

Water Supply Reserve Account – Grant and Loan Program
Water Activity Summary Sheet
July 20-21, 2016
Agenda Item 16(e)

Applicant & Fiscal Agent: Shavano Conservation District
Water Activity Name: Ditch Mapping of Colona Area
Water Activity Purpose: Multipurpose
County: Ouray
Drainage Basin: Gunnison
Water Source: Gunnison tributaries
Amount Requested/Source of Funds: \$13,658 Gunnison Basin Account
\$13,658 Total Basin Account request

Matching Funds: Applicant Match: \$5,613 = 30% of the total project cost of \$19,271
(refer to *Funding Summary/Matching Funds* section below)

Staff Recommendation:

Staff recommends approval of up to \$13,658 from the Gunnison Basin Account to help fund the project titled: Ditch Mapping of Colona Area.
--

Water Activity Summary: WSRA funds, if approved, will help fund the project titled: Ditch Mapping of Colona Area. The Shavano District encompasses 1,191,438 acres including all of Ouray County and portions of Montrose, Gunnison and Delta Counties. As a designated salinity control area, Shavano Conservation District holds salinity control as a top priority.

This application requests funding to complete the GIS ditch mapping efforts in the Colona area. Digital mapping of irrigation ditches and documentation of their operations is required by the Bureau of Reclamation for calculation of salt loads contributing to salinity in the Colorado River system. These salt loads must be established by the BOR for a ditch company to be eligible to apply for grants offered through the BOR-Basinwide Salinity Control Program. Ditch companies in the Colona area have expressed interest in applying for funds through this program to pipe portions of their irrigation delivery canals, however they are unable to do so until ditch mapping is completed in this area. The BOR has expended \$98,000 on the ditch mapping effort in the Lower Gunnison Basin over the past 3 years, and has no more funds available to complete this work in the Upper Uncompahgre area. Because interest in applying for federal funds to improve irrigations ditches has been expressed in the Colona area, and the ditch mapping work has been initiated, the Shavano Conservation District is seeking funds to complete the effort in this targeted area.

Completion of the ditch mapping effort is essential for the Colona area ditches to apply for significant federal funds available to finance piping projects. The BOR-Basinwide Salinity Control Program typically offers \$40M in grants every three years for ditch improvement projects in the Upper Colorado River Basin.

Since 2009, 122 ditches have been documented, with 730 miles of canal digitized in the Lower Gunnison basin, coordinated by Shavano and Delta Conservation Districts. The BOR-Basinwide Salinity Control Program, which relies on this ditch mapping data to rank the cost effectiveness of project applications, has awarded nearly \$90M to fund irrigation system improvements in the Lower Gunnison basin. Completion of this proposed project will extend eligibility to apply for these funds to another 12 ditches including 34 miles of canal.

Discussion: This project meets the measurable objectives and action items in the Gunnison Basin Implementation Plan including:

- Protects existing water uses in the Gunnison Basin;
- Discourages conversion of productive agricultural land to other uses;
- Improves agricultural water supplies to reduce shortages;
- Improves water quality;
- Restores, maintains, and modernizes critical water infrastructure.

This project also meets additional critical actions identified in the Critical Action Plan (Chapter 10) of Colorado's Water Plan:

- **D3:** Provide grants, loans, and technical support to update and improve Colorado's aging agricultural infrastructure, especially where improvements provide multiple benefits.
- **E2:** Prioritize grants and loans to support the implementation of BIP-identified multipurpose projects and methods, taking into consideration locally identified geographic and seasonal gaps.

Issues/Additional Needs: Staff will work with applicant to assemble a Scope of Work which meets the criteria for State contracting.

Threshold and Evaluation Criteria: The application meets all four Threshold Criteria.

