Colorado Water Conservation Board

Water Supply Reserve Fund Grant Application

Instructions

All WSRF grant applications shall conform to the current [2016 WSRF Criteria and Guidelines](#).

To receive funding from the WSRF, a proposed water activity must be approved by a Roundtable(s) **AND** the Colorado Water Conservation Board (CWCB). The process for Roundtable consideration and recommendation is outlined in the 2016 WSRF Criteria and Guidelines. The CWCB meets bimonthly according to the schedule on page 2 of this application.

If you have questions, please contact the current CWCB staff Roundtable liaison:

WSRF Submittal Checklist (Required)

X	I acknowledge this request for funding was recommended for CWCB approval by the sponsoring Basin Roundtable(s).
X	I acknowledge I have read and understand the 2016 WSRF Criteria and Guidelines .
X	I acknowledge the Grantee will be able to contract with CWCB using the Standard Contract . ⁽¹⁾
Exhibit A	
X	Statement of Work ⁽²⁾ (Word – see Exhibit A Template)
X	Budget & Schedule ⁽²⁾ (Excel Spreadsheet – see Exhibit A Template)
	Letters of Matching and/or Pending 3 rd Party Commitments ⁽²⁾
Exhibit C	
	Map ⁽²⁾
	Photos/Drawings/Reports
X	Letters of Support
	Certificate of Insurance ⁽³⁾ (General, Auto, & Workers' Comp.)
Contracting Documents	
	Certificate of Good Standing ⁽³⁾
	W-9 ⁽³⁾
	Independent Contractor Form ⁽³⁾ (If applicant is individual, not company/organization)
	Electronic Funds Transfer (ETF) Form ⁽³⁾

(1) Click "Grant Agreements". For reference only/do not fill out or submit/required for contracting

(2) Required with application if applicable.

(3) Required for contracting. While optional at the time of this application, submission can expedite contracting upon CWCB Board approval.

Schedule		
CWCB Meeting	Application Submittal Dates	Type of Request
January	December 1	Basin Account; BIP
March	February 1	Basin/Statewide Account; BIP
May	April 1	Basin Account; BIP
July	June 1	Basin Account; BIP
September	August 1	Basin/Statewide Account; BIP
November	October 1	Basin Account/BIP

Desired Timeline	
Desired CWCB Hearing Month:	September 2018
Desired Notice to Proceed Date:	December 1, 2018

Water Activity Summary	
Name of Applicant	Beaver Park Water Incorporated
Name of Water Activity	Upper Canal Lining Removal and Replacement (Phase 2)
Approving Roundtable(s)	Basin Account Request(s) ⁽¹⁾
Arkansas Basin Roundtable	\$ 8,000
Basin Account Request Subtotal	\$ 8,000
Statewide Account Request ⁽¹⁾	\$ 80,000
Total WSRF Funds Requested (Basin & Statewide)	\$ 88,000
Total Project Costs	\$ 128,000

(1) Please indicate the amount recommended for approval by the Roundtable(s)

Last Update: August 3, 2017

Grantee and Applicant Information	
Name of Grantee(s)	Beaver Park Water Incorporated
Mailing Address	P.O. Box 286, Penrose CO 81252
FEIN	84-0721934
Grantee's Organization Contact ⁽¹⁾	Gary Ratkovich
Position/Title	Beaver Park Water Inc. Board President
Email	ratkovich@bresnan.net
Phone	719-429-6762
Grant Management Contact ⁽²⁾	Dawn Daniels
Position/Title	Office Manager

Phone	

(1) Person with signatory authority

(2) Person responsible for creating reimbursement invoices (Invoice for Services) and corresponding with CWCB staff.

Description of Grantee
Provide a brief description of the grantee's organization (100 words or less).
<p>The Beaver Park Water Inc. (BPWI) is a mutual ditch company. The company owns water rights decreed to be diverted from Beaver Creek and Brush Hollow Creek in Fremont County, Colorado. The water diverted is used for direct irrigation and domestic uses as well as stored for these same uses.</p> <p>BPWI has approximately 575 shareholders with approximately 2,000 acres being irrigated under the BPWI water system. BPWI is additionally the principal water supplier to the Penrose Water District (PWD). PWD serves the domestic, municipal and commercial water needs of the Penrose, CO area.</p> <p>BPWI additionally owns Brush Hollow Reservoir. This reservoir is an on-channel reservoir on Brush Hollow Creek and is principally supplied water from Beaver Creek by BPWI's Upper Canal. This reservoir is principally an irrigation water supply reservoir but additionally stores reserve water supplies for the PWD sourced from PWD's own pump and pipeline system from the Arkansas River. By contract between BPWI and the Colorado Parks & Wildlife, Brush Hollow Reservoir also serves as a fish, wildlife and public recreational water supply by means of a minimum pool reservation.</p>

