If the Work cannot be brought into conformance by re-performance or other corrective measures, the State may require Grantee to take necessary action to ensure that future performance conforms to Grant requirements and exercise the remedies available under this Grant, at law or inequity in lieu of or in conjunction with such corrective measures.

C. Monitoring

11. CONFLICTS OF INTEREST

Grantee shall not engage in any business or personal activities or practices or maintain any relationships which conflict in any way with the full performance of Grantee's obligations hereunder. Grantee acknowledges that with respect to this Grant, even the appearance of a conflict of interest is harmful to the State's interests. Absent the State's prior written approval, Grantee shall refrain from any practices, activities or relationships that reasonably appear to be in conflict with the full performance of Grantee's obligations to the State hereunder. If a conflict or appearance exists, or if Grantee is uncertain whether a conflict or the appearance of a conflict of interest exists, Grantee shall submit to the State a disclosure statement setting forth the relevant details for the State's consideration. 14. BREACH

A. Defined

In addition to any breaches specified in other sections of this Grant, the failure of either Party to perform any of its material obligations hereunder, in whole or in part or in a timely or satisfactory manner, constitutes a breach. The institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Grantee, or the appointment of a receiver or similar officer for Grantee or any of its property, which is not vacated or fully stayed within 20 days after the institution or occurrence thereof, shall also constitute a breach.

B. Notice and Cure Period

In the event of a breach, notice of such shall be given in writing by the aggrieved Party to the other Party in the manner provided in §16. If such breach is not cured within 30 days of receipt of written notice, or if a cure cannot be completed within 30 days, or if cure of the breach has not begun within 30 days and pursued with due diligence, the State may exercise any of the remedies set forth in §15. Notwithstanding anything to the contrary herein, the State, in its sole discretion, need not provide advance notice or a cure period and may immediately terminate this Grant in whole or in part if reasonably necessary to preserve public safety or to prevent immediate public crisis.

15. REMEDIES

If Grantee is in breach under any provision of this Grant, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Grant following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

A. Termination for Cause and/or Breach

If Grantee fails to perform any of its obligations hereunder with such diligence as is required to ensure its completion in accordance with the provisions of this Grant and in a timely manner, the State may notify Grantee of such non-performance in accordance with the provisions herein. If Grantee thereafter fails to promptly cure such non-performance within the cure period, the State, at its option, may terminate this entire Grant or such part of this Grant as to which there has been delay or a failure to properly perform. Exercise by the State of this right shall not be deemed a breach of its obligations hereunder. Grantee shall continue performance of this Grant to the extent not terminated, if any.

i. Obligations and Rights

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and subcontracts with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or subcontracts. Upon

termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All materials owned by the State in the possession of Grantee shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

ii. Payments

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

iii. Damages and Withholding

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

B. Early Termination in the Public Interest

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

ii. Obligations and Rights

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

iii. Payments

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made. Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

C. Remedies Not Involving Termination

The State, in its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

i. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

ii. Withhold Payment

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

iii. Deny Payment

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

iv. Removal

Demand removal of any of Grantee's employees, agents, or Subgrantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

v. Intellectual Property

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option **(a)** obtain for the State or Grantee the right to use such products and services; **(b)** replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, **(c)** if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

Grantee's performance shall be subject to Evaluation and Review in accordance with the terms and conditions of this Grant, State law, including CRS §24-103.5-101, and State Fiscal Rules, Policies and Guidance. Evaluation and Review of Grantee's performance shall be part of the normal Grant administration process and Grantee's performance will be systematically recorded in the statewide Grant Management System. Areas of Evaluation and Review shall include, but shall not be limited to quality, cost and timeliness. Collection of information relevant to the performance of Grantee's obligations under this Grant shall be determined by the specific requirements of such obligations and shall include factors tailored to match the requirements of Grantee's obligations. Such performance information shall be entered into the statewide Grant Management System at intervals established herein and a final Evaluation, Review and Rating shall be rendered within 30 days of the end of the Grant term. Grantee shall be notified following each performance Evaluation and Review, and shall address or correct any identified problem in a timely manner and maintain work progress.

