency Rules.

Consultants Responsibilities

Task 2.2 – Consumptive Needs

The Consultants will;

- Disaggregate the consumptive needs for the basin by both sub-region and type.
- Compare Sub-regional needs with input received during the Public Outreach initiative.
- Quantify agricultural augmentation needs in sub-regions.. Integrate this information into the final Arkansas BIP.

Section 3: Evaluate Consumptive and Nonconsumptive Constraints and Opportunities

The purpose of this section is to help the BRT better understand the constraints and opportunities within the basin to meet their identified needs. Sections 3.2 and 3.3 were completed in Phase 1, revisions to the Draft Plan will be made to Sections 3.1 and 3.4:

Consumptive and Nonconsumptive Constraints and Opportunities

3.1 Analysis of Constraints and Opportunities Based on Existing Data

3.4 Current and Future Shortage Analysis

3.1 Analysis of Constraints and Opportunities Based on Input Received in Phase 1

The purpose of this task is to illustrate where projects and methods could be implemented and where constraints exist that might limit solutions. This Phase 2 BIP will generate maps showing “pinch points” or conflict areas, coordinated with consumptive and nonconsumptive projects and methods. Sub-regions with available modeling or management tools will be integrated. Sub-regions without tools, particularly groundwater dependent regions or tributaries to the Arkansas mainstem, will be identified for future study.

The impact of regulatory and jurisdictional constraints on water operations will be discussed.

Consultants Responsibilities

Task 3.1 – Constraints and Opportunities Based on Existing Data

Consumptive Consultant will work with Arkansas BRT to refine and enhance identified pinch points, other constraints, and opportunities identified in the Draft Arkansas BIP. This information will be integrated into the final Arkansas BIP.

- Generate maps identifying projects and conflict areas between projects and hydrologic constraints
- Propose modifications or alternatives to projects if and where possible

Section 3.4 Current and Future Shortage Analysis

Using the model developed in Task 3.3., the Draft Plan will be updated with specific locations of shortages compared against solutions generated in the Outreach initiative. The shortage analysis will summarize where M&I, agricultural, and nonconsumptive needs may have shortages under varying hydrology such as wet, dry, and average conditions.

Consultants Responsibilities

Task 3.4 – Shortage Analysis

Description of Task

The purpose of this task is to analyze water supply availability and uses for current conditions and a future planning horizon (2050) in order to gain a better understanding of both. Analyses will incorporate a range of hydrologic conditions and demand projections associated with the selected planning horizon. The analyses will include a shortage analysis as described above.

Deliverable

The results of the shortage analysis as documented in section 3.4 of the final Arkansas BIP is underway. The Draft considers a single scenario. The input received, an update to Section 4.3 Conservation and the disaggregation of the municipal gap will require scenarios with different assumptions. Consumptive Consultant shall:

- Meet with a technical committee to establish assumptions for scenarios (e.g. planning horizon other than 2050, alternatives to “high growth,” changes in return flow as fully consumable source transition from agriculture to meet the municipal gap, dry-up of agriculture to meet increased agricultural demand from increased efficiency, etc.)
- Present Shortage Analysis to Ark RT at a roundtable meeting

Section 4: Projects and Methods

The Arkansas BRT will process the input received during the Public Outreach initiative, then update and refine their list of consumptive and nonconsumptive IPPs and identify potential new structural and nonstructural solutions to sub-regional gaps and shortages. The section will include the minor revisions to some sections:

4.2 Watershed Health

4.4 New Multi-Purpose, Cooperative, and Regional Projects and Methods

And more significant revisions to these sections:

4.1 Education, Participation, and Outreach

4.3 Conservation and Reuse Projects and Methods

4.5 M&I Projects and Methods (i.e., projects, conservation, reuse, drought planning, etc.)

4.6 Agricultural Projects and Methods

4.7 Nonconsumptive Projects and Methods

Section 4.8 will not be modified.

4.1 Education, Participation, and Outreach

During the development of the draft Plan the Arkansas Basin Roundtable adopted an active engagement with the basin residents and held 17 public meetings. Over 100 input forms were received, along with 300+ suggestions for potential projects. This input will be sorted into sub-regions, qualified for sufficiency of information and measured against the Basin's needs and goals. Projects meeting the criteria for an IPP will be memorialized in a Project Summary Sheet.

