The institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Grantee, or the appointment of a receiver or similar officer for Grantee or any of its property, which is not vacated or fully stayed within 20 days after the institution or occurrence thereof, shall also constitute a breach.

If such breach is not cured within 30 days of receipt of written notice, or if a cure cannot be completed within 30 days, or if cure of the breach has not begun within 30 days and pursued with due diligence, the State may exercise any of the remedies set forth in §15. Notwithstanding anything to the contrary herein, the State, in its sole discretion, need not provide advance notice or a cure period and may immediately terminate this Grant in whole or in part if reasonably necessary to preserve public safety or to prevent immediate public crisis.

15. REMEDIES

If Grantee is in breach under any provision of this Grant, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Grant following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

A. Termination for Cause and/or Breach

If Grantee fails to perform any of its obligations hereunder with such diligence as is required to ensure its completion in accordance with the provisions of this Grant and in a timely manner, the State may notify Grantee of such non-performance in accordance with the provisions herein. If Grantee thereafter fails to promptly cure such non-performance within the cure period, the State, at its option, may terminate this entire Grant or such part of this Grant as to which there has been delay or a failure to properly perform. Exercise by the State of this right shall not be deemed a breach of its obligations hereunder. Grantee shall continue performance of this Grant to the extent not terminated, if any.

i. Obligations and Rights

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and sub-Grants with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are

necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or sub-Grants. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

ii. Payments

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

iii. Damages and Withholding

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

ii. Obligations and Rights

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

iii. Payments

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made. Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

C. Remedies Not Involving Termination

The State, its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance

with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

ii. Withhold Payment

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Demand removal of any of Grantee's employees, agents, or Sub-grantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

v. Intellectual Property

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option (a) obtain for the State or Grantee the right to use such products and services; (b) replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, (c) if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

WATER ACTIVITY NAME – Hess Lateral Improvement Project

GRANT RECIPIENT – Florida Consolidated Ditch Company

FUNDING SOURCES – Colorado Department of Transportation (38%), CWCB Water Supply Reserve Account, Basin and Statewide Accounts (31%), and Florida Consolidated Ditch Company through debt service on CWCB Water Project Loan (31%).

INTRODUCTION AND BACKGROUND

The Hess Lateral, part of the FCDC water conveyance system, is located 7 miles south of Durango, CO on the Florida Mesa, within the Florida Water Conservancy District. The Hess Lateral serves approximately 75 water users irrigating over 1,500 acres of primarily hay and pasture lands. The Hess Lateral is a 3.3 mile-long open ditch that delivers up to 17.5 cfs of irrigation water.

This project entails replacing the Hess Lateral ditch with buried irrigation pipeline. This will reduce seepage losses and will provide pressurized water to existing sprinkler systems on the Lateral. The pressurized pipeline will eliminate most of the energy currently used for pumping and will provide the opportunity for pressurized systems to be installed on fields that are currently flood irrigated, reducing salt leaching and further increasing water efficiency.

The Colorado Department of Transportation (CDOT) plans on expanding Colorado Highway 550 in the near future. This expansion requires relocating approximately 10,000 feet of the Hess Lateral. CDOT is cooperating with the FCDC on the relocation. Funding is requested to leverage CDOT's participation and encase the full 3.3 mile-long open ditch in pressurized pipe.

OBJECTIVES

The purposes of this project are to 1) improve the efficiency of the canal conveyance system and reduce ditch water loss by seepage and evaporation, 2) provide irrigation water at reduced operational expense to promote continued commercial agricultural uses, 3) firm the agricultural water supplies through increased efficiency as opposed to developing additional water supplies (i.e. enlarging Lemon Reservoir), 4) apply water savings to other beneficial uses in the basin, and 5) increase water quality by reducing the salt load into the Animas River.

Issues/Additional Needs: Two issues need addressing regarding this grant. The first being the applicant's intent to phase the project and funding; the second concerns easements and right-of-ways. The applicant intends to pursue this effort in a phased approach. Task 1 will provide the necessary technical information to determine whether to move forward with the project. After completion of this task, the Company will decide whether or not it will proceed with Task 2 and 3. Task 2 and 3 will not be initiated until the Company secures a CWCB loan or funding from another acceptable source. The CWCB Board approved this grant request subject to CDOT acquiring the necessary right-of-ways and easements required to complete the project.