Tier 1-3 Evaluation Criteria: n/a

Funding Summary/Matching Funds:

<u>Funding Source</u>	<u>Cash</u>	<u>In-kind</u>	<u>Total</u>
Trout Unlimited	\$500	\$700	\$1,200
Shavano Conservation District	\$2,913	\$1,500	\$4,413
Subtotal Matching Funds	\$3,413	\$2,200	\$5,613
WSRA Gunnison Basin Account	\$13,658	n/a	\$13,658
Total Project Costs	\$17,071	\$2,200	\$19,271

CWCB Project Manager: Brent Newman

All products, data and information developed as a result of this grant must be provided to the CWCB in hard copy and electronic format as part of the project documentation. This information will in turn be made widely available to Basin Roundtables and the general public and will help promote the development of a common technical platform. In accordance with the revised WSRA Criteria and

Guidelines, staff would like to highlight additional reporting and final deliverable requirements. The specific requirements are provided below.

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the scope of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.

Engineering: All engineering work (as defined in the Engineers Practice Act (§12-25-102(10) C.R.S.)) performed under this grant shall be performed by or under the responsible charge of professional engineer licensed by the State of Colorado to practice Engineering.

*The Gunnison Basin Roundtable
501 Palmer Street
Delta, CO 81416*

June 14, 2016

Re: WSRA Grant Request: Shavano Conservation District – Ditch Mapping of Colona Area

Dear Mr. Newman:

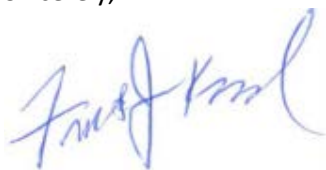

This letter is presented to advise you that the grant application submitted by the Shavano Conservation District for \$13,658 from Basin Account funds from the Water Supply Reserve Account for the Ditch Mapping of Colona Area project was reviewed by the Gunnison Basin Roundtable and its Project Screening Committee and was approved by a unanimous vote of the Gunnison Basin Roundtable during our meeting on June 6, 2016.

This water activity meets the provisions of Section 37-75-104(2), Colorado Revised Statutes. The requirements/language from the statute is provided in Part 3 of the Criteria and Guidelines.

The primary purpose of this project is digital mapping of ditches near the Colona area and will address nonconsumptive and agricultural water supplies. Completion of this ditch mapping project will enable ditch owners in this area to apply for BOR Salinity program funding for improvement which will have agricultural and water quality related environmental benefits.

Thank you for your help in processing this WSRA grant request.

Sincerely,

Frank J. Kugel
Vice Chair

Application Content

Application Instructions	page 2
Part I – Description of the Applicant	page 3
Part II – Description of the Water Activity	page 5
Part III – Threshold and Evaluation Criteria	page 7
Part IV – Required Supporting Material	
Water Rights, Availability, and Sustainability	page 10
Related Studies	page 10
Signature Page	page 12

Required Exhibits

- A. Statement of Work, Budget, and Schedule
- B. Project Map
- C. As Needed (i.e. letters of support, photos, maps, etc.)

Appendices – Reference Material

- 1. Program Information
- 2. Insurance Requirements
- 3. WSRA Standard Contract Information (Required for Projects Over \$100,000)
- 4. W-9 Form (Required for All Projects Prior to Contracting)

Instructions

To receive funding from the Water Supply Reserve Account (WSRA), a proposed water activity must be approved by the local Basin Roundtable **AND** the Colorado Water Conservation Board (CWCB). The process for Basin Roundtable consideration and approval is outlined in materials in Appendix 1.

Once approved by the local Basin Roundtable, the applicant should submit this application **with a detailed statement of work including budget and schedule as Exhibit A** to CWCB staff by the application deadline.

WSRA applications are due with the roundtable letter of support 60 calendar days prior to the bi-monthly Board meeting at which it will be considered. Board meetings are held in January, March, May, July, September, and November. Meeting details, including scheduled dates, agendas, etc. are posted on the CWCB website at: <http://cwcb.state.co.us> Applications to the WSRA Basin Account are considered at every board meeting, while applications to the WSRA Statewide Account are only considered at the March and September board meetings.

When completing this application, the applicant should refer to the WSRA Criteria and Guidelines available at: <http://cwcb.state.co.us/LoansGrants/water-supply-reserve-account-grants/Documents/WSRACriteriaGuidelines.pdf>. In addition, the applicant should also refer to the [Supplemental Scoring Matrix](#) applied to Evaluation Criteria Tiers 1-3 for Statewide Account requests .

