GC Notes – June 14 & 15, 2011

John Lawson – Water update – Moving and predicted to move the most water in the history of the BOR system.

WC Telemetry – We are not going to contract with crane trust directly, but we will become a partner and will give \$150K to USGS.

Pathfinder – approved with minor amendments

FWS = Pre-1997 land that is already in conservation by NGOs will not count (unless good reason) toward 1st increment goals, but will count toward the larger 29K target.

Land - Proceed with appraisal of and negotiations of tracts 1101 and 1002, authorization to do land trade with boundary issue.

Create a workgroup to look at appraisals of land considered for water related projects using J-2 rereg as an example.
