

## COLORADO WATER CONSERVATION BOARD

# WATER SUPPLY RESERVE ACCOUNT **APPLICATION FORM**

page 10

page 12

**Today's Date: 11-30-15** 

Name of Water Activity/Project	
Town of Mancos	
Name of Applicant  Amount from Statewide Account:	
Southwest Basin Roundtable	
Amount from Basin Account(s): \$81,765.00	
Approving Basin Roundtable(s) (If multiple basins specify amounts in parentheses.)	
FEIN: 84-6000691 Application Content	
Application Instructions page 2 Part I – Description of the Applicant page 3 Part II – Description of the Water Activity page 5	
Part III – Threshold and Evaluation Criteria page 7 Part IV – Required Supporting Material Water Rights, Availability, and Sustainability page 10	

# **Required Exhibits**

- A. Statement of Work, Budget, and Schedule
- B. Project Map
- C. As needed (i.e. letters of support, photos, maps, etc.)

## **Appendices – Reference Material**

1. Program Information

**Related Studies** 

Signature Page

- 2. Insurance Requirements
- 3. WSRA Standard Contract Information (Required for Projects Over \$100,000)
- 4. W-9 Form (Required for All Projects Prior to Contracting)

#### **Instructions**

To receive funding from the Water Supply Reserve Account (WSRA), a proposed water activity must be approved by the local Basin Roundtable **AND** the Colorado Water Conservation Board (CWCB). The process for Basin Roundtable consideration and approval is outlined in materials in Appendix 1.

Once approved by the local Basin Roundtable, the applicant should submit this application with a detailed statement of work including budget and schedule as Exhibit A to CWCB staff by the application deadline.

WSRA applications are due with the roundtable letter of support 60 calendar days prior to the bimonthly Board meeting at which it will be considered. Board meetings are held in January, March, May, July, September, and November. Meeting details, including scheduled dates, agendas, etc. are posted on the CWCB website at: <a href="http://cwcb.state.co.us">http://cwcb.state.co.us</a> Applications to the WSRA Basin Account are considered at every board meeting, while applications to the WSRA Statewide Account are only considered at the March and September board meetings.

When completing this application, the applicant should refer to the WSRA Criteria and Guidelines available at: <a href="http://cwcb.state.co.us/LoansGrants/water-supply-reserve-account-grants/Documents/WSRACriteriaGuidelines.pdf">http://cwcb.state.co.us/LoansGrants/water-supply-reserve-account-grants/Documents/WSRACriteriaGuidelines.pdf</a>. In addition, the applicant should also refer to the <a href="https://www.supplemental.google

The application, statement of work, budget, and schedule **must be submitted in electronic format** (Microsoft Word or text-enabled PDF are preferred) and can be emailed or mailed on a disk to:

Craig Godbout - WSRA Application Colorado Water Conservation Board 1313 Sherman St., Room 721 Denver, CO 80203 Craig.godbout@state.co.us

If you have questions or need additional assistance, please contact Craig Godbout at: 303-866-3441 x3210 or <a href="mailto:craig.godbout@state.co.us">craig.godbout@state.co.us</a>.

# Water Supply Reserve Account – Application Form Revised October 2013

Part I Description of the Applicant (Project Sponsor or Owner);						
1.	Applicant Name(s):	Town of Mancos				
	Mailing address:	P.O. Box 487 Mancos, CO 81328				
	FEIN #:	84-6000691				
	Primary Contact:	Heather Alvarez	Position/Title:	Town Clerk/Treasurer		
	Email:	halvarez@mancoscolorado.com				
	Phone Numbers:	Cell:	Office:	(970) 533-7725		
	Alternate Contact:	Robin Schmittel	Position/Title:	Public Works Director		
	Email:	rschmittel@mancoscolorado.com				
	Phone Numbers:	Cell:	Office:	(970) 533-7725		
2. Eligible entities for WSRA funds include the following. What type of entity is the Applicant?  Public (Government) – municipalities, enterprises, counties, and State of Colorado agencies. Federal agencies are encouraged to work with local entities and the local entity should be the grant recipient. Federal agencies are eligible, but only if they can make a compelling case for why a local partner cannot be the grant recipient.						
	Public (Districts) – authorities, Title 32/special districts, (conservancy, conservation, and irrigation districts), and water activity enterprises.					
	Private Incorporated – mutual ditch companies, homeowners associations, corporations.					
	Private individuals, partnerships, and sole proprietors are eligible for funding from the Basin Accounts but not for funding from the Statewide Account.					
	Non-governmental organizations – broadly defined as any organization that is not part of the government.					