Last Update: August 3, 2017

Type of Eligible Entity (check one)	
	Public (Government): municipalities, enterprises, counties, and State of Colorado agencies. Federal agencies are encouraged to work with local entities. Federal agencies are eligible, but only if they can make a compelling case for why a local partner cannot be the grant recipient.
	Public (Districts): authorities, Title 32/special districts (conservancy, conservation, and irrigation districts), and water activity enterprises
X	Private Incorporated: mutual ditch companies, homeowners associations, corporations
	Private Individuals, Partnerships, and Sole Proprietors: are eligible for funding from the Basin Accounts but not for funding from the Statewide Account.
	Non-governmental organizations: broadly, any organization that is not part of the government
	Covered Entity: as defined in Section 37-60-126 Colorado Revised Statutes

Type of Water Activity (check one)	
	Study
	Implementation

Category of Water Activity (check all that apply)		
	Nonconsumptive (Environmental)	
X	Nonconsumptive (Recreational)	
X	Agricultural	
X	Municipal/Industrial	
	Needs Assessment	
	Education & Outreach	
	Other	Explain:

Location of Water Activity	
Please provide the general county and coordinates of the proposed activity below in decimal degrees . The Applicant shall also provide, in Exhibit C, a site map if applicable.	
County/Countries	Fremont County
Latitude	N 38° 27.1'
Longitude	W 105° 1.1'

Last Update: August 3, 2017

Water Activity Overview

Please provide a summary of the proposed water activity (200 words or less). Include a description of the activity and what the WSRF funding will be used for specifically (e.g. studies, permitting, construction). Provide a description of the water supply source to be utilized or the water body affected by the activity. Include details such as acres under irrigation, types of crops irrigated, number of residential and commercial taps, length of ditch improvements, length of pipe installed, area of habitat improvements. If this project addresses multiple purposes or spans multiple basins, please explain. The Applicant shall also provide, in Exhibit A, a detailed Statement of Work, Budget, and Schedule.

Phase two of this project will remove and replace the next identified (Phase 2) section of damaged BPWI canal lining. Due to its use year-round in delivering water for direct irrigation use and winter period storage deliveries, the Upper Canal has suffered damage and failure to sections of the concrete lining of this canal. This damage has caused increased transit losses of water and erosion of soil material. It is thought that freezing and thawing of these seepage waters have also contributed to the failure of the canal sides.

The proposed water activity is to remove these failed concrete sections and replace them with new formed concrete. A total of 4,526 linear feet of canal side has been currently identified as needing removal and replacement. This amount of replacement is planned to be accomplished, pending funding, over a four-year period. Phase one of the project is still underway with 776 liner feet complete to date. An additional 424 liner feet will be repaired through Phase 1 funding at the end of the irrigation season. Funding for Phase 2 will continue the rehabilitation of the canal including an additional 1,150 liner-feet of replacement. Phase 2 will bring the implementation of the project to approximately 50% of completion. Due to the dry conditions this year, it is expected that repairs can be made throughout the winter months, expediting the process.

The total estimated water efficiency savings from this proposed water activity is 1,100 acre-feet/year. Approximately one half of this savings would be yielded from this proposal for Phase 2 of the project. These water efficiency savings will be used to increase the availability of waters supplies to the BPWI, the dependability of water deliveries to the PWD and increase typical storage levels in Brush Hollow.

Measurable Results

To catalog measurable results achieved with WSRF funds please provide any of the following values.

	New Storage Created (acre-feet)
	New Annual Water Supplies Developed or Conserved (acre-feet), Consumptive or Nonconsumptive
4,185.62	Existing Storage Preserved or Enhanced (acre-feet)
	Length of Stream Restored or Protected (linear feet)
275 acre-feet/year (total 1,100 acre-feet in 4- years)	Efficiency Savings (indicate acre-feet/year OR dollars/year)
	Area of Restored or Preserved Habitat (acres)
1,150 feet of canal/phase	Length of Pipe/Canal Built or Improved

Last Update: August 3, 2017

Water Activity Justification

Provide a description of how this water activity supports the goals of [Colorado's Water Plan](#), the most recent [Statewide Water Supply Initiative](#), and the respective [Roundtable Basin Implementation Plan and Education Action Plan](#) ⁽¹⁾. The Applicant is required to reference specific needs, goals, themes, or Identified Projects and Processes (IPPs), including citations (e.g. document, chapters, sections, or page numbers).