The application, statement of work, budget, and schedule **must be submitted in electronic format** (Microsoft Word or text-enabled PDF are preferred) and can be emailed or mailed on a disk to:

Craig Godbout - WSRA Application
Colorado Water Conservation Board
1313 Sherman St., Room 721
Denver, CO 80203
Craig.godbout@state.co.us

If you have questions or need additional assistance, please contact Craig Godbout at: 303-866-3441 x3210 or craig.godbout@state.co.us.

Part I. - Description of the Applicant (Project Sponsor or Owner);

1.	Applicant Name(s):	Shavano Conservation District		
	Mailing address:	102 Par Place, Suite# 4 Montrose, CO 81401		
	FEIN #:	84-6000225		
	Primary Contact:	Bert Earle	Position/Title:	District Manager
	Email:	bertha.earle@co.nacdnet.net		
	Phone Numbers:	Cell:	Office:	970-249-8407 ext. 115
	Alternate Contact:	Ken Lipton	Position/Title:	Board President
	Email:	klipton@ouraynet.com		
	Phone Numbers:	Cell:	Office:	

2. Eligible entities for WSRA funds include the following. What type of entity is the Applicant?

- ☐ Public (Government) – municipalities, enterprises, counties, and State of Colorado agencies. Federal agencies are encouraged to work with local entities and the local entity should be the grant recipient. Federal agencies are eligible, but only if they can make a compelling case for why a local partner cannot be the grant recipient.
- ☒ Public (Districts) – authorities, Title 32/special districts, (conservancy, conservation, and irrigation districts), and water activity enterprises.
- ☐ Private Incorporated – mutual ditch companies, homeowners associations, corporations.
- ☐ Private individuals, partnerships, and sole proprietors are eligible for funding from the Basin Accounts but not for funding from the Statewide Account.
- ☐ Non-governmental organizations – broadly defined as any organization that is not part of the government.

3. Provide a brief description of your organization

Colorado's 76 conservation districts were established in 1937 to represent private landowners' interests in conservation planning and programs. Conservation Districts serve as local partners in state and federal programs, working in close partnership with the USDA-Natural Resources Conservation Service. Each district is governed by an elected board of supervisors comprised of local landowners and agricultural producers. The Shavano District encompasses 1,191,438 acres including all of Ouray County and portions of Montrose, Gunnison and Delta Counties. As a designated salinity control area, Shavano Conservation District holds salinity control as a top priority .

4. If the Contracting Entity is different then the Applicant (Project Sponsor or Owner) please describe the Contracting Entity here.

Same

5 . Successful applicants will have to execute a contract with the CWCB prior to beginning work on the portion of the project funded by the WSRA grant. In order to expedite the contracting process the CWCB has established a standard contract with provisions the applicant must adhere to. A link to this standard contract is included in Appendix 3. Please review this contract and check the appropriate box.

☒

The Applicant will be able to contract with the CWCB using the Standard Contract

☐

The Applicant has reviewed the standard contract and has some questions/issues/concerns. Please be aware that any deviation from the standard contract could result in a significant delay between grant approval and the funds being available.

6. The Tax Payer Bill of Rights (TABOR) may limit the amount of grant money an entity can receive. Please describe any relevant TABOR issues that may affect the applicant.

None

Part II. - Description of the Water Activity/Project

1. What is the primary purpose of this grant application? (Please check only one)

☒

Nonconsumptive (Environmental or Recreational)

☒

Agricultural

☐

Municipal/Industrial

☐

Needs Assessment

☐

Education

☒

Other

Explain:

Digital mapping of ditches near Colona

2. If you feel this project addresses multiple purposes please explain.

Completion of this ditch mapping will enable area ditches to apply for BOR Salinity Program funding of improvements which would have agricultural as well as water quality related environmental benefits.

