Summary of Mutual Ditch/Spillway Completion

Jordan Concrete completed the structure on October 12, 2015, along with Sessions and Sons who did the dirt work. The structure was moved down the ditch approximately 4,900 feet from existing structure. The existing structure had many issues with it and was built in 1949, which was in poor condition.

This new structure will last for many generations to come.

Respectfully,

Greg Ray

A handwritten signature in cursive script that reads "Greg Ray". The signature is written in dark ink and is positioned below the printed name "Greg Ray".
