i. Obligations and Rights

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and sub-Grants with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or sub-Grants. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All materials owned by the State in the possession of Grantee shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

ii. Payments

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

iii. Damages and Withholding

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part.

Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

ii. Obligations and Rights

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

iii. Payments

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made.

Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

C. Remedies Not Involving Termination

The State, its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

ii. Withhold Payment

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Demand removal of any of Grantee's employees, agents, or Sub-grantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

v. Intellectual Property

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option (a) obtain for the State or Grantee the right to use such products and services; (b) replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, (c) if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

Grantee shall be notified following each performance Evaluation and Review, and shall address or correct any identified problem in a timely manner and maintain work progress.

Should the final performance Evaluation and Review determine that Grantee demonstrated a gross failure to meet the performance measures established hereunder, the Executive Director of the Colorado Department of Personnel and Administration (Executive Director), upon request by the CWCB, and showing of good cause, may debar Grantee and prohibit Grantee from bidding on future Grants. Grantee may contest the final Evaluation, Review and Rating by: (a) filing rebuttal statements, which may result in either removal or

Statement of Work

WATER ACTIVITY NAME – Lake Canal/Nature Conservancy/Fort Collins Natural Areas In-stream flow Demonstration Project

TASK 1 – Lake Canal Direct Flow Historic Use Analysis

Description of Task

Identify individual Lake Canal shareholders who wish to participate in temporary fallowing and/or deficit irrigation practices to conserve consumptive use water for use outside the ditch company service area. Identify a representative study period for the Lake Canal system for the purpose of determining the historic consumptive use of the crops grown under that system, as well as the surface and subsurface return flow pattern.

Method/Procedure

1. Coordinate with the Lake Canal Board of Directors to identify willing participants in the study.
2. Determine the historic conveyance loss for the Lake Canal direct flow right. This volume will be maintained in the canal for the benefit of non-participating shareholders.
3. Establish the historic consumptive use and return flow pattern associated with the Lake Canal direct flow right. It is anticipated that climate data from the Northern Colorado Water Conservancy District will be used, in conjunction with the ASCE standard ET methodology. Diversion data will use information available through the State CDSS database.

Deliverable

Memo report to CWCB, Division 1, the SEO, and the other study partners. Will serve as the basis of the IWSA plan of operation.

TASK 2 – IWSA Plan of Operation

Description of Task

The IWSA plan of operation will detail how the proposed water transfer will operate, including daily diversion rate, planned timing and location of surface return flow replacement operations, and the planned timing and location of subsurface return flow replacement operations, including facility locations, Glover parameters, and a schedule of lagged accretions back to the river. This plan will set forth an accounting form and procedure necessary to document the operation of the plan and to demonstrate that plan operations are non-injurious to other water rights in the basin.

Method/Procedure

The IWSA plan of operation will be prepared in accordance with the IWSA regulation and the standard set by substitute water supply plans routinely submitted to the State and Division Engineers for review.

1. Identify and map participating farms, alternative agricultural practices, and the locations of measurement devices.
2. Forecast the proposed operations during the 2011 irrigation season, including:
 - a. Anticipated total diversions at Lake Canal, based on historic data.
 - b. Proposed in-stream flow rate/volume, and river conveyance loss calculations to calling water rights between the Lake Canal and Greeley No. 3 diversions.
 - c. Anticipated surface and sub-surface delivery schedule and projected accretions to the river during 2011.
 - d. Anticipated schedule for flow measurement at Cache la Poudre at Boxelder gaging station
3. Develop a weekly accounting methodology for submittal to the Division 1 Engineer during the 2011 irrigation season.

Deliverable

An IWSA plan of operation, prepared in accordance with the IWSA rules and requirements. This document will be submitted to the State and Division Engineers, as well as the Division 1 SWSP notification list, in accordance with the IWSA requirements.

TASK 3 – Evaluation of Alternative Agricultural Practices and Instrumentation of Lake Canal infrastructure and farms to support IWSA operations

Description of Task

The Lake Canal diversion, surface return flow station, and subsurface return flow recharge location(s) will be instrumented in accordance with Division Engineer and Water Commissioner requirements. Additionally, on-farm instrumentation will be provided, as needed, according to the alternative agricultural practices proposed for the 2011 season.

Method/Procedure

1. Alternative agricultural practices:
 - a. Farm optimization software will be provided to Lake Canal shareholders to evaluate whether they will participate in the program, and what alternative agricultural practices they may wish to utilize.
2. Provide and install on-farm instrumentation, in accordance with the proposed agricultural practices and the requirements of the Division Engineer.
3. Provide and install in-stream flow bypass, surface water return, and sub-surface return flow recharge instrumentation, in accordance with Division Engineer requirements.