3. Is this project primarily a study or implementation of a water activity/project? (Please check only one)

☒

Study

☐

Implementation

4. To catalog measurable results achieved with WSRA funds can you provide any of the following numbers?

New Storage Created (acre-feet)

New Annual Water Supplies Developed, Consumptive or Nonconsumptive (acre-feet)

Existing Storage Preserved or Enhanced (acre-feet)

Length of Stream Restored or Protected (linear feet)

Length of Pipe/Canal Built or Improved (linear feet)

Efficiency Savings (acre-feet/year OR dollars/year – **circle one**)

Area of Restored or Preserved Habitat (acres)

☒

Other -- Explain:

Digital mapping and operational documentation for 12 ditches

4. To help us map WSRA projects please include a map (Exhibit B) and provide the general coordinates below:

Latitude:

38.325186

Longitude:

-107.779860

5. Please provide an overview/summary of the proposed water activity (no more than one page). Include a description of the overall water activity and specifically what the WSRA funding will be used for. A full **Statement of Work** with a detailed budget and schedule is required as **Exhibit A** of this application.

This application requests funding to complete the GIS ditch mapping efforts in the Colona area. Digital mapping of irrigation ditches and documentation of their operations is required by the Bureau of Reclamation for calculation of salt loads contributing to salinity in the Colorado River system. These salt loads must be established by the BOR for a ditch company to be eligible to apply for grants offered through the BOR-Basinwide Salinity Control Program. Ditch companies in the Colona area have expressed interest in applying for funds through this program to pipe portions of their irrigation delivery canals, however they are unable to do so until ditch mapping is completed in this area. The BOR has expended \$98,000 on the ditch mapping effort in the Lower Gunnison Basin over the past 3 years, and has no more funds available to complete this work in the Upper Uncompahgre area. Because interest in applying for federal funds to improve irrigations ditches has been expressed in the Colona area, and the ditch mapping work has been initiated, the Shavano Conservation District is seeking funds to complete the effort in this targeted area.

Part III. – Threshold and Evaluation Criteria

1. Describe how the water activity meets these **Threshold Criteria**. (Detailed in Part 3 of the Water Supply Reserve Account Criteria and Guidelines.)
- a) The water activity is consistent with Section 37-75-102 Colorado Revised Statutes.¹

This project will not impact water rights.
 - b) The water activity underwent an evaluation and approval process and was approved by the Basin Roundtable (BRT) and the application includes a description of the results of the BRT's evaluation and

¹ 37-75-102. Water rights - protections. (1) It is the policy of the General Assembly that the current system of allocating water within Colorado shall not be superseded, abrogated, or otherwise impaired by this article. Nothing in this article shall be interpreted to repeal or in any manner amend the existing water rights adjudication system. The General Assembly affirms the state constitution's recognition of water rights as a private usufructuary property right, and this article is not intended to restrict the ability of the holder of a water right to use or to dispose of that water right in any manner permitted under Colorado law. (2) The General Assembly affirms the protections for contractual and property rights recognized by the contract and takings protections under the state constitution and related statutes. This article shall not be implemented in any way that would diminish, impair, or cause injury to any property or contractual right created by intergovernmental agreements, contracts, stipulations among parties to water cases, terms and conditions in water decrees, or any other similar document related to the allocation or use of water. This article shall not be construed to supersede, abrogate, or cause injury to vested water rights or decreed conditional water rights. The General Assembly affirms that this article does not impair, limit, or otherwise affect the rights of persons or entities to enter into agreements, contracts, or memoranda of understanding with other persons or entities relating to the appropriation, movement, or use of water under other provisions of law.

approval of the activity. At a minimum, the description must include the level of agreement reached by the roundtable, including any minority opinion(s) if there was not general agreement for the activity. The description must also include reasons why general agreement was not reached (if it was not), including who opposed the activity and why they opposed it. Note- If this information is included in the letter from the roundtable chair simply reference that letter.

This application will be submitted for consideration by the Gunnison Basin Roundtable by May 2, 2016.

- c) The water activity meets the provisions of Section 37-75-104(2), Colorado Revised Statutes.² The Basin Roundtable Chairs shall include in their approval letters for particular WSRA grant applications a description of how the water activity will assist in meeting the water supply needs identified in the basin roundtable's consumptive and/or non-consumptive needs assessments.

Completion of the ditch mapping effort is essential for the Colona area ditches to apply for significant federal funds available to finance piping projects. As such, this project facilitates the ability to seek federal funds to meet the following goals identified in the Gunnison Basin Implementation Plan:

1. Protects existing water uses in the Gunnison Basin;
2. Discourages conversion of productive agricultural land to other uses;
3. Improves agricultural water supplies to reduce shortages;
4. ...
5. ...
6. Improves water quality;
7. ...
8. Restores, maintains, and modernizes critical water infrastructure.

