Notwithstanding anything to the contrary herein, the State, in its sole discretion, need not provide advance notice or a cure period and may immediately terminate this Grant in whole or in part if reasonably necessary to preserve public safety or to prevent immediate public crisis.

**15. REMEDIES**

If Grantee is in breach under any provision of this Grant, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Grant following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

**A. Termination for Cause and/or Breach**

If Grantee fails to perform any of its obligations hereunder with such diligence as is required to ensure its completion in accordance with the provisions of this Grant and in a timely manner, the State may notify Grantee of such non-performance in accordance with the provisions herein. If Grantee thereafter fails to promptly cure such non-performance within the cure period, the State, at its option, may terminate this entire Grant or such part of this Grant as to which there has been delay or a failure to properly perform. Exercise by the State of this right shall not be deemed a breach of its obligations hereunder. Grantee shall continue performance of this Grant to the extent not terminated, if any.

**i. Obligations and Rights**

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and sub-Grants with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are

necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or sub-Grants. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All materials owned by the State in the possession of Grantee shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

**ii. Payments**

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

**iii. Damages and Withholding**

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

**B. Early Termination in the Public Interest**

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

**i. Method and Content**

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

**ii. Obligations and Rights**

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

**iii. Payments**

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made. Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

**C. Remedies Not Involving Termination**

The State, its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

**i. Suspend Performance**

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance

with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

**ii. Withhold Payment**

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

**iii. Deny Payment**

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

**iv. Removal**

Demand removal of any of Grantee's employees, agents, or Sub-grantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

**v. Intellectual Property**

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option (a) obtain for the State or Grantee the right to use such products and services; (b) replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, (c) if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

Grantee agrees to be governed, and to abide, by the provisions of CRS §24-102-205, §24-102-206, §24-103-601, §24-103.5-101 and §24-105-102 concerning the monitoring of vendor performance on state Grants and inclusion of Grant performance information in a statewide Grant management system.

Grantee's performance shall be subject to Evaluation and Review in accordance with the terms and conditions of this Grant, State law, including CRS §24-103.5-101, and State Fiscal Rules, Policies and Guidance. Evaluation and Review of Grantee's performance shall be part of the normal Grant administration process and Grantee's performance will be systematically recorded in the statewide Grant Management System. Areas of Evaluation and Review shall include, but shall not be limited to quality, cost and timeliness. Collection of information relevant to the performance of Grantee's obligations under this Grant shall be determined by the specific requirements of such obligations and shall include factors tailored to match the requirements of Grantee's obligations. Such performance information shall be entered into the statewide Grant Management System at intervals established herein and a final Evaluation, Review and Rating shall be rendered within 30 days of the end of the Grant term. Grantee shall be notified following each performance Evaluation and Review, and shall address or correct any identified problem in a timely manner and maintain work progress.

Should the final performance Evaluation and Review determine that Grantee demonstrated a gross failure to meet the performance measures established hereunder, the Executive Director of the Colorado Department of Personnel and Administration (Executive Director), upon request by the CWCB, and showing of good cause, may debar Grantee and prohibit Grantee from bidding on future Grants. Grantee may contest the final Evaluation, Review and Rating by: **(a)** filing rebuttal statements, which may result in either removal or correction of the evaluation (CRS §24-105-102(6)), or **(b)** under CRS §24-105-102(6), exercising the debarment protest and appeal rights provided in CRS §§24-109-106, 107, 201 or 202, which may result in the reversal of the debarment and reinstatement of Grantee, by the Executive Director, upon showing of good cause.

## **Exhibit A: Scope of Services, Budget, Schedule**

### ***Overview***

The following scope of services, budget, and schedule details the necessary tasks to assist Jackson County Water Conservancy District (JCWCD) with the development of a basin-wide augmentation plan. Efforts summarized in this scope will:

- Quantify augmentation needs;
- Identify potential augmentation supplies;
- Address potential concerns of water users in the basin;
- Develop an accounting framework for Jackson County Water Conservancy District (JCWCD) and reporting to the Division of Water Resources;
- Prepare various analyses and materials to assist with the application, finalization, and operation of an augmentation plan acceptable to the JCWCD Board.

Tasks 1 through 3 will provide the necessary technical information for JCWCD to determine whether to move forward with developing an augmentation plan. After the completion of these tasks, the Consultant will meet with JCWCD to discuss findings and provide a recommendation on how to move forward with the remaining tasks. Tasks 4 through 10 will not be initiated until the decision to pursue an augmentation plan has been made and written authorization from JCWCD is given.

