If Grantee is in breach under any provision of this Grant, the State shall have all of the remedies listed in this §15 in addition to all other remedies set forth in other sections of this Grant following the notice and cure period set forth in §14(B). The State may exercise any or all of the remedies available to it, in its sole discretion, concurrently or consecutively.

**A. Termination for Cause and/or Breach**

If Grantee fails to perform any of its obligations hereunder with such diligence as is required to ensure its completion in accordance with the provisions of this Grant and in a timely manner, the State may notify Grantee of such non-performance in accordance with the provisions herein. If Grantee thereafter fails to promptly cure such non-performance within the cure period, the State, at its option, may terminate this entire Grant or such part of this Grant as to which there has been delay or a failure to properly perform.

Exercise by the State of this right shall not be deemed a breach of its obligations hereunder. Grantee shall continue performance of this Grant to the extent not terminated, if any.

**i. Obligations and Rights**

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance hereunder past the effective date of such notice, and shall terminate outstanding orders and subcontracts with third parties. However, Grantee shall complete and deliver to the State all Work, Services and Goods not cancelled by the termination notice and may incur obligations as are necessary to do so within this Grant's terms. At the sole discretion of the State, Grantee shall assign to the State all of Grantee's right, title, and interest under such terminated orders or subcontracts. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee in which the State has an interest. All materials owned by the State in the possession of Grantee shall be immediately returned to the State. All Work Product, at the option of the State, shall be delivered by Grantee to the State and shall become the State's property.

**ii. Payments**

The State shall reimburse Grantee only for accepted performance up to the date of termination. If, after termination by the State, it is determined that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest and the rights and obligations of the Parties shall be the same as if this Grant had been terminated in the public interest, as described herein.

**iii. Damages and Withholding**

Notwithstanding any other remedial action by the State, Grantee also shall remain liable to the State for any damages sustained by the State by virtue of any breach under this Grant by Grantee and the State may withhold any payment to Grantee for the purpose of mitigating the State's damages, until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due to Grantee as the State deems necessary to protect the State, including loss as a result of outstanding liens or claims of former lien holders, or to reimburse the State for the excess costs incurred in procuring similar goods or services. Grantee shall be liable for excess costs incurred by the State in procuring from third parties replacement Work, Services or substitute Goods as cover.

**B. Early Termination in the Public Interest**

The State is entering into this Grant for the purpose of carrying out the public policy of the State of Colorado, as determined by its Governor, General Assembly, and/or Courts. If this Grant ceases to further the public policy of the State, the State, in its sole discretion, may terminate this Grant in whole or in part. Exercise by the State of this right shall not constitute a breach of the State's obligations hereunder. This subsection shall not apply to a termination of this Grant by the State for cause or breach by Grantee, which shall be governed by §15(A) or as otherwise specifically provided for herein.

**i. Method and Content**

The State shall notify Grantee of such termination in accordance with §16. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Grant.

**ii. Obligations and Rights**

Upon receipt of a termination notice, Grantee shall be subject to and comply with the same obligations and rights set forth in §15(A)(i).

**iii. Payments**

If this Grant is terminated by the State pursuant to this §15(B), Grantee shall be paid an amount which bears the same ratio to the total reimbursement under this Grant as the Services satisfactorily performed bear to the total Services covered by this Grant, less payments previously made.

Additionally, if this Grant is less than 60% completed, the State may reimburse Grantee for a portion of actual out-of-pocket expenses (not otherwise reimbursed under this Grant) incurred by Grantee which are directly attributable to the uncompleted portion of Grantee's obligations hereunder; provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

**C. Remedies Not Involving Termination**

The State, in its sole discretion, may exercise one or more of the following remedies in addition to other remedies available to it:

**i. Suspend Performance**

Suspend Grantee's performance with respect to all or any portion of this Grant pending necessary corrective action as specified by the State without entitling Grantee to an adjustment in price/cost or performance schedule. Grantee shall promptly cease performance and incurring costs in accordance with the State's directive and the State shall not be liable for costs incurred by Grantee after the suspension of performance under this provision.

