### **Headwaters Corporation**

# Providing Services as Office of the Executive Director for Platte River Recovery Implementation Program

# Summary of Significant Activity for the Period August 25 to September 21, 2013

#### **Land Plan Implementation**

Land Plan management activities were focused on routine late summer maintenance activities and oversight of contractors working on activities such as weed spraying, fencing, facilities repair, and road maintenance, capitalizing on the window after MBTA and T&P restrictions and before WC restrictions. Land Plan acquisition activities were focused on multi-party holding consolidation and disposal of excess properties. Specific activities include:

Focus of real estate acquisitions for this period was:

- · Discussions for excess property disposal included on-going discussions of these tracts
  - Broadfoot-Newark property including a land swap with NGPC for a parcel land-locked by the Elm Creek Complex and sale of remaining acres
  - A series of land swaps among PRRIF, TNC, and WTC to consolidate ownership in three bridge segments
  - Sale of cropland at Johns tract in Elm Creek Complex
  - Discussions with BELF regarding acquiring lands in the Kearney to Odessa reach through a land trade of PRIFF Property (with an easement).
  - Disposal of excess property near Wood River, with associated boundary and access issues being resolved with neighboring land owners.
- Pursuit of non-complex palustrine wetland and Off-Channel Sand and Water properties.
- Advancing management agreements with neighboring properties at several complexes.

Focus of land management activities for this period was:

- Finalization of land plans as comments and input received and issues resolved.
- Compilation of all land management expenditures undertaken to create comprehensive data base of land management expenditures, unit costs, and other key information.
- Oversight of fencing contractors on several complexes.
- Coordination and oversight of contractors for weed management spraying
- Routine seasonal repair and maintenance activities for buildings, wells, and roads performed on all complexes together with specific one time projects such as siding of Plum Creek Lodge and Boat House.
- Routine and on-going discussion with neighboring land-owners in conformance with Good Neighbor Policy for all properties.
- Coordination on-going with Ducks Unlimited for replacement of check structures that occurred on John's Tract in the Elm Creek Complex from high flows in summer 2011. Permits not in hand, and must be before replacement of check structures can begin. Timetable remains highly uncertain. Likely Program will have to take on permitting if progress is to be made, providing an illustration of the importance of removing entanglements from properties at time of purchase.

- Coordination with tenants and agricultural management special advisors for on-going agricultural operations of fall harvest activities.
- Attendance and participation in LAC conference call on September 3.

#### **Water Plan Implementation**

The focus on Water activities during this period were split between activities related to Adaptive Management Plan activities (wet meadow hydrology study implementation) and maintaining momentum on on-going activities related to water Action Plan Projects. Specific activities include:

AMP oriented efforts include:

- Extensive staff time involved in implementation of a wet meadow hydrology study with focus on instrumentation installation and data collection from monitoring wells and stream gages.
   Monitoring and telemetry equipment at Binfield and Fox sites.
- Meetings on August 20<sup>th</sup> with City of North Platte and Lincoln County personnel for advancing flood-protection projects in North Platte, NE and coordination with WAC Choke Point Work Group.
- Updating HEC-RAS model to test sensitivities to new topography prior to undergoing complete revision. Assessment to occur as to path forward –i.e., in-house versus contract the model revision.
- Development of GW Models nearing completion of validation and testing for Fox and Binfield wet meadow sites.

Water Action Plan oriented efforts include:

- Development and posting of hydrologic conditions.
- Coordination with CWCB on management of HCl as long range stream flow forecasts project.
- Finalization of Off-Channel Sand and Water Augmentation recommendation and NDNR/CPNRD review coordination.
- Work on J2 Regulating Reservoir cash flow and funding scenarios.
- Attendance and participation in J2 FERC meeting in Washington, DC (September 17<sup>th</sup>) and RJH Design Consultant meeting in Englewood, CO (September 18<sup>th</sup>).
- On-going discussions with surface water right holders interested in selling water yields to
  Program. Discussions between NPPD, CNPPID, DNR, and CPNRD with the Program concerning
  such water transfers occurring. Calculation approaches to water yield vary amongst entities, with
  staff time dedicated to working with NPPD and CPNRD during this period on yield determination
  processes and development of a summary memeorandum.
- Pathfinder and Groundwater scoring methodology for recharge projects nearing completion for consideration by the scoring subcommittee of the GC, nearing completion.
- Arrangements completed amongst CNPPID, USFWS, and PRRIP for supply of 2,000 af of flood
  water into Funk Lagoon to test the concept of the use of Funk Lagoon as a fall/winter
  storage/recharge vessel with water capture by ground water pumping in the summer.

#### **Adaptive Management Plan Implementation**

Efforts during this period for AMP activities were focused on coordination of AMP and Water staff, as mentioned above, oversight of monitoring contractors, staff time expended on EDO specific T&P monitoring activities, data compilation and analysis, and implementation of the 2013 summer field activities. Specific activities include:

 Coordination with sediment augmentation consultant on data compilation, analysis, and report writing.

- Coordination with contractors and consultants in compilation and analysis for geomorphology and in-channel vegetation monitoring and water quality monitoring data collected in 2013. A significant amount of time is being expended by staff on this item in oversight of contractor activities.
- Coordination and oversight of annual whooping crane monitoring data compilation and analysis.
- Collaboration with WC Telemetry Project on-going.
- Oversight of whooping crane habitat and T&P habitat availability evaluation efforts contracted to RWBJV.
- Oversight of website and database management system development and maintenance activities.
- Compilation and analysis of T&P and Whooping Crane data on-going.
- On-going effort in advancing experimental design criteria and development of specific site design layouts plans focusing on Cottonwood Ranch, Elm Creek, Ft. Kearny, and Shoemaker Island Complexes.
- Redesign of water control structure and implementation of fix completed at Morris tract to correct inherited error in construction in order to increase wetland area footprint.
- Coordination with ISAC and staff preparation for October 1-3 meeting in Kearney, NE.

#### Outreach and Operations

- Routine daily operations associated with management and support of EDO staff, acquisition of supplies and equipment, oversight of consultant and contractor contracts and payment, maintenance of property files, coordination of meeting logistics, and general administration of Program.
- Response, through legal counsel, to FOIA request regarding geotechnical activity communications regarding J2 Regulating Reservoir.
- Attendance and Participation in Governance Committee meeting on September 10th and 11th in Kearney, NE.
- Attendance and Participation in Finance Committee meeting on September 11<sup>th</sup> in Kearney, NE.

Jerry F. Kenny, Ph.D.