Should the final performance Evaluation and Review determine that Grantee demonstrated a gross failure to meet the performance measures established hereunder, the Executive Director of the Colorado Department of Personnel & Administration (Executive Director), upon request by the CWCB, and showing of good cause, may debar Grantee and prohibit Grantee from bidding on future Grants. Grantee may contest the final Evaluation, Review and Rating by: **(a)** filing rebuttal statements, which may result in either removal or correction of the evaluation (CRS §24-105-102(6)), or **(b)** under CRS §24-105-102(6), exercising the debarment protest and appeal rights provided in CRS §§24-109-106, 107, 201 or 202, which may result in the reversal of the debarment and reinstatement of Grantee, by the Executive Director, upon a showing of good cause.

INTRODUCTION AND BACKGROUND

Provide a brief description of the project. (Please limit to **no more than 200 words**; this will be used to inform reviewers and the public about your proposal)

This project will identify collaborative approaches to meeting diverse storage needs in the Cucharas Basin. Listed as project #ARK-2015-0007, this Cucharas Collaborative Storage Study is one of 13 storage projects within the Cucharas basin which are on the Arkansas BIP's Master Needs list. Over two years ago the Division Engineer recommended this collaboration in lieu of each proponent chasing its own project. In early 2015, ten storage stakeholders formed the Cucharas Storage Collaborative to investigate one or more joint projects to meet the basin's storage needs. In large part, such projects are necessitated by the aged nature of existing storage infrastructure. Some 83% of significant storage structures, containing 99% of historical storage capacity, were constructed before the end of World War II. Approximately 71% of all such capacity has been lost due to abandonment or restriction.

This project will, at a reconnaissance level (1) assess the storage needs of all collaborative members and other stakeholders and (2) develop options for collaborative storage development including, for example, the consolidation, rehabilitation or decommissioning of existing facilities and the construction of new multi-use reservoirs.

OBJECTIVES

List the objectives of the project

The project's objectives are to assist the collaborators in (1) arriving at the most efficient and effective configuration of storage infrastructure in the Cucharas Basin that will meet all of their needs, and (2) reducing the cost of eventual storage remediation and construction to a responsible minimum.

TASKS

Provide a detailed description of each task using the following format

TASK 1 – Storage Needs Assessment

Description of Task

Using a qualified consultant, inventory, analyze, and evaluate all storage needs (M&I, recreation, agriculture, environmental, flood control, etc.) of all members of the Cucharas Basin Collaborative, together with those other water users and stakeholders as may be identified by the Collaborative.

Method/Procedure

Inventory. Conduct the inventory by literature review, review of previous analyses conducted or commissioned by the Collaborators, interviews of designated representatives of each Collaborative member, site visits to existing storage facilities, and input from public stakeholder meetings held within the basin (including within the village of Cuchara, the Town of La Veta, and the City of Walsenburg).

Analysis. Analyze the adequacy of existing storage held by each Collaborator by:

- Estimate the monthly estimated firm yield of its current direct flow water rights with respect to its current monthly demand and 2050 anticipated demand.
- In the event the direct flow rights' estimated firm yield is inadequate to meet those demands, determine the amount of storage needed to provide a firm yield adequate to do so.
- In the event that storage is needed to meet current and 2050 demands, determine whether the firm yield of current storage rights at their existing storage facilities is adequate to do so.
- In the event that the estimated firm yield of existing storage is inadequate:
 - Quantify on a monthly and annual basis the additional firm yield from storage necessary to meet the Collaborator's current and 2050 demands.
 - Determine whether that additional estimated firm yield can be met
 - From the expansion or repair of the Collaborator's existing storage facilities,
 - From one or more new storage facilities, or
 - By conservation measures, where appropriate, based on an investigation of each Collaborator's collection and distribution system (including adequate site visits and the review of any appropriate documentation). Any recommendation of conservation measures must be specific for each system and include their cost as well as their effectiveness.

Deliverables

Deliverables will consist of written assessments (in hardcopy and electronic form) of all identified storage needs of each Collaborative member, including a summary and matrix

showing the amount, type, timing, and location of all such needs, together with any recommended conservation measures. The assessments shall include a reconnaissance level cost estimate for the remediation or construction of each storage facility or conservation measure addressed.

At least two public meetings will be conducted within the Cucharas basin to present the findings contained in the foregoing assessments and to receive further input regarding their subject matter. As appropriate, the input from the public meetings will be incorporated into the reports, and the reports will be reissued in final form. The assessments shall be adequate to provide detailed direction to Task 2, Storage Study, described below.

