RE: *Water Diplomats*

Dear Mr. Godbout:

At the January meeting of the South Platte Basin Roundtable, the members heard a WSRA proposal for an integrated effort to educate future water professionals on Colorado's Water Plan. Metro State University's "Water Diplomats" proposal was unanimously supported by the South Platte Basin Roundtable.

On behalf of the South Platte Basin Roundtable, I want to express appreciation to the Colorado Water Conservation Board for their consideration of funding from the WSRA State Fund. The South Platte Basin Roundtable was very enthused for this proposal as it reached many of the major universities within Colorado and brings together diverse perspectives and our future water leaders to learn about and spread knowledge of our tremendous water challenges.

Please call me with any questions that you may have regarding the South Platte Basin Roundtable meeting or their support for this WSRA request.

Sincerely,

Sean T. Cronin
Chair, South Platte Basin Roundtable
