Re: Water Supply Reserve Account Grant Application: Feasibility Study of Flood Control Alternatives for the Fountain Creek Corridor

Dear Craig:

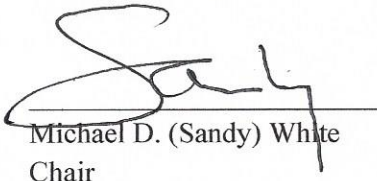

At its July 13, 2016 meeting, the Arkansas Roundtable approved the Fountain Creek Watershed, Flood Control and Greenway District's application for Feasibility Study of Flood Control Alternatives for the Fountain Creek Corridor. There were no dissenting opinions expressed in the consensus decision, however, the approval was based on the condition that the results of the study were not applicable, nor could be used, in a water court application. The applicant agreed to abide with the condition.

This project furthers multiple goals and objectives of the Arkansas Basin Implementation Plan. With respect to the Colorado Water Plan, this project supports Objective E. Storage: "*Assess and promote opportunities for multipurpose and multi-partner storage projects that address strategic needs,*" and multiple attributes of Objective F. Watershed Health, Environment and Recreation:

- *Enhance Environmental and Recreational Economic Values;*
- *Promote Protection and Restoration of Water Quality, and;*
- *Protect and Restore Critical Watersheds.*

Should you have any questions or concerns, please feel free to contact me either by telephone, 719-742-6164, or by email, sandy@white-jankowski.com.

With warm regards

Michael D. (Sandy) White
Chair