TASK 2 – Storage Study

Description of Task

Using a qualified consultant, complete a reconnaissance-level study to identify and describe with specificity the feasible storage options available to Collaborative members and to meet all other basin storage needs identified by the Collaborative.

Method/Procedure

Conduct a reconnaissance-level engineering and legal analysis necessary to determine those feasible storage options available to each Collaborative member to meet its own current and future storage needs, as well as those of the basin as a whole as may be directed by the Collaborative.

- The options may include, for example, the consolidation of storage rights into a common storage structure, the remediation or the decommissioning of existing structures, the use of joint structures with other collaborators, or the construction of specified new storage infrastructure for the use of one or more collaborators.
- Conduct water allocation modeling, using CDSS data/tools where appropriate and working with the CWCB/DWR staff to make sure the effort complements CDSS:
 - Complete a water budget for the Cucharas River, including an inventory of all municipal, irrigation, industrial, recreational and environmental demands and consumptive uses by means of *StateWB* (available from CWCB) or a compatible model approved by CWCB, using inflow, outflow, and change-in-storage information to generate an overall water budget or water balance summary, current and future (2050), for the Cucharas basin. In doing so:
 - Review all compiled data to determine what is currently available and what must be researched and generated.
 - Identify the historic water demand (actual usage) on a monthly basis for each of the foregoing uses during the period 2005-2015 and as projected for 2050.
 - Prepare a written summary of key municipal, irrigation, industrial, and recreational water demands.
 - Graphically depict the Cucharas River's monthly high, low, and mean flow, as well as the total annual flow for the period 1965-2015.

- Conduct water resources planning modeling using *StateMod* covering the Cucharas mainstem and those tributaries from which the Collaborators' storage facilities derive their supplies.
 - Assess potential future water availability using records of historical water supplies, as well as the climate change analysis described below.
 - A qualified consultant will be engaged to create a *StateMod* model for the Cucharas, working with CWCB/DWR staff to make sure the planning model can be incorporated as an independent tributary model into the ArkDSS without wasting time duplicating that work. In doing so:
 - Identify (name and GPS coordinates) all current sources, diversions and storage for municipal, irrigation, industrial, and recreational systems and associated infrastructure.
 - Identify the water rights associated with each feature identified above.
 - An approach will be required to incorporate the effect of downstream water rights on administration of Cucharas basin water rights in the water planning model.
 - Simulate existing water rights to meet historical diversions and reservoir storage contents. The extent the model is able to replicate historical conditions will be analyzed on a monthly and annual basis to ensure demands, supplies and operations are adequately represented in the model.
 - The water resources planning modeling may be required to be conducted in conjunction with the Division Engineer's Office under BIP project #ARK-2015-0004 (futile call modeling), which is anticipated to be in progress simultaneously with this project.
 - Prepare a straight-line diagram of all water rights diverting or storing water from the Cucharas River and its tributaries.
- Climate change analysis, using tools and techniques developed by or based on previous analyses approved for use by CWCB.
 - The climate change analysis will include the selection, with the consent of the Collaborative, of climate change projections used for generation of future hydrologic data in the Cucharas basin.
 - Analysis of current and future changes in water supply will be accomplished through the use of the climate change-scenario hydrologic data and the *StateMod* planning model. Under current and future hydrology, a subset of the storage alternatives identified in Task 1 will be simulated in the model to estimate the amount of firm yield available from the alternatives to meet the Collaborative members' current and future demands.