### ***Task 1: Identify Augmentation Needs***

This task will define the amount, location, and timing of augmentation supplies required for the plan. Potential water demands were identified in the North Platte Basin Implementation Plan (NPBIP) and previous studies. Additionally, recent requests to the Division 6 Office and JCWCD for augmentation water in the basin will be considered. The amount of augmentation required to meet projected demands and the likely locations within the basin where those needs will occur will be refined. The Consultant, JCWCD, and potentially legal counsel will meet to discuss projections and strategies for adding supplies after plan approval. In addition, we will also discuss the option of filing an augmentation plan covering geographic areas of the basin for which supplies may be more available and adding additional supplies/areas in the future. The amount of augmentation supplies may also be refined based on actual supplies identified in Task 3. The results of Task 1 will be documented in a technical memorandum.

### ***Task 2: Identify and Quantify Augmentation Supplies***

To augment depletions throughout the entire basin, it is important to develop augmentation supplies in each of the tributary sub-basins where potential augmentation needs have been identified. To assure that augmentation supplies are available for the likely year-round uses, storage will be required. The Consultant will work with JCWCD to identify potential supplies. It is anticipated that existing

reservoirs in the basin will be investigated based on three questions.

1. What geographic area could be covered by augmentation from each reservoir based on the location of calling rights? This will include investigation into potential exchanges to augment upstream or other tributary needs.
2. Is water physically and legally available at the reservoir location under a junior water right? If not, is there a potential to purchase and change a portion of the senior storage right for augmentation use? (Note: changes in use, if necessary, would add a new use type for augmentation while maintaining all existing uses and seniority)
3. Can the reservoir operations be revised to include storage and release of junior augmentation water without injuring historical reservoir users?

The reservoirs investigated may include Big Creek, Boettcher, Carlstrom, Clayton, MacFarlane, Mexican, Slack & Weiss, Walden, Lake John and Lake John Annex, Seymour, Pole Mountain, Hecla, West Arapahoe, and Meadow Creek. In addition, investigation into the potential use of smaller ponds or new recharge areas may be required for several rivers and tributaries including the Illinois, Little Grizzly, Canadian, Government, Pinkham, and Rock Creek. The number and location of investigations will be driven by the likely areas identified in Task 1 as needing augmentation water. As noted in Task 1, the JCWCD and Consultant will consider the pros and cons of the plan's initial coverage and the potential for adding additional augmentation sources/areas at a later date.

The budget is based on the identification, quantification, and operations of six different supplies, but can be revised if greater or fewer supplies are included. Because the likely augmentation sources will need to supply water outside the irrigation season, a change of a senior direct flow water right is not anticipated as part of this scope. If this assumption changes during the analysis, the Consultant will determine if the additional effort to quantify historical consumptive use can be undertaken within the defined budget or, if not, the Consultant will provide an additional budget amount for JCWCD's consideration. (Note that changing a portion of an existing storage right should not require investigation into historical use of the storage right; just an analysis showing the water has been available and has been stored in priority. If necessary, a change of use would add a new use type for augmentation while maintaining all exiting uses and seniority.)

The Consultant will use the surface water rights allocation model and associated hydrology previously developed to represent the North Platte basin to determine water available for junior storage rights and exchange potential. The hydrology will be the basis for the further analyses of reservoir operations to determine if a junior storage right can be relied upon without injuring existing storage uses. A spreadsheet model will be developed for each reservoir showing how potential changes in operations and accounting can allow junior storage without impacting the yield to senior users. The Consultant will document potential issues and risks associated with changing a portion of an existing storage right.

The results of Task 3 will be documented in a technical memorandum.

***Task 3: Identify and Address Potential Water User Concerns***

During the identification and quantification of augmentation supplies, the Consultant will work with JCWCD to identify potential water user concerns about a basin-wide augmentation plan. Identifying and addressing issues prior to applying for an augmentation plan will save engineering and legal costs and build basin consensus for the plan. Based on these discussions, the likely level of effort and estimated legal and engineering fees to secure a decree for the basin-wide augmentation plan can be reviewed; providing the board of JCWCD with the information they need to make an informed decision on whether to move forward with filing for the augmentation plan.

Consultant will provide consideration for the Equitable Apportionment Decree and Three States Cooperative Agreement during the development of augmentation supplies and augmentation plan operations in preparation for discussions with basin water users. The augmentation plan application will include these considerations and clearly indicate that the plan is in compliance.

The budget anticipates that up to six meetings will take place with water users to address their potential concerns. At least one of those meetings is expected to be a more public discussion with irrigation water rights holders in the basin. Other meetings will may include the Division Engineer, Colorado Water Conservation Board (Interstate and Federal Section and potentially Stream and Lake Protection Section), Colorado Parks and Wildlife, City of Ft. Collins, U.S. Bureau of Land Management, and U.S. Fish and Wildlife Service. The Consultant will likely participate in each of these meetings, ideally with JCWCD Board representation and potentially legal counsel. It is anticipated that pre-meeting and post-meeting phone calls will be required to facilitate understanding of the issues. It is expected that several of the meetings will need to be held in person; however when possible to save costs, meetings will take place via conference call or using GoToMeeting software capabilities.