4. Reporting and administration software will be provided to collect/collate data on a near real-time basis to support verification and weekly accounting requirements to the Division Engineer.
5. Mapping to support Task 2.

Deliverable

Installed software and hardware. A status memo to the Division Engineer, CWCB, and project participants detailing the installed measurement equipment, locations, and operational protocol.

TASK 4 – Preparation of a Template IWSA agreement

Description of Task

An IWSA template agreement will be prepared and distributed to the project participants, Lake Canal Company, Fort Collins Natural Areas, and the Nature Conservancy. The template will specifically address the terms and conditions of performance, in addition to the general requirements of the IWSA relative to statute.

Individual legal counsel for the participants will review and modify the agreement, as needed, but these fees are not included in the grant request.

Deliverable

A template IWSA agreement will be provided to the parties in the proposed lease, in addition to the CWCB and the State and Division Engineers, in conjunction with the IWSA plan of operation. The parties to the proposed lease will negotiate the final terms of the agreement, and this final document will be similarly distributed.

TASK 5 – IWSA Operations

Description of Task

The Lake Canal diversion will be operated to bypass a portion of the consumptive use associated with the direct flow water right

Method/Procedure

1. At the start of the 2011 direct flow irrigation season, Lake Canal will bypass a portion of their diversion in accordance with the IWSA plan of operation prepared in Task 2.
2. Climate data will be collected and ET data will be reported on a daily basis to support both deficit irrigation planning and accounting for Lake Canal deficit irrigators.
3. Using the reporting/administration software, diversion, headgate, surface return, and subsurface return flow deliveries will be reported on a near-real time basis.
4. Weekly accounting will be prepared and submitted to the Division Engineer.

5. Flow measurements will be conducted 2 to 3 times per month, in conjunction with the Water Commissioner's needs, to provide flow and rating curve information sufficient to allow bypassed flows to be shepherded to the Greeley No. 3 diversion.
6. Lease payments will be made directly from Fort Collins Natural Areas and the Nature Conservancy to the Lake Canal Company for distribution to participating shareholders.

Deliverable

In-stream flow deliveries to the Cache la Poudre River, with accompanying lease payments to the Lake Canal Company. Daily ET computations and weekly accounting reports to the Division Engineer, in accordance with the requirements of the Task 2 IWSA plan of operation.

TASK 6 – Identification of Positive and Negative Program Characteristics from Farmers and Institutional Participants and Partners

Description of Task

A key consideration in the success of this program and the ability to scale this effort to larger, long-term transfers in the future is understanding and communicating the positive attributes of the project, while revising the process to address negative impressions or outcomes which may result. This task will involve interviews with key project participants and regulatory authorities to discover what elements of the program were positive, to determine what issues and concerns were discovered during the process, and to gain suggestions about what improvements could be made to the process to enhance the success of future efforts.

As discussed above, we believe that this project has the potential to spin off a number of subsequent efforts. In particular, the project may illustrate a way for the City of Fort Collins to consider a "check-off" program to support the acquisition or lease of water to dedicate to in-stream flow uses. A 2008 study funded by USDA and conducted by CSU researchers found that citizens in 17 western states are willing to pay more for household water if it means avoiding the displacement of agriculture.

Method/Procedure

The Colorado Water Institute will engage with the direct and peripheral project participants to address these issues. It is anticipated that this engagement will occur via a series of meetings or teleconference calls, either individually or in small groups, as appropriate. The issues interviews will include the following people, at a minimum:

- The Lake Canal Board of Directors – representing the Company and non-participating shareholders
- Participating Lake Canal shareholders
- Lake Canal superintendent and operations personnel
- Lake Canal legal counsel
- The Nature Conservancy and legal counsel
- City of Fort Collins Natural Areas

- City of Fort Collins Utilities
- City of Fort Collins City Manager's Office and Attorneys Office
- Division 1 Engineer and staff
- Division 1 - District 3 Water Commissioner
- State Engineer and/or staff
- CWCB Project Manager
- CWCB In-stream Flow Program staff
- Opposers to the IWSA, if applicable.
- Interested parties – Environmental groups or others

Deliverable

Meeting notes and a final report to CWCB and the project participants will summarize the results of the interviews, as well as identify common trends or traits in participant impressions.

TASK 7 – Reporting and Final Deliverable

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the statement of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.