Withhold payment to Grantee until corrections in Grantee's performance are satisfactorily made and completed.

**iii. Deny Payment**

Deny payment for those obligations not performed, that due to Grantee's actions or inactions, cannot be performed or, if performed, would be of no value to the State; provided, that any denial of payment shall be reasonably related to the value to the State of the obligations not performed.

**iv. Removal**

Demand removal of any of Grantee's employees, agents, or Subgrantees whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable, or whose continued relation to this Grant is deemed to be contrary to the public interest or not in the State's best interest.

**v. Intellectual Property**

If Grantee infringes on a patent, copyright, trademark, trade secret or other intellectual property right while performing its obligations under this Grant, Grantee shall, at the State's option **(a)** obtain for the State or Grantee the right to use such products and services; **(b)** replace any Goods, Services, or other product involved with non-infringing products or modify them so that they become non-infringing; or, **(c)** if neither of the foregoing alternatives are reasonably available, remove any infringing Goods, Services, or products and refund the price paid therefore to the State.

## **Exhibit A – Statement of Work, Detailed Budget, and Proposed Schedule** Updated 3/4/15

**WATER ACTIVITY NAME - Rural Elbert County Well-Monitoring Network**

**GRANT RECIPIENT - Elbert County Board of County Commissioners**

**FUNDING SOURCE - Statewide, South Platte & Metro BRT accounts, plus 33% matching USGS funds**

### **INTRODUCTION AND BACKGROUND -**

Elbert County is near the center of Colorado, along the Front Range, extending from southeast of Denver toward Colorado Springs (Fig. 1). Elbert County encompasses 1,850 square miles of foothills and plains, with a population of 24,000 distributed among 7,000 households. A majority of the county lies in the South Platte Basin, the basin with the State's largest projected water supply gap. Most of the water needs of Elbert County are drawn from the Denver Basin aquifers (Fig. 2).

The long-term vitality of Elbert County depends on a reliable water supply. However, the main water supply is being depleted, water demand is increasing, and the long-term sustainability of the non-renewable groundwater supply of the Denver Basin groundwater aquifers is not well understood.

While remaining rural on the eastern side, the western side of Elbert County is becoming more urban where a majority of the population commutes to the metro Denver area to work. The towns of Elizabeth, Kiowa and Simla are incorporated, and the smaller towns of Agate, Elbert and Matheson remain unincorporated.

Elbert County government is committed to planning for an adequate water supply for Elbert County's future agricultural, municipal and industrial needs. This study focuses on the status of these deep groundwater aquifers in Elbert County, to better understand the implications of continued reliance on these deep groundwater aquifers and Elbert County's role in the State's water supply gap.

### **STUDY APPROACH**

The project will establish a well network for long-term monitoring of groundwater levels in the Denver Basin aquifers throughout Elbert County and use the network to collect frequent groundwater-level data for a minimum of 3 years. The network will utilize about 30 existing domestic and monitoring wells and will include wells completed in each of the Denver Basin aquifer units – the Dawson, Denver, Arapahoe, and Laramie-Fox Hills aquifers. Existing information about hydrogeologic conditions and areas of concern will be considered in selecting the wells for monitoring and designing the network. The Colorado Division of Water Resources (CDWR) currently measures annual water levels in 27 bedrock wells within Elbert County. These wells will be considered for suitability in the long-term network. Domestic or monitoring wells are preferred over municipal wells because the water levels in large-capacity municipal wells are generally affected by pumping from the well. Groundwater levels will be measured bi-monthly in all wells, and a portion of the wells will be instrumented with pressure transducers and data loggers to record more frequent water-level measurements. This grant request will help fund the US Geological Survey (USGS) in setting up the program and performing three years of monitoring.