Revised October 2013

3. Provide a brief description of your organization

The Town of Mancos is a statutory Town located in the southwest corner of Colorado. We were incorporated in 1894. Our population as of the 2010 census is 1,336 within Town limits and approximately 3,000 citizens in the Mancos Valley. The Town serves customers both inside and outside the municipal limits.

4. If the Contracting Entity is different then the Applicant (Project Sponsor or Owner) please describe the Contracting Entity here.

N/A

5.	Successful applicants will have to execute a contract with the CWCB prior to beginning work on the portion of the project funded by the WSRA grant. In order to expedite the contracting process the CWCB has established a standard contract with provisions the applicant must adhere to. A link to this standard contract is included in Appendix 3. Please review this contract and check the appropriate box.
	The Applicant will be able to contract with the CWCB using the Standard Contract
	The Applicant has reviewed the standard contract and has some questions/issues/concerns.  Please be aware that any deviation from the standard contract could result in a significant delay between grant approval and the funds being available.

6. The Tax Payer Bill of Rights (TABOR) may limit the amount of grant money an entity can receive. Please describe any relevant TABOR issues that may affect the applicant.

TABOR does not apply to this project because the project and funds will be handled through the Town's Enterprise Fund.

# Water Supply Reserve Account – Application Form Revised October 2013

Part II Description of the Water Activity/Project						
1. V	1. What is the primary purpose of this grant application? (Please check only one)					
		Nonconsumptive (Environmental or Recreational)				
		Agricultural				
	X	Municipal/Industrial				
		Needs Assessment				
		Education				
		Other Explain:				
2. I	f you feel tl	his project addresses multiple purposes please explain.				
2 1	e this proje	ct primarily a study or implementation of a water activity/project? (Please check only one)				
3. 1						
		Study X Implementation				
4. ]	To catalog r	measurable results achieved with WSRA funds can you provide any of the following numbers?				
		New Storage Created (acre-feet)				
	New Annual Water Supplies Developed, Consumptive or Nonconsumptive (acre-feet)					
	Existing Storage Preserved or Enhanced (acre-feet)					
		Length of Stream Restored or Protected (linear feet)				
1	890 Length of Pipe/Canal Built or Improved (linear feet)					
		Efficiency Savings (acre-feet/year OR dollars/year – <b>circle one</b> )				
		Area of Restored or Preserved Habitat (acres)				

Other -- Explain:

**Revised October 2013** 

4. To help us map WSRA projects please include a map (Exhibit B) and provide the general coordinates below:

Latitude: 37.374062N Longitude: 108.256239W

5. Please provide an overview/summary of the proposed water activity (no more than one page). Include a description of the overall water activity and specifically what the WSRA funding will be used for. A full **Statement of Work** with a detailed budget and schedule is required as **Exhibit A** of this application.

The proposed project is the "Mancos Water Projects" with three components located in or near the Town of Mancos (see Exhibit B for more information on locations). The improvements that have been identified specifically for this grant request is are identified as Raw Water Intake System Improvements. For information purposes, the other components of the Mancos Water Projects are replacement of the Town's Main pressure reducing valve (PRV) and vault, and replacement of an older section of the Town's water distribution system.