TASKS

Provide a detailed description of each task using the following format

TASK 1 – Preliminary Engineering Report and CWCB Loan Feasibility Study

Description of Task

- Project kick-off meeting with FCDC, CDOT, and consultants to review constraints and considerations, including site visit for ditch observation and preliminary discussion of alternatives considered previously.
- Field surveying of key areas along the Hess Lateral, such as intakes, turnouts, wasteways, measurement devices, and points of delivery to identify fixed constraints for alternative analysis.
- Develop list of alternatives based on kick-off meeting and preliminary field investigation results. Alternatives will include “no action,” fully encase the Hess lateral in a pipe, and others to be developed under this task.
- Analyze alternatives based on outputs/yields, costs, impacts, economic feasibility, institutional requirements, and special considerations. Prepare summaries of the evaluation and summary of the alternatives weightings or rankings. This task may include field investigations for geologic and geotechnical conditions as well as review of possible Section 404 of the Clean Water Act considerations of the alternatives.
- Prepare a detailed description of the selected alternative, which may include preliminary plans and profiles with hydraulic gradelines; conceptual layouts and cross sections; and preliminary connection concepts for typical existing turnouts. The report is anticipated to include impact identification, mitigation concepts, and review and analysis of institutional considerations and feasibility. Other items which will be included in the report include an opinion of probable capital costs, financial feasibility analysis, and land requirements.
- Conduct stakeholder meeting to solicit and invite public comment and input from Hess lateral users and general public.
- Complete Loan feasibility study per CWCB Water Project Loan Program Guidelines document.

Method/Procedure

- Schedule a full day in-person workshop with project team.
- Field methods to be determined by professional land surveyor, likely GPS due to the distance to be covered. Surveying will be in areas outside of the areas surveyed for the 10,000 feet section of ditch included in the CDOT Highway 550 expansion project.
- Alternatives will be developed based on field constraints and limitations, and consultation with the project team.
- The alternatives analysis will compare both short term and long term benefits and disadvantages of the alternatives based on the factors described and provide a numeric ranking of each alternative.

- The Preliminary Engineering Report will be completed based on civil engineering principals for flow analysis, preliminary design, and financial analysis/ net present worth analysis of the proposed alternative.
- Conduct public stakeholder meeting(s) in accordance with FCDC public meeting and board meeting requirements.
- Gather and compile information required to produce loan feasibility study components such as water rights information and financial documents, and incorporate alternatives analysis and selective alternative deliverables as detailed above.

Deliverables

- Kickoff meeting minutes and bullet point summary table.
- Hardcopy and electronic copy of survey from preliminary field investigation.
- List and description of alternatives, which will be included with the Loan Feasibility Study
- A written and graphic summary of the alternatives to be included with the CWCB Loan Feasibility Study.
- A written and graphic report of the preliminary engineering for the selected alternative to be included with the CWCB Loan Feasibility Study.
- Agenda, meeting minutes, and sign-in sheet information from the stakeholder meeting will be prepared and distributed per the FCDC requirements.
- CWCB Water Project Loan Program application and Loan Feasibility Study submitted to CWCB for consideration and approval.

TASK 2 – Final Engineering Design

Description of Task

Complete engineering design of selected alternative. Preparation of project plans and specifications.

Method/Procedure

The task will be performed based on civil engineering principals for final design.

Deliverable

Final, stamped design drawings to be used to solicit construction bids.

TASK 3 – Final Permitting, Project Construction and Engineering Services During Construction

Description of Task

- Final permitting includes permits to be obtained by the contractor (e.g. dewatering, stormwater management, traffic control, etc.) and permits to be obtained based on final design details (e.g. grading).

- Construction includes mobilization/demobilization, furnishing and installing project infrastructure, service line tie-ins, all associated earthwork and all associated stormwater and environmental mitigation.
- Engineering services will be provided during the bidding, pre-construction, and active construction phases of the project, including contractor bidding process, preparation of final environmental permitting, construction observation, progress meetings, contractor submittal review, pay application review, review of change orders and preparation of progress and final reports.

Method/Procedure

The timing and method of project construction (e.g. phased over time, multiple contractors, etc.) will be determined through the bid solicitation process. Construction will be in accordance with applicable laws, regulations and pipeline construction best practices.

Deliverables

- Set of final construction drawings indicated as “Record Drawings” in digital (AutoCAD) and printed version.
- Permits as required, contract documents, assorted project documentation, project progress and final reports.

REPORTING AND FINAL DELIVERABLE

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the statement of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.