The BOR-Basinwide Salinity Control Program typically offers \$40M in grants every three years for ditch improvement projects in the Upper Colorado River Basin.

- d) Matching Requirement: For requests from the **Statewide Fund**, the applicants will be required to demonstrate a **25 percent** (or greater) match of the total grant request from the other sources, including by not limited to Basin Funds. A minimum match of 5% of the total grant amount shall be from Basin funds. A minimum match of 5% of the total grant amount must come from the applicant or 3rd party sources. Sources of matching funds include but are not limited to Basin Funds, in-kind

² 37-75-104 (2)(c). Using data and information from the Statewide Water Supply Initiative and other appropriate sources and in cooperation with the on-going Statewide Water Supply Initiative, develop a basin-wide consumptive and nonconsumptive water supply needs assessment, conduct an analysis of available unappropriated waters within the basin, and propose projects or methods, both structural and nonstructural, for meeting those needs and utilizing those unappropriated waters where appropriate. Basin Roundtables shall actively seek the input and advice of affected local governments, water providers, and other interested stakeholders and persons in establishing its needs assessment, and shall propose projects or methods for meeting those needs. Recommendations from this assessment shall be forwarded to the Interbasin Compact Committee and other basin roundtables for analysis and consideration after the General Assembly has approved the Interbasin Compact Charter.

services, funding from other sources, and/or direct cash match. Past expenditures directly related to the project may be considered as matching funds if the expenditures occurred within 9 months of the date the contract or purchase order between the applicant and the State of Colorado is executed. Please describe the source(s) of matching funds. (NOTE: These matching funds should also be reflected in your Detailed Budget in **Exhibit A** of this application)

A total of \$98,000 has been spent to complete GIS ditch mapping in the Lower Gunnison Basin. The Shavano Conservation District has been granted \$29,000 to complete this work within their district.

Limiting the budget analysis to the past 9 months:

Funds Expended in Upper Uncompahgre	\$ 2,913	15 %
Shavano CD administration, in-kind	\$ 1,500	8 %
Trout Unlimited, in-kind contribution	\$ 700	4 %
Trout Unlimited contribution	\$ 500	3%
<u>Requested WSRA Funds</u>	<u>\$ 13,658</u>	<u>84 %</u>
Total Project Costs	\$ 19,271	100%

Contributions from Trout Unlimited facilitate inclusion of mapping the Hayes Teague and Chaffee ditches in this project. TU in-kind contribution is provided by Cary Denison, 28 hours of work at \$25/hour to collect GIS and operational data.

2. For Applications that include a request for funds from the **Statewide Account**, describe how the water activity/project meets all applicable **Evaluation Criteria**. (Detailed in Part 3 of the Water Supply Reserve Account Criteria and Guidelines and repeated below.) Projects will be assessed on how well they meet the Evaluation Criteria. **Please attach additional pages as necessary.**

Evaluation Criteria – the following criteria will be utilized to further evaluate the merits of the water activity proposed for funding from the Statewide Account. In evaluation of proposed water activities, preference will be given to projects that meet one or more criteria from each of the three “tiers” or categories. Each “tier” is grouped in level of importance. For instance, projects that meet Tier 1 criteria will outweigh projects that only meet Tier 3 criteria. The applicant should also refer to the Supplemental Scoring Matrix applied to Evaluation Criteria Tiers 1-3 for Statewide Account requests. WSRA grant requests for projects that may qualify for loans through the CWCB loan program will receive preference in the Statewide Evaluation Criteria if the grant request is part of a CWCB loan/WSRA grant package. For these CWCB loan/WSRA grant packages, the applicant must have a CWCB loan/WSRA grant ratio of 1:1 or higher. Preference will be given to those with a higher loan/grant ratio.