The Raw Water Intake System Improvements is the focus of this grant application from the Colorado Water Conservation Board. The Town has been dealing with extensive water leakage at the raw water intake system on the West Mancos River that feeds the town's water treatment plant. The current system has limited means to measure and control water from the River, into the settling ponds, then into the raw water transmission going to the water treatment plant (WTP). Additionally, the pipes conveying water to and from the ponds are subject to debris blockage. The result is that water is spilling and being wasted onto the ground.

There are very limited records on the town water system including the raw water intake system. Based upon what was found the raw water intake system and PRV was last worked on in 1960. The proposed improvements will renovate the existing system in a very cost effective manner. Components of the intake system improvements are elaborated in Exhibit A. Goals of the project are to:

- 1. Provide accurate water flow measurement allowing the operator to better manage water coming from the River.
- 2. Provide return pipes back to the river to keep water off the ground.
- 3. Prevent debris from blocking piping using decant devices.

The WSRA funding in addition to Southwest Water Conservation Funds will be used for design and construction of the Raw Water Intake System Improvements. The replacement of the PRV/Vault and older portions of the distribution system are proposed to be funded with a matching DOLA grant and Town Water Funds. The Town will provide funding through water rate increases implemented based upon a "Recommended Water Rate Structure Study" conducted in 2014 (see appendices).

**Revised October 2013** 

#### Part III. - Threshold and Evaluation Criteria

- 1. <u>Describe how</u> the water activity meets these **Threshold Criteria.** (Detailed in Part 3 of the Water Supply Reserve Account Criteria and Guidelines.)
- a) The water activity is consistent with Section 37-75-102 Colorado Revised Statutes.<sup>1</sup>

Because the project does not include an increase in water right demand above existing water rights utilized by the Town, it is compliant with Section 37-75-102 of the Colorado Revised Statutes. The intent of the project is to reduce water loss through replacement of leaking facilities in the system. No new water rights are required as a result.

b) The water activity underwent an evaluation and approval process and was approved by the Basin Roundtable (BRT) and the application includes a description of the results of the BRTs evaluation and approval of the activity. At a minimum, the description must include the level of agreement reached by the roundtable, including any minority opinion(s) if there was not general agreement for the activity. The description must also include reasons why general agreement was not reached (if it was not), including who opposed the activity and why they opposed it. **Note- If this information is included in the letter from the roundtable chair simply reference that letter.** 

Please see letter from Michael Preston, Chair, of the Southwest Basin Roundtable to Craig Godbout, Dated October 20, 2015 recommending funding of \$81,765 by a quorum of Roundtable Members at the October 14, 2015 meeting.

<sup>&</sup>lt;sup>1</sup> 37-75-102. Water rights - protections. (1) It is the policy of the General Assembly that the current system of allocating water within Colorado shall not be superseded, abrogated, or otherwise impaired by this article. Nothing in this article shall be interpreted to repeal or in any manner amend the existing water rights adjudication system. The General Assembly affirms the state constitution's recognition of water rights as a private usufructuary property right, and this article is not intended to restrict the ability of the holder of a water right to use or to dispose of that water right in any manner permitted under Colorado law. (2) The General Assembly affirms the protections for contractual and property rights recognized by the contract and takings protections under the state constitution and related statutes. This article shall not be implemented in any way that would diminish, impair, or cause injury to any property or contractual right created by intergovernmental agreements, contracts, stipulations among parties to water cases, terms and conditions in water decrees, or any other similar document related to the allocation or use of water. This article shall not be construed to supersede, abrogate, or cause injury to vested water rights or decreed conditional water rights. The General Assembly affirms that this article does not impair, limit, or otherwise affect the rights of persons or entities to enter into agreements, contracts, or memoranda of understanding with other persons or entities relating to the appropriation, movement, or use of water under other provisions of law.

c) The water activity meets the provisions of Section 37-75-104(2), Colorado Revised Statutes.<sup>2</sup> The Basin Roundtable Chairs shall include in their approval letters for particular WSRA grant applications a description of how the water activity will assist in meeting the water supply needs identified in the basin roundtable's consumptive and/or non-consumptive needs assessments.