Following each meeting, the Consultant will prepare a memorandum describing the issues and potential resolutions, and share the memoranda with JCWCD and the meeting participants. This will help assure that any concerns and potential resolutions are clearly understood by all parties. The Consultant will likely have two staff members attend each meeting to facilitate note taking and assure that all issues are properly documented.

***Task 4: Present Augmentation Plan Recommendations***

The information developed in Tasks 1 through 3 will provide the JCWCD Board with the necessary technical information to determine whether to move forward with developing an augmentation plan. The Consultant will meet with the JCWCD Board to present the results of Task 1 through 3 and provide a recommendation as to whether the project should move forward. It is anticipated that JCWCD and

potentially legal counsel will review the task results, current augmentation plan framework, and potential approach to operating the augmentation plan, and provide a decision on whether to pursue the plan. Tasks 5 through 10 will not be initiated until the decision to pursue an augmentation plan has been made and written authorization from JCWCD is given.

***Task 5: Develop Process to Determine Augmentation Depletions***

It is expected that JCWCD will be the administrators of the basin-wide augmentation plan. As such, they will need to provide expectations and guidance for augmentation plan applicants on how to estimate depletions. The development of a process upfront will allow JCWCD to quickly review applicants' depletion estimates with a consistent process. The Consultant will rely on standard methods used in previous augmentations plans for this task.

The depletive amount and timing of depletions to the river greatly affect the amount of augmentation supplies requested from the plan. In this task, Consultant will develop and document a process for determining the augmentation depletions, including but not limited to, guidance on:

- Appropriate domestic consumptive use rates associated with different sewage/septic systems
- Methodology to develop irrigation consumptive use, for residential irrigation
- Methodology to estimate pond evaporation
- Acceptable livestock consumptive use rates
- Various commercial/industrial consumptive use rates, including oil and gas development

In addition, the Consultant will outline the depletion accounting that the users will provide summarizing their actual depletions and estimate of future depletions. Actual depletion accounting information will be incorporated directly into the augmentation plan accounting, and the future depletion estimate will allow JCWCD to project future uses for the augmentation plan operations.

***Task 6: Augmentation Plan Accounting***

The State Engineer's Office has general requirements for augmentation plan accounting. Consultant will work with the Division 6 staff to understand these requirements, and develop an accounting form that is simple for the JCWCD to complete and meets the SEO requirements. Working closely with the SEO from the onset of the project will allow the engineer to address any concerns prior to filing the augmentation plan, thus reducing costs to JCWCD. Augmentation plan accounting may include:

- Augmentation plan users
- Amount, timing, and location of depletions
- Amount, timing and location of supplies
- Diversion coding of supplies
- Tracking of remaining supplies

- Monthly or annual summary forms for the SEO office

***Task 7: Contractual Obligations to Enter and Exit the Plan***

The Consultant will assist with the development of procedures for users to contract for augmentation under the plan and exit from the plan when augmentation sources are no longer required. This procedure may include:

- Application/contract for entry into the augmentation plan
- Cost structure and/or marketing plan
- Public notification requirements
- Submission of required information to the State Engineer's Office
- Extent of augmentation plan responsibility for depletions after a user has exited the plan

It is anticipated that there will be close coordination with JCWCD and potentially legal counsel on the development of these contractual documents so that the District understands its responsibilities and contractual requirements of the plan.

***Task 8: Prepare Engineering Report***

Consultant will use the information developed in the previous tasks to prepare a final Engineering Report. Budget for this task is relatively small as much of the effort has already been completed in previous tasks. It is anticipated that this task will focus on the refinement and presentation of information and compilation into an Engineering Report format. The finalized Engineering Report will be delivered to JCWCD.

***Task 9: Ongoing Support for Plan Development and Finalization***

The Consultant will assist with various analyses and materials related to the application, finalization, and operation of the augmentation plan. This could include efforts related to a Substitute Water Supply Plan (SWSP), ongoing interaction with basin water users, and the review of pertinent new technical information.

***Task 10: JCWCD Administration, Oversight, and Coordination***

JCWCD will serve as the fiscal agent and administrator of this grant, responsible for all oversight and coordination. JCWCD will perform several tasks associated with the administration of the project budget and schedule; application of the Colorado Water Conservation Board (CWCB) Water Supply Reserve Account (WSRA) grant; and review, approval, submittal of invoices for payment.