- With anticipated earlier spring runoff and earlier late-seasonal flows, storage is even more important. The study should contrast historical flows with future flows as projected for 2050.
 - Provide a technical report documenting methodology, approaches, and results (plots, graphs) of model development and the analysis' results.
- Benefit:Cost Analyses as bases of recommendations:
 - Storage project alternatives will be evaluated in terms of benefit:cost to prioritize them for investment by the Collaborators.
 - Benefits will include identified storage needs (from Task 1), and associated values, which could be met by a given dam/reservoir project;
 - Costs will include all deferred maintenance & repairs, on-going O&M, risk of dam failure, risk of SEO storage restriction, evaporation, etc. for each dam and associated system (pipelines, pumps, canals, etc.).
 - The benefit:cost analyses will be conducted for the entire basin considering a variety of alternatives selected by the Collaborative. For example:
 - One alternative might be that each stakeholder in the basin builds/maintains its own storage projects; another alternative might comprise several regional storage projects.
 - One alternative could be to rehabilitate existing storage facilities (with associated inefficiencies in their systems) vs. another alternative to construct new, better planned storage infrastructure and combinations thereof.
 - The benefit:cost values will be shown both for the entire basin and for individual Collaborators.
 - The purpose of the benefit:cost analyses is to create a plan to assist Collaborators in selecting wise storage structure investments, instead of simply reacting by repairing century-old dams whenever problems develop.
- Based on the foregoing
 - Develop recommendations for each Collaborator regarding how it might best meet its current and future storage needs, including recommended approaches to physical storage;
 - Recommend any opportunities for joint storage, allowing two or more Collaborators to meet their individual storage needs.
- For each recommendation, provide a description and explanation as well as an estimate of costs of:
 - How existing water rights portfolio of each Collaborator should be modified to accomplish such storage.
 - Those necessary permits or governmental permissions, e.g. § 404 permit, HB 1041 permits, SEO approval, *etc.*

- Likely sources of funding.

Deliverables

A written report, in hardcopy (for each Collaborative member) and in electronic form of storage options (including their costs), which will be the basis to proceed to feasibility studies of those storage options available to, and which may be selected by, members of the Collaborative. The draft report will be the subject of three oral presentations at meetings of the Collaborative members and other stakeholders held at locations in the basin selected by the Collaborative. Stakeholder comments will be incorporated into the report, as appropriate, for inclusion in the final report.

TASK 3 – Contract Administration

Description of Task

Using a qualified person, insure the timely accomplishment of contract tasks and the submission of required reports under the grant contract.

Method/Procedure

In light of the limited resources of the Collaborators, contract administration will be primarily handled by the regular part-time Administrator of the Huerfano County Water Conservancy District, who has successfully administered other CWCB grants and loans for the District. However, the time requirements of administration of this grant far exceed the District Administrator's time for which she is now compensated. The amount budgeted for this task will be used to compensate the Administrator for additional time spent on this grant.

Deliverable

Timely submission of all reports and deliverables required by the grant contract.

REPORTING AND FINAL DELIVERABLE

Reporting: The applicant shall provide the CWCB a progress report every 6 months, beginning from the date of the executed contract. The progress report shall describe the completion or partial completion of the tasks identified in the statement of work including a description of any major issues that have occurred and any corrective action taken to address these issues.

Final Deliverable: At completion of the project, the applicant shall provide the CWCB a final report that summarizes the project and documents how the project was completed. This report may contain photographs, summaries of meetings and engineering reports/designs.

BUDGET

Provide a detailed budget by task including number of hours and rates for labor and unit costs for other direct costs (i.e. mileage, \$/unit of material for construction, etc.). A detailed and perfectly balanced budget that shows all costs is required for the State's contracting and purchase order processes. Sample budget tables are provided below. Please note that these budget tables are examples and will need to be adapted to fit each individual application. Tasks should correspond to the tasks described above.

SCHEDULE

Provide a project schedule including key milestones for each task and the completion dates or time period from the Notice to Proceed (NTP). This dating method allows flexibility in the event of potential delays from the procurement process. Sample schedules are provided below. Please note that these schedules are examples and will need to be adapted to fit each individual application.

Task	Start Date	Finish Date
Select Consultant	Upon NTP	NTP + 90 days
1 - Assessment	NTP + 90 days	NTP + 180 days
2- Study	NTP + 180 days	NTP + 385 days
	PROJECT CLOSE OUT	NTP + 750 DAYS - December 31, 2017

NTP = Notice to Proceed

PAYMENT

Payment will be made based on actual expenditures and invoicing by the applicant. Invoices from any other entity (i.e. subcontractors) cannot be processed by the State. The request for payment must include a description of the work accomplished by major task, and estimate of the percent completion for individual tasks and the entire water activity in relation to the percentage of budget spent, identification of any major issues and proposed or implemented corrective actions. The last 5 percent of the entire water activity budget will be withheld until final project/water activity documentation is completed. All products, data and information developed as a result of this grant must be provided to the CWCB in hard copy and electronic format as part of the project documentation. This information will in turn be made widely available to Basin Roundtables and the general public and help promote the development of a common technical platform.