For applications that include a request for funds from the Statewide Account, the proposed water activity shall be evaluated based upon how well the proposal conforms to Colorado's Water Plan criteria for state support (CWP, Section 9.4, pp. 9-43 to 9-44;) (Also listed pp. 4-5 in [2016 WSRF Criteria and Guidelines](#)).

The water activity addresses multiple needs or issues- *The proposed water activity will at least in part address the significant transit losses within the BPWI Upper Canal. The resulting benefit of water savings will benefit BPWI's shareholder irrigation interests, the PWD water supply interests by increasing dependability of BPWI deliveries and reducing the turbidity levels of these deliveries. The increased water savings will additionally result in greater amounts of water delivered to Brush Hollow Reservoir resulting in increased reservoir levels to this reservoir thus providing for greater wildlife, recreation and fishery benefits as sought by the Colorado Parks & Wildlife.*

Promote cooperation and collaboration among traditional consumptive and/or non-consumptive interests- *Support by the Colorado Parks & Wildlife in cooperation with the BPWI will result in a collaboration between the traditional BPWI irrigation consumptive water interest and the Colorado Parks & Wildlife non-consumptive interests at Brush Hollow Reservoir.*

Addresses the gap areas between available water supply and future need as identified in SWSI or a roundtable's basin-wide water needs assessment- *the proposed water activity is ultimately estimated to result in up to 1,100 acre-feet of efficiency savings per year. This water savings will result in a greater irrigation water supply to the historically water short BPWI irrigation system and will potentially during drought periods increase the dependability and quantity of water available from BPWI to the PWD.*

Funding from this Account will reduce the uncertainty that the water activity will be implemented- *due to existing expenses of operating a small mutual irrigation system, BPWI cannot solely fund the proposed water activity. The level and quantity of needed repairs to the principle water delivery component of BPWI's irrigation system is beyond BPWI's sole financial ability to fully repair.*

The water activity helps sustain agriculture & open space, or meets environmental or recreational needs- *One of the principle objectives of the BPWI board of directors is to maintain the irrigated rural atmosphere and environment of the Penrose area. Maintenance and repair of the BPWI irrigation system is paramount to this objective. Inability to maintain the functionality of this irrigation system would ultimately result in the drying up of the presently irrigated 2,000 acres of land, an inability to provide principle physical water supply to the PWD and the cessation of water storage in Brush Hollow Reservoir. Solely funding this water actively by BPWI would require a company share assessment beyond the agricultural economic ability of the shareholders to maintain. This cost increase would entail a negative future benefit of agricultural activities under the BPWI system thus eventually leading to a cessation of irrigation under this system. This would be counter to sustaining agriculture and the corresponding open spaces related to agriculture.*

Last Update: August 3, 2017

Matching Requirements: Basin Account Requests

Basin (only) Account grant requests require a 25% match (cash and/or in-kind) from the Applicant or 3rd party and shall be accompanied by a **letter of commitment** as described in the 2016 WSRF Criteria and Guidelines (submitted on the contributing entity's letterhead). Attach additional sheet if necessary.

Contributing Entity	Amount and Form of Match (note cash or in-kind)
Total Match	\$
If you requested a Waiver to the Basin Account matching requirements, indicate the percentage you wish waived.	

Matching Requirements: Statewide Account Requests

Statewide Account grant requests require a 50% match as described in the 2016 WSRF Criteria and Guidelines. A minimum of 10% match shall be from Basin Account funds (cash only). A minimum of 10% match shall be provided by the applicant or 3rd party (cash, in-kind, or combination). The remaining 30% of the required match may be provided from any other source (Basin, applicant, or 3rd party) and shall be accompanied by a **letter of commitment**. Attach additional sheet if necessary.