In reducing leakage from <u>Raw Water Intake System Improvement</u> conveyance structures, as well as in the water distribution system and a pressure reducing vault, this project will reduce water loss in all three areas of the project.

d) Matching Requirement: For requests from the **Statewide Fund**, the applicants will be required to demonstrate a **25 percent** (or greater) match of the total grant request from the other sources, including by not limited to Basin Funds. A minimum match of 5% of the total grant amount shall be from Basin funds. A minimum match of 5% of the total grant amount must come from the applicant or 3rd party sources. Sources of matching funds include but are not limited to Basin Funds, in-kind services, funding from other sources, and/or direct cash match. Past expenditures directly related to the project may be considered as matching funds if the expenditures occurred within 9 months of the date the contract or purchase order between the applicant and the State of Colorado is executed. Please describe the source(s) of matching funds. (NOTE: These matching funds should also be reflected in your Detailed Budget in **Exhibit A** of this application)

## The Town of Mancos is not seeking statewide funds for this project.

2. For Applications that include a request for funds from the **Statewide Account**, <u>describe how</u> the water activity/project meets all applicable **Evaluation Criteria**. (Detailed in Part 3 of the Water Supply Reserve Account Criteria and Guidelines and repeated below.) Projects will be assessed on how well they meet the Evaluation Criteria. **Please attach additional pages as necessary.** 

#### The Town of Mancos is not seeking statewide funds for this project.

**Evaluation Criteria** – The following criteria will be utilized to further evaluate the merits of the water activity proposed for funding from the Statewide Account. In evaluation of proposed water activities, preference will be given to projects that meet one or more criteria from each of the three "tiers" or categories. Each "tier" is grouped in level of importance. For instance, projects that meet Tier 1 criteria will outweigh projects that only meet Tier 3 criteria. The applicant should also refer to the Supplemental Scoring Matrix applied to Evaluation Criteria Tiers 1-3 for Statewide Account requests. WSRA grant requests for projects that may qualify for loans through the CWCB loan program will receive preference in the Statewide

\_

<sup>&</sup>lt;sup>2</sup> 37-75-104 (2)(c). Using data and information from the Statewide Water Supply Initiative and other appropriate sources and in cooperation with the on-going Statewide Water Supply Initiative, develop a basin-wide consumptive and nonconsumptive water supply needs assessment, conduct an analysis of available unappropriated waters within the basin, and propose projects or methods, both structural and nonstructural, for meeting those needs and utilizing those unappropriated waters where appropriate. Basin Roundtables shall actively seek the input and advice of affected local governments, water providers, and other interested stakeholders and persons in establishing its needs assessment, and shall propose projects or methods for meeting those needs. Recommendations from this assessment shall be forwarded to the Interbasin Compact Committee and other basin roundtables for analysis and consideration after the General Assembly has approved the Interbasin Compact Charter.

Revised October 2013

Evaluation Criteria if the grant request is part of a CWCB loan/WSRA grant package. For these CWCB loan/WSRA grant packages, the applicant must have a CWCB loan/WSRA grant ratio of 1:1 or higher. Preference will be given to those with a higher loan/grant ratio.

# <u>Tier 1: Promoting Collaboration/Cooperation and Meeting Water Management Goals and Identified Water Needs</u>

- a. The water activity addresses multiple needs or issues, including consumptive and/or non-consumptive needs, or the needs and issues of multiple interests or multiple basins. This can be demonstrated by obtaining letters of support from other basin roundtables (in addition to an approval letter from the sponsoring basin).
- b. The number and types of entities represented in the application and the degree to which the activity will promote cooperation and collaboration among traditional consumptive water interests and/or non-consumptive interests, and if applicable, the degree to which the water activity is effective in addressing intrabasin or interbasin needs or issues.
- c. The water activity helps implement projects and processes identified as helping meet Colorado's future water needs, and/or addresses the gap areas between available water supply and future need as identified in SWSI or a roundtable's basin-wide water needs assessment.

