

*The Colorado Foundation for Water Education is looking forward to a busy 2017 packed with exciting educational programs, leadership opportunities, events and new content. Here are some ways you can engage with CFWE in the coming months:*

#### **February:**

***Apply for Water Fluency*** - This four-session water bootcamp aims to help decision makers and non-water professionals better understand water's complexities and context so they can lead with confidence. The 2017 course will be held in the Grand Junction to Glenwood Springs corridor and runs May through July—learn more and register [here](#).

#### **March:**

***Webinar on Cyanotoxins, Nutrients and Public Health*** - Explore the intricacies of cyanotoxins as they relate to nutrient loading and public health from the comfort of your home or office during this one-hour webinar. We'll expand on the stories in the Fall 2016 issue of Headwaters magazine and hear from experts who have been addressing nonpoint source pollution and nutrient reduction to prevent cyanotoxin-producing algal blooms.

#### **April:**

***Annual Climate and Colorado's Water Future Workshop*** - Learn about Colorado's variable climate and its tie to Colorado's water resource management and planning forecasts during this perennially popular day-long offering.

#### **June:**

***Urban Waters Bike Tours*** - Join us on June 5 and 6 in the Denver Metro area for the FREE annual Urban Waters Bike Tour, which explores urban water management challenges unique to urban areas. The tour will be led this year by the Barr Lake and Milton Reservoir Watershed Association.

***Annual Basin Tour - Southwest Basin*** - Jump on CFWE's tour bus to join 50-60 other interested citizens, water professionals and decision makers as we spend two days traversing through this beautiful corner of the state and gain an up-close perspective of water management in the San Miguel River and Dolores River watersheds.

***Headwaters Magazine Summer 2017 issue*** - Look forward to the next issue of Headwaters magazine focused on open source data and data for water decision making and planning. We'll cover how water data is currently collected, analyzed and shared, and look at innovative applications for data that are advancing the way we manage the resource.

#### **Connect with us!**

Program details, registration and digital archives of all past publications, radio shows and webinars are available on CFWE's website [yourwatercolorado.org](http://yourwatercolorado.org) as they become available. Subscribe to the CFWE email list at [yourwatercolorado.org/register](http://yourwatercolorado.org/register) to receive Headwaters PULSE monthly e-newsletter as well as announcements and reminders about upcoming events.