Contributing Entity	Amount and Form of Match (note cash or in-kind):
Beaver Park	\$20,000
Beaver Park Mutual Capital Account	\$5,000
Beaver Park In-Kind	\$10,000
Penrose Water District	\$5,000
Arkansas Basin Roundtable	\$8,000
Total Match	\$48,000
If you requested a Waiver to the Statewide Account matching, indicate % you wish waived. (Max 50% reduction of requirement).	

Last Update: August 3, 2017

Related Studies

Please provide a list of any related studies, including if the water activity is complimentary to or assists in the implementation of other CWCB programs.

This proposal is phase two of a previously funded WSRF application. This project is complimentary to the CWCB's water conservation and irrigated agricultural programs.

Previous CWCB Grants

List all previous or current CWCB grants (including WSRF) awarded to both the Applicant and Grantee. Include: 1) Applicant name; 2) Water activity name; 3) Approving RT(s); 4) CWCB board meeting date; 5) Contract number or purchase order

Yes, this is phase 2 of a previously awarded WSRF grant

- (1) Beaver Park Water Incorporated, (2) Beaver Park Water Incorporated - Upper Canal Lining Removal and Replacement Project (3) Arkansas Basin Roundtable (4) September 2017 (5) CTGG1 2018-992.

Tax Payer Bill of Rights

The Tax Payer Bill of Rights (TABOR) may limit the amount of grant money an entity can receive. Please describe any relevant TABOR issues that may affect the applicant.

BPWI is a private mutual ditch company. BPWI is not affected by TABOR restrictions.

Water Supply Reserve Account – Grant and Loan Program
Water Activity Summary Sheet
September 19, 2018
Agenda Item 12(c)

Applicant: Beaver Park Water Incorporated

Water Activity Name: Upper Canal Lining Removal and Replacement – Phase 2

Water Activity Purpose: Agricultural, Municipal/Industrial, Non-consumptive (Recreational)

County: Fremont

Drainage Basin: Arkansas

Water Source: Beaver Creek, Brush Hollow Creek and Brush Hollow Reservoir

Amount Requested/Source of Funds:

\$8,000	Arkansas Basin Account
<u>\$80,000</u>	<u>Statewide Account</u>
\$88,000	Total Grant Request

Matching Funds: Basin Account Match (\$8,000) = 10% of Statewide Account request (meets 10% min);
Applicant's cash & in-kind Match (\$40,000) = 50% of Statewide Account request (meets 10% min);
Total Match (Basin & Applicant Match of \$48,000 = 60% of Statewide Account request (meets 50% min).
(refer to *Funding Summary/Matching Funds* section)

Staff Recommendation:

Staff recommends approval of up to \$8,000 from the Arkansas Basin Account; and \$80,000 from the Statewide Account to help fund the project titled: Upper Canal Lining Removal and Replacement Project – Phase 2

Water Activity Summary:

If funded, the objectives of this project are to: continue Phase 2 to remove failed concrete sections of the Beaver Park Water Inc's (BPWI) Upper Canal and replace them with new formed concrete. A total of 4,526 linear feet of canal side has been currently identified by the applicant as being in need of removal and replacement. The applicant is in the process of completing Phase 1, removing and replacing 1,200 linear feet. Approximately 1,150 linear feet is being proposed for replacement in Phase 2.

This canal diverts water under the water rights owned by BPWI from Beaver Creek and supplies water to direct irrigation use for the shareholders of BPWI. The canal additionally delivers water to BPWI's Brush Hollow Reservoir for delivery to BPWI's Lower Canal for direct irrigation use and delivers these waters into storage in Brush Hollow Reservoir for later irrigation use. The BPWI

Upper Canal additionally delivers Beaver Creek waters to the Penrose Water District (PWD). The PWD has a direct water treatment plant intake from the BPWI Upper Canal and diverts and treats these waters daily to supply its domestic and municipal customers.

The total estimated water efficiency savings from this proposed water activity is 1,100 acre-feet/year. Approximately one quarter of this savings would be yielded from the Phase 1 work. The applicant states the water efficiency savings will be used to increase the availability of water supplies to the BPWI, the dependability of water deliveries to the PWD and increase typical storage levels in Brush Hollow Reservoir to the benefit of both the BPWI and wildlife, recreation and fishery interests of the Colorado Parks & Wildlife.

Discussion: The removal and replacement of the canal lining supports Chapter 10 Measurable Objective D: Agriculture Goal in the Colorado Water Plan; *“Maintain Agricultural Viability: Maintain agricultural productivity, support of rural economies and food security”*. By reducing the ditch canal seepage losses, this project helps fulfill the Critical Action: *Support Agricultural Conservation and Efficiency: make it more efficient, resilient and able to reduce water consumption without impacting agricultural productivity*.