Consultants Responsibilities

Task 4.1 – Education, Participation, and Outreach

The Consultants will review and collate the input forms, coordinate further information gathering for the BIP and oversee the completion of Project Summary Sheets by roundtable members. The Projects that qualify as IPP's will be included under each subsections list of IPP's and/or organized by sub-regions.

- Nonconsumptive Consultant will support the public outreach efforts per the allowance provided in the attached budget.
- Presentations as requested by the Ark RT Executive Committee to stakeholder groups and interested parties

4.2 Watershed Health

The Watershed Health Working Group delivered an Action Plan for the Arkansas Roundtable BIP. This Action Plan contemplates formation of an Upper Arkansas Watershed Coalition to begin organizing the dialogue on Watershed Health. The expectation is that this Coalition will begin with a nucleus of Roundtable members.

Consultants Responsibilities

Task 4.2: Critical Community Watershed Health Plans

- Present the deliverables from the Watershed Health Working Group, including the Action Plan and Summary of Tools and Processes, to interested third parties and other basin roundtables.
- Update the Draft Plan Section 4.2 to chronicle the success of the Action Plan implementation

4.3 Conservation and Reuse Projects and Methods

Consultants Responsibilities

Task 4.3 – Conservation and Reuse

The Consultants will perform the following activities to further develop the conservation and reuse section of the BIP.

- Telephonic or meeting interviews with major municipal suppliers to confirm data presented, describe activities and provide a comprehensive picture of progress on conservation goals.
- Update information on sub-regional conservation initiatives.

- The Draft BIP requires additional quantitative data for a complete understanding of the basin's conservation profile. Redraft Section 4.3.

4.4 New Multi-Purpose, Cooperative, and Regional Projects and Methods

The Draft BIP includes a summary of regional projects funded by the Arkansas BRT through the WSRA program. Sub-regions with self-funded multi-purpose projects will be contacted to obtain information for inclusion by the Consultants. This information should include cost estimates and the proportional costs that would be funded by each beneficiary of a multi-purpose project.

Consultants Responsibilities

Task 4.4 – Multi-Purpose Projects and Methods

The Consultants will review existing data and new information on planned and potential multi-purpose projects both structural and nonstructural..

- Identify and analyze multi-purpose, regional, and collaborative projects:
 - Cross check nonconsumptive, agricultural, and M&I IPPs to assist in coordination and possible integration
 - Identify costs associated with making a project multi-purpose
- Document multipurpose projects and methods not currently included in the draft BIP

Revise Section 4.4

4.5 M&I Projects and Methods

The Arkansas BRT will update its IPPs list for consumptive projects and methods.

Consultants Responsibilities:

Task 4.5: M&I Projects and Methods

The Consultants will review the input forms from the Public Outreach initiative for potential M&I projects both structural and nonstructural. Develop criteria for evaluation of projects to be considered in the Plan, including a Tiered ranking system. Review the Tiered ranking system with the Ark RT at a RT meeting, revise and provide to roundtable members.

- Organize meetings to determine additional projects and methods and alignment with disaggregated gap information
 - Regionally and topically based
 - Identify points of integration (i.e., interbasin, consumptive, and nonconsumptive)
 - Identify and discuss issues with getting IPPs completed
 - Coordinate stakeholders and project proponents
- Conceptualize projects and methods
 - Complete Project Summary Sheets for all IPP's
- Redraft Section 4.5

4.6 Agricultural Projects and Methods

The Arkansas BRT will identify agricultural water needs, supplies, and update sub-regional gaps. Develop a database of projects and describe IPP's, underway and planned, by entities not included in the current Draft BIP. Review potential projects and methods as described in the input forms from the Public Outreach initiative for inclusion in the Plan. ATMs will be included as potential projects to reduce the permanent transfer of agricultural water to other uses.

Consultants Responsibilities

Task 4.6: Agricultural Projects and Methods

The Consultants will review existing data provided by the analysis done in Section 2.2 to verify agricultural water needs, supplies, and gaps..

- Conceptualize agricultural and ATM new and planned projects and methods including cost estimates
- Identify the next steps to implement projects and methods
- Outreach to Ag sector, update irrigated lands in tributaries and sub-regions, define augmentation requirements for increasing agricultural efficiency
- Redraft Section 4.6

4.7 Nonconsumptive Projects and Methods

The Arkansas BRT will identify possible new nonconsumptive projects and methods based on the input received from the Public Outreach initiative. The lists of projects received will be qualified and evaluated for inclusion in the Plan.

Consultants Responsibilities:

Task 4.7: Nonconsumptive Projects and Methods
