To Joe Busto (CWCB)

Joe this is to inform you that Idaho Power performed the tasks involved with the setup, training and deployment of the 2 seeders we are purchasing from them regarding the following PO numbers: POGG1 PDAA 2016-358 & POGG1 PDAA 2016-357. ✓

PO # 2016-355 was installed on the south side of the Grand Mesa near Cedaredge CO on September 17, 2016. Setup, training, and operation of seeder took place on this day. We would like the CWCB to send the funds for this PO \$29,126.00 to the WEA asap so we can then with the amount from the Gunnison BRT \$25,000 send a check to Idaho Power in the amount of \$54,126.00 thus paying off this purchase allowing us to own and operate the seeder for the year of 15-16.

PO # 2016-357 was installed on the north side of the Grand Mesa on Bald Mountain near Mesa CO on September 16, 2016. Setup, training, and operation of seeder took place on this day. We would like the CWCB to send the funds for this PO \$29,126.00 to the WEA asap so we can then with the amount from the Colorado BRT \$25,000 send a check to Idaho Power in the amount of \$54,126.00 thus paying off this purchase allowing us to own and operate the seeder for the year of 15-16.

Both of these seeders have been professionally built and installed. The WEA personnel are much appreciative to the two round tables for their support along with your help from the CWCB. We are also grateful to Idaho Power for their willingness to work with us in the setup and purchase of these two seeders.