Tier 1: Promoting Collaboration/Cooperation and Meeting Water Management Goals and Identified Water Needs

- a. The water activity addresses multiple needs or issues, including consumptive and/or non-consumptive needs, or the needs and issues of multiple interests or multiple basins. This can be demonstrated by obtaining letters of support from other basin roundtables (in addition to an approval letter from the sponsoring basin).
- b. The number and types of entities represented in the application and the degree to which the activity will promote cooperation and collaboration among traditional consumptive water interests and/or non-consumptive interests, and if applicable, the degree to which the water activity is effective in addressing intrabasin or interbasin needs or issues.
- c. The water activity helps implement projects and processes identified as helping meet Colorado’s future water needs, and/or addresses the gap areas between available water supply and future need as identified in SWSI or a roundtable’s basin-wide water needs assessment.

Tier 2: Facilitating Water Activity Implementation

- d. Funding from this Account will reduce the uncertainty that the water activity will be implemented. For this criterion the applicant should discuss how receiving funding from the Account will make a significant difference in the implementation of the water activity (i.e., how will receiving funding enable the water activity to move forward or the inability obtaining funding elsewhere).
- e. The amount of matching funds provided by the applicant via direct contributions, demonstrable in-kind contributions, and/or other sources demonstrates a significant & appropriate commitment to the project.

Tier 3: The Water Activity Addresses Other Issues of Statewide Value and Maximizes Benefits

- f. The water activity helps sustain agriculture & open space, or meets environmental or recreational needs.
- g. The water activity assists in the administration of compact-entitled waters or addresses problems related to compact entitled waters and compact compliance and the degree to which the activity promotes maximum utilization of state waters.
- h. The water activity assists in the recovery of threatened and endangered wildlife species or Colorado State species of concern.
- i. The water activity provides a high level of benefit to Colorado in relationship to the amount of funds requested.
- j. The water activity is complimentary to or assists in the implementation of other CWCB programs.

Continued: Explanation of how the water activity/project meets all applicable **Evaluation Criteria**.
Please attach additional pages as necessary.

This application is submitted for Basin funds only.

Part IV. – Required Supporting Material

1. **Water Rights, Availability, and Sustainability** – This information is needed to assess the viability of the water project or activity. Please provide a description of the water supply source to be utilized, or the water body to be affected by, the water activity. This should include a description of applicable water rights, and water rights issues, and the name/location of water bodies affected by the water activity.

NA

2. Please provide a brief narrative of any related studies or permitting issues.

Since 2009, 122 ditches have been documented, with 730 miles of canal digitized in the Lower Gunnison basin, coordinated by Shavano and Delta Conservation Districts. The BOR-Basinwide Salinity Control Program, which relies on this ditch mapping data to rank the cost effectiveness of project applications, has awarded nearly \$90M to fund irrigation system improvements in the Lower Gunnison basin. Completion of this proposed project will extend eligibility to apply for these funds to another 12 ditches including 34 miles of canal.

3. Statement of Work, Detailed Budget, and Project Schedule

The statement of work will form the basis for the contract between the Applicant and the State of Colorado. In short, the Applicant is agreeing to undertake the work for the compensation outlined in the statement of work and budget, and in return, the State of Colorado is receiving the deliverables/products specified. **Please note that costs incurred prior to execution of a contract or purchase order are not subject to reimbursement.** All WSRA funds are disbursed on a reimbursement basis after review invoices and appropriate backup material.

Please provide a detailed statement of work using the template in Exhibit A. Additional sections or modifications may be included as necessary. Please define all acronyms and include page numbers.

REPORTING AND FINAL DELIVERABLE

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the statement of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.

PAYMENT

Payment will be made based on actual expenditures and invoicing by the applicant. Invoices from any other entity (i.e. subcontractors) cannot be processed by the State. The request for payment must include a description of the work accomplished by major task, and estimate of the percent completion for individual tasks and the entire water activity in relation to the percentage of budget spent, identification of any major issues and proposed or implemented corrective actions. The last 10 percent of the entire water activity budget will be withheld until final project/water activity documentation is completed. All products, data and information developed as a result of this grant must be provided to the CWCB in hard copy and electronic format as part of the project documentation. This information will in turn be made widely available to Basin Roundtables and the general public and help promote the development of a common technical platform.

The above statements are true to the best of my knowledge:
