

Project Description

The Town of Windsor was incorporated in 1890 and adopted its Home Rule Charter in 2003. The Town's Water Activity Enterprise was created by a Town Ordinance in 1994 and serves approximately 5,600 taps (2013). The Town has seen tremendous growth over the last decade and has a current population of approximately 18,700 people. The Town purchased a lined gravel pit known as Kyger Reservoir in 2014 to increase its water supply storage. Construction of the inlet, outlet, and conveyance structures occurred from fall 2016 through winter 2017. This infrastructure allows the Town to divert from the river to gravity fill the reservoir, and also to reverse flow and pump to the river from the reservoir to make releases. CWCB Loan funds went to the purchase of the reservoir and infrastructure construction. Based on a sonar survey, the Project added 1,257 acre-feet of usable storage capacity for the Town.

P R O J E C T D A T A		
<i>Sponsor:</i> Town of Windsor	<i>County:</i> Larimer & Weld	<i>Water Source:</i> Cache la Poudre
<i>Type of Loan:</i> Reservoir Construction		<i>Board Approval Date:</i> September 2013
<i>Terms of Loan:</i> \$4,545,000 at 2.75% for 20 years		
<i>Design Engineer:</i> Wenck Associates		
<i>Contractor:</i> Moltz Constructors		
<i>Project Elements:</i> Purchase of lined gravel pit. Construction of river diversion with overshot gate, pipelines, pumps, reservoir inlet/outlet structure.
