If a

conflict or appearance exists, or if Grantee is uncertain whether a conflict or the appearance of a conflict of interest exists, Grantee shall submit to the State a disclosure statement setting forth the relevant details for the State's consideration. 14. BREACH

A. Defined

In addition to any breaches specified in other sections of this Grant, the failure of either Party to perform any of its material obligations hereunder in whole or in part or in a timely or satisfactory manner, constitutes a breach. The institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Grantee, or the appointment of a receiver or similar officer for Grantee or any of its property, which is not vacated or fully stayed within 20 days after the institution or occurrence thereof, shall also constitute a breach.

B. Notice and Cure Period

cure cannot be completed within 30 days, or if cure of the breach has not begun within 30 days and pursued with due diligence, the State may exercise any of the remedies set forth in §15. Notwithstanding anything to the contrary herein, the State, in its sole discretion, need not provide advance notice or a cure period and may immediately terminate this Grant in whole or in part if reasonably necessary to preserve public safety or to prevent immediate public crisis.

15. REMEDIES

If Grantee is in breach under any provision of this Grant, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Grant following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

A. Termination for Cause and/or Breach

If Grantee fails to perform any of its obligations hereunder with such diligence as is required to ensure its completion in accordance with the provisions of this Grant and in a timely manner, the State may notify Grantee of such non-performance in accordance with the provisions herein. If Grantee thereafter fails to promptly cure such non-performance within the cure period, the State, at its option, may terminate this entire Grant or such part of this Grant as to which there has been delay or a failure to properly perform. Exercise by the State of this right shall not be deemed a breach of its obligations hereunder. Grantee shall continue performance of this Grant to the extent not terminated, if any.

i. Obligations and Rights

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and sub-Grants with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or sub-Grants. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All materials owned by the State in the possession of Grantee shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

ii. Payments

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

iii. Damages and Withholding

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If the State reasonably determines this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State

for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

ii. Obligations and Rights

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

iii. Payments

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made. Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

C. Remedies Not Involving Termination

The State, its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

ii. Withhold Payment

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Demand removal of any of Grantee's employees, agents, or Sub-grantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

v. Intellectual Property

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option (a) obtain for the State or Grantee the right to use such products and services; (b) replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, (c) if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

Notwithstanding any other provision to the contrary, nothing herein shall constitute a waiver, express or implied, of any of the immunities, rights, benefits, protection, or other provisions of the Colorado Governmental Immunity Act, CRS §24-10-101, et seq., as amended. Liability for claims for injuries to persons or property arising from the negligence of the State of Colorado, its departments, institutions, agencies, boards, officials, and employees is controlled and limited by the provisions of the Governmental Immunity Act and the risk management statutes, CRS §24-30-1501, et seq., as amended.

19. STATEWIDE GRANT MANAGEMENT SYSTEM

If the maximum amount payable to Grantee under this Grant is \$100,000 or greater, either on the Effective Date or at anytime thereafter, this §19 applies.

Grantee agrees to be governed, and to abide, by the provisions of CRS §24-102-205, §24-102-206, §24-103-601, §24-103.5-101 and §24-105-102 concerning the monitoring of vendor performance on state Grants and inclusion of Grant performance information in a statewide Grant management system.

Grantee's performance shall be subject to Evaluation and Review in accordance with the terms and conditions of this Grant, State law, including CRS §24-103.5-101, and State Fiscal Rules, Policies and Guidance. Evaluation and Review of Grantee's performance shall be part of the normal Grant administration process and Grantee's performance will be systematically recorded in the statewide Grant Management System. Areas of Evaluation and Review shall include, but shall not be limited to quality, cost and timeliness. Collection of information relevant to the performance of Grantee's obligations under this Grant shall be determined by the specific requirements of such obligations and shall include factors tailored to match the requirements of Grantee's obligations. Such performance information shall be entered into the statewide Grant Management System at intervals established herein and a final Evaluation, Review and Rating shall be rendered within 30 days of the end of the Grant term. Grantee shall be notified following each performance Evaluation and Review, and shall address or correct any identified problem in a timely manner and maintain work progress.

Should the final performance Evaluation and Review determine that Grantee demonstrated a gross failure to meet the performance measures established hereunder, the Executive Director of the Colorado Department of Personnel and Administration (Executive Director), upon request by the CWCB, and showing of good cause, may debar Grantee and prohibit Grantee from bidding on future Grants. Grantee may contest the final Evaluation, Review and Rating by: (a) filing rebuttal statements, which may result in either removal or

correction of the evaluation (CRS §24-105-102(6)), or (b) under CRS §24-105-102(6), exercising the debarment protest and appeal rights provided in CRS §§24-109-106, 107, 201 or 202, which may result in the reversal of the debarment and reinstatement of Grantee, by the Executive Director, upon showing of good cause.