#### Tier 2: Facilitating Water Activity Implementation

- d. Funding from this Account will reduce the uncertainty that the water activity will be implemented. For this criterion the applicant should discuss how receiving funding from the Account will make a significant difference in the implementation of the water activity (i.e., how will receiving funding enable the water activity to move forward or the inability obtaining funding elsewhere).
- e. The amount of matching funds provided by the applicant via direct contributions, demonstrable inkind contributions, and/or other sources demonstrates a significant & appropriate commitment to the project.

#### Tier 3: The Water Activity Addresses Other Issues of Statewide Value and Maximizes Benefits

- f. The water activity helps sustain agriculture & open space, or meets environmental or recreational needs.
- g. The water activity assists in the administration of compact-entitled waters or addresses problems related to compact entitled waters and compact compliance and the degree to which the activity promotes maximum utilization of state waters.
- h. The water activity assists in the recovery of threatened and endangered wildlife species or Colorado State species of concern.
- i. The water activity provides a high level of benefit to Colorado in relationship to the amount of funds requested.
- j. The water activity is complimentary to or assists in the implementation of other CWCB programs. Continued: Explanation of how the water activity/project meets all applicable **Evaluation Criteria**. **Please attach additional pages as necessary.**

#### Part IV. – Required Supporting Material

1. **Water Rights, Availability, and Sustainability** – This information is needed to assess the viability of the water project or activity. Please provide a description of the water supply source to be utilized, or the water body to be affected by, the water activity. This should include a description of applicable water rights,

Revised October 2013

and water rights issues, and the name/location of water bodies affected by the water activity.

Water supplies affected by this project fall under existing water rights utilized by the Town of Mancos for their domestic water supply. The Town's raw water supply primarily consists of two sources of water: 1) 1.6 cubic foot per second cubic feet per second (cfs) adjudicated water right decreed from the West Fork of the Mancos River, and 2) 420 Acre-Feet (AF) of Jackson Gulch Reservoir storage water. In addition, the Town acquired the Weston and Jarrett Ditch, which is decreed for 0.967 cfs for irrigation. The Town uses water from the Mancos River, unless their water rights are curtailed by drought or other reason.

The Raw Water Intake System Improvements will involve the West Fork of the Mancos River diversion. The two other project tasks will involve whichever water right is being used for provision of domestic supply at any particular time of the year.

2. Please provide a brief narrative of any related studies or permitting issues.

Attached to this application, please find as <u>Appendices A and B</u>, the Town's "<u>Water Rate Study</u>" and "<u>Infrastructure Needs List</u>" which both identify the proposed project as an urgent need for the Town. No permitting issues should be associated with the project.

3. Statement of Work, Detailed Budget, and Project Schedule

Please see the attached Exhibit A for the Statement of Work, Detailed Budget, and Project Schedule.

#### REPORTING AND FINAL DELIVERABLE

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the statement of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.

#### **PAYMENT**

Payment will be made based on actual expenditures and invoicing by the applicant. Invoices from any other entity (i.e. subcontractors) cannot be processed by the State. The request for payment must include a description of the work accomplished by major task, and estimate of the percent completion for individual tasks and the entire water activity in relation to the percentage of budget spent, identification of any major issues and proposed or implemented corrective actions. The last 10 percent of the entire water activity budget will be withheld until final project/water activity documentation is completed. All products, data and information developed as a result of this grant must be provided to the CWCB in hard copy and electronic format as part of the project documentation. This information will in turn be made widely available to Basin Roundtables and the general public and help promote the development of a common technical platform.

Revised October 2013