### **OBJECTIVES**

Elbert County relies heavily on non-renewable groundwater from the Denver Basin aquifers for water supply. Population growth in the county places increasing demands on groundwater resources, and future groundwater withdrawals are expected to increase as the population continues to grow. The objectives of this study are to:

1. Utilize water-level monitoring data to evaluate the long-term water-level trends in the Denver Basin aquifers in Elbert County, and identify the rate of change of groundwater water levels over time in various parts of the county.
2. Provide data to assist county decision makers in understanding which areas of the county are most susceptible to water-level decline.
3. Help in understanding the extent to which Elbert County can continue to rely on Denver Basin water.
4. Identify the urgency of other measures such as importing renewable water.
5. Better define Elbert County's share of the gap in the South Platte and Arkansas Basins.

#### **TASKS:**

---

##### **TASK 1: SELECT WELLS FOR MONITORING**

Description of Task: Existing aquifer and well location maps will be overlain by simulated drawdown maps to assist in identifying areas of interest for future water-level monitoring. This task will utilize existing State, county, and USGS maps, and will involve site visits to wells identified as suitable for water-level monitoring.

Deliverable: After targeted monitoring areas are identified, available county and state resources will be used to identify potential water-level monitoring sites. Potential sites will be identified based on the location, perforated interval, full completion within individual formations, and completeness of the available record. To assist in record management and to aid in the field investigation, digital well records will be hyper-linked to the respective well sites in a GIS data set of wells for Elbert County.

##### **TASK 2: ESTABLISH NETWORK SITES**

Description of Task: Final selection will be based on well screened interval, well access, primary use, frequency of use, and well owner voluntary participation & cooperation. Wells are considered suitable for water-level monitoring if the screened-interval depth and well-construction materials are known from well-drilling records and if the well can be accessed.

Deliverable: Once sites are selected for monitoring, the surrounding area, well head, access port, and measuring point will be photographed for the well record, and the well location and elevation of the well head will be measured to within 1 foot using a high precision GPS unit.

##### **TASK 3: START MEASURING WATER LEVELS**

Description of Task: Measure water levels in selected wells on a frequent basis. Wells will be selected for transducer installation on the basis of well-completion interval and water use. If possible, inactive or abandoned wells will be used for pressure-transducer monitoring.

Deliverable: All site information and water-level data will be entered into the USGS NWIS database. This task includes reviewing the field data forms for accuracy, establishing the sites in the NWIS database, preparing site files, and entering the monthly water-level data into the NWIS database. After each round of water-level measurements, hydrographs will be produced and reviewed to ensure that the selected wells are providing reliable data.

**TASK 4: SEMI- ANNUAL STATUS REPORT**

Description of Task: Describe project progress, and compile & consolidate well monitoring data collected in a semi-annual report to CWCB & Elbert County in July and January of each year, including any GIS data sets and associated metadata generated during the project, in a standardized format, which will also be accessible to the public through the internet.

Deliverables: Semi-annual status reports to the CWCB and to Elbert County in July and January of each year, including consolidated data in a standardized format, together with any GIS data sets generated during the project, which will also be made publicly accessible through the internet.

**REPORTING AND FINAL DELIVERABLE:** The Final Report will be a standard USGS Scientific Investigation Report (SIR), including a summary of the project, and how the project was completed, methods of investigation, description of the study area, description of the monitoring network and groundwater levels measured, a comparison of the results to other existing data & studies, and an evaluation of any significant trends in observed or projected groundwater levels, and recommendations based on the well-monitoring project. The Final Report will be delivered to the CWCB and Elbert County, and made publicly accessible through the internet. Any GIS data sets and associated metadata generated during the project will also be provided as deliverables, and will also be accessible to the public through the internet. This report may contain photographs, summaries of meetings and engineering reports/designs.

**OUTCOME/PRODUCT**

All groundwater-level data collected for the study will be entered into the USGS National Water Information System (NWIS) and will be available through the internet. In addition, the USGS will publish a written report that documents methods, data, maps, and analysis from the study. They will also report on progress semi-annually in the form of written documents and oral presentations.