Issues/Additional Needs: No issues or additional needs have been identified.

Eligibility Requirements: The application meets requirements of the three subsections of the Eligibility Requirements: General Eligibility, Entity Eligibility, and Water Activity Eligibility.

Eligibility Based on Funding Match Requirements:

The application meets the Statewide Account Matching requirements.

Evaluation Criteria:

This activity has undergone review and evaluation and staff has determined that it satisfies the Evaluation Criteria. Please refer to WSRF Application for applicant’s detailed response.

<u>Funding Source</u>	<u>Cash</u>	<u>In-kind</u>	<u>Total</u>
Beaver Park Water Inc.	\$20,000	\$10,000	\$30,000
Beaver Park Mutual Capital Account	\$5,000	\$0	\$5,000
Penrose Water District	\$5,000	\$0	\$5,000
Sub-total	\$30,000	\$10,000	\$40,000
WSRF Arkansas Basin Account	\$8,000	n/a	\$8,000
WSRF Statewide Account	\$80,000	n/a	\$80,000
Total Project Costs	\$118,000	\$10,000	\$128,000

CWCB Project Manager: Ben Wade

Arkansas Basin Roundtable

July 25, 2018

Via Electronic Mail: ben.wade@state.co.us

Mr. Ben Wade
Colorado Water Conservation Board
1313 Sherman Street, Room 721
Denver, CO 80203

Re: Water Supply Reserve Fund Grant Application: Beaver Park Water Upper Canal Lining, Removal and Replacement Project Phase 2

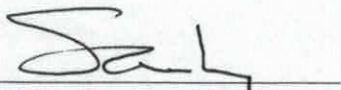

Dear Ben:

At its July 10, 2018 meeting, the Arkansas Basin Roundtable (ABRT) approved the Public Education, Participation and Outreach grant for Arkansas Basin Website grant application for \$8,000 in Basin Funds and \$80,000 in Statewide Funds. The applicant is providing \$40,000 in cash and in-kind contributions. There were no dissenting opinions expressed in the consensus decision. This agricultural infrastructure restoration project is Phase 2 of a multi-year program to reduce canal seepage and sustain an efficient delivery system.

The project meets the same goals as in Phase 1 (2017). The Beaver Park Water Upper Canal Lining, Removal and Replacement Project directly supports Objective D. Agriculture: *"Maintain Agricultural Viability: Maintain Colorado's agricultural productivity, support of rural economies, and food security (through meaningful incentives and grassroots efforts)."* Perhaps more significantly, the Project will demonstrably reduce ditch canal seepage losses, fulfilling the Critical Action: *"Support Agricultural Conservation and Efficiency: Support Colorado's agricultural industry to make it more efficient, resilient, and able to reduce water consumption without impacting agricultural productivity."*

Should you have any questions or concerns, please feel free to contact me either by telephone, 719-742-6164, or by email, sandy@white-jankowski.com.

With warm regards

Michael D. (Sandy) White

Re: CPW's support for Beaver Park Water's Brush Hollow Supply Canal - Upper Canal Lining Removal and Replacement Project in Fremont County, Colorado

Dear Mr. Ratkovich,

Colorado Parks and Wildlife (CPW) would like to take this opportunity to express support for the Brush Hollow Supply Canal - Upper Canal Lining Removal and Replacement project, of which Beaver Park Water, Inc. is currently applying for CWCB grant funding.

Brush Hollow Reservoir is currently managed by CPW as a State Wildlife Area, offering public recreation opportunities such as fishing, boating, and wildlife viewing.

CPW has an interest in the minimum storage pool at Brush Hollow Reservoir and acknowledges that these repairs will reduce transit loss, resulting in greater amounts of water being conveyed, with an outcome of higher reservoir content on average. In that regard, we'd like to support Beaver Park Water, Inc. in their grant application request, as we recognize that this efficiency improvement will result in a benefit to the environment, which falls in accord with CPW's mission to protect water quantity, water quality, recreation, and fish and wildlife habitat. If any questions arise, please contact Rena Brand, CPW Southeast Region Water Resource Specialist at 719-227-5286 or rena.brand@state.co.us.

Sincerely,

Brett Ackerman
Southeast Deputy Regional Manager