20. GENERAL PROVISIONS

Statement of Work

WATER ACTIVITY NAME – Use of ATMs to meet non-consumptive and consumptive needs in the Yampa Basin

GRANT RECIPIENT – The Nature Conservancy

FUNDING SOURCE – CWCB Alternative Agricultural Water Transfer Methods Grant Program

INTRODUCTION AND BACKGROUND

Provide a brief description of the project. (Please limit to no more than 200 words; this will be used to inform reviewers and the public about your proposal)

The Yampa-White Basin roundtable has completed a consumptive needs assessment and is working towards completion of a non-consumptive needs assessment as required by HB05-1177. This project is intended to build on the findings of these needs assessments to identify potential alternative agricultural transfer projects that could be used to meet needs for both non-consumptive and consumptive water uses in the Yampa Basin. Information from previous CWCB and basin roundtable studies will be used to identify candidate locations at which ATMs could be utilized for multipurpose projects meeting both non-consumptive and consumptive needs, with a specific focus on projects that meet environmental needs and agricultural shortages. Through combining this technical analysis with a targeted outreach and ground-truthing effort, the project will produce a report that describes favorable candidate locations for implementation of ATM projects and will describe in detail the ATM arrangement that would best facilitate the alternative water transfer in each candidate location. Thereafter, Applicant will begin implementation of recommended ATM projects.

Study Objectives and Overview

This effort is intended to build on the findings of the Yampa-White Basin needs assessments to identify potential projects and methods that could be used to meet non-consumptive and consumptive needs in the Yampa Basin. This effort will leverage existing studies funded by CWCB to identify the most favorable candidate locations for implementing ATM projects to meet non-consumptive and consumptive needs. The main targeted needs of this project will be environmental attributes and agricultural shortages. The project will examine available water rights and a variety of ATM mechanisms to ensure that the final report identifies the best candidates possible for ATM projects. The final report will serve as a blueprint for near-term implementation of a number of ATM projects, and in the long term, the analysis developed through this project will serve as a model for locating multipurpose projects that optimize water use in the Yampa basin.

Following are the study objectives for this project:

1. Identify locations in the Yampa Basin where ATM could help to meet non-consumptive needs and agricultural shortages
2. Analyze ATM transactions that might be used to meet multiple needs in specific candidate locations
3. Identify which ATM mechanisms are most suitable for meeting multiple purposes in each candidate location

4. Conduct outreach to water rights owners, governmental entities and other interests to gage, and develop, interest in ATM transactions
5. Produce a final report describing in detail the most favorable ATM transactions and describing the next steps for implementing each of those transactions
6. Begin working toward implementation of ATM transactions recommended in the final report.

Following is a summary of the tasks to be completed as part of the study and outreach effort:

Tasks include:

- Task 1 – Identify location and timing of non-consumptive and consumptive needs, with a focus on environmental needs and irrigation shortages
- Task 2 – Analyze possible ATM transactions that might be implemented to meet multiple needs in these locations, including analysis of timing and location of water availability through the ATM
- Task 3 – Identify the best ATM transaction for implementation in each location, taking into account the timing and location of water available through the ATM and the timing and location of the non-consumptive and consumptive need
- Task 4 – Conduct outreach to appropriate water rights owners, governmental entities and other interested parties
- Task 5 – Prepare a report describing the most favorable ATM transactions and identifying next steps to implement transactions
- Task 6 – Begin implementation of recommended ATM transactions

Task 1 – Identify Location and Timing of Non-Consumptive and Consumptive Needs

CDM (“Contractor”) will utilize the following information to identify locations and timing of non-consumptive and consumptive needs in the Yampa Basin for a range of hydrologic conditions:

- SWSI 2010
- Irrigated lands from Colorado Decision Support System and reviewed during Yampa-White Ag Study
- Water short agricultural areas based on existing studies
- M&I Demands to 2050
- Environmental needs based on existing information from the Non-consumptive Needs Assessment, Watershed Flow Evaluation Tool, Priority Waters Project, and TU’s Conservation Success Index. The flow evaluation tool will be used based on a range for each CDSS node. Flow amounts are generated based on attribute and location in the Non-consumptive Needs Assessment mapping. Up to three hydrologic periods will be simulated in CDSS. Contractor will identify areas where non-consumptive attributes would benefit from additional water.

Contractor will use above information to identify location and timing of water needs over three hydrologic periods. Once these needs have been identified at specific locations, areas with multiple uses can be determined.

Contractor will develop a brief technical memorandum summarizing the results of Task 1. In addition, Contractor will prepare GIS database of information gathered in this task.

Task 2 – Analyze Possible ATM Transactions

Based on information gathered in Task 1, Contractor will investigate the most appropriate ATMs for addressing multiple (non-consumptive and consumptive) water needs. The Contractor will use the CDSS to evaluate these options.

Alternative Transfer Methods to be examined include, but are not limited to, the following:

- Interruptible supply agreements
- Rotational fallowing
- Reduced crop consumptive use
- Deficit irrigation
- Purchase and leaseback
- Delivery system efficiency improvements
- Crop type changes
- Participation in water banking as that concept develops

Contractor will prepare an inventory of the water rights associated with candidate locations identified in this task and will analyze the timing and amounts of water that would be made available through application of an ATM to these water rights. In addition, Contractor will evaluate whether exchange potential exists to address a multi-purpose area. Contractor will investigate the timing of return flows from irrigated lands that may need to be taken into account when implementing an ATM. This task could involve use of the CDSS in a limited fashion to evaluate the feasibility of this.

Task 3 – Identify the Best ATM for Implementation in each Location

Building on the information gathered in Tasks 1 and 2, Contractor will identify the best ATM transaction for implementation in each location with multiple (non-consumptive and consumptive) water needs. In determining the best possible ATM transactions, Contractor will take account of the timing and location of water available through the ATM and the timing and location of the non-consumptive and consumptive need. For the candidate locations, estimates on amount of water and timing to address needs will be summarized. This information will be summarized using GIS information.

Contractor will prepare a brief technical memorandum summarizing the results of Tasks 2 and 3 and will map candidate locations.

Task 4 – Conduct Outreach to Appropriate Water Rights Owners, Governmental Entities and Other Interested Parties

Early in the project (concurrent with Task 1), Contractor, the Project Team and CSU Extension Office (“Project Partners”) will conduct outreach to various governmental entities and water interests in the basin to provide information about the study and receive feedback and reactions. Later, based on information gathered through Tasks 1 through 3, the Contractor will identify specific landowners and water rights holders and other interested parties to contact regarding specific ATM transactions to meet multiple-purpose needs. The Project Partners will conduct outreach to these parties and will work to develop interest in the candidate ATM transactions. Also, the Project Partners will conduct outreach with a broad range of potential partners at the basin and statewide levels in order to build coalitions that can effectively muster the resources to successfully implement one or more pilot projects in the future.

Task 5 – Prepare a Report Describing the most Favorable ATM Transactions and Identifying Next Steps to Implement Transactions

Contractor will summarize information from Tasks 1 through 4 in a final report. The report will identify a number of the most favorable candidate locations for implementation of a multi-purpose ATM and will describe the ATM method or methods most suited to each location. The report will detail the ATM arrangement that Contractor recommends for each candidate location. It will identify whether any infrastructure may be needed to resolve multi-purpose needs, and it will describe steps necessary to implement the ATM.

Task 6 – Begin Implementation of Recommended ATM Transactions

With the report complete, Project Partners will work to develop the recommended ATM transactions. Implementation of recommended ATM transactions will require working partnerships with water rights holders and others and will also require financial resources. The Project Partners will work to bring in partners throughout the Yampa Basin and the state to assist in working towards implementation of the recommended transactions. As part of this grant request, the Project Team would like to reserve \$10,000, as cash match from TNC and TU, to put towards implementation of a recommended ATM transaction, but will also seek further funding in the future from various sources and through partnerships should this amount be insufficient to begin implementation of a pilot.

PAYMENT

Payment will be made based on actual expenditures and invoicing by the applicant. Invoices from any other entity (i.e. subcontractors) cannot be processed by the State. The request for payment must include a description of the work accomplished by major task, and estimate of percent completion for individual tasks and the entire water activity in relation to the percentage of budget spent, identification of any major issues and proposed or implemented corrective actions. The last 5 percent of the entire water activity budget will be withheld until final project/water activity documentation is completed. All products, data and information developed as a result of this grant must be provided to the CWCB in hard copy and electronic format as part of the project documentation. This information will in turn be made widely available to help promote the development of a common technical platform.
