

**Final Project Deliverables:** St. Charles Mesa Water District has utilized CWCB Water Supply Reserve Funding to complete final engineering & design for the installation of a new water treatment plant filter (Pay request #01 - \$12,145). The District utilized WSRF grant funds to pay a portion of the 15% deposit to build the new filter (Pay request #02 - \$20,685.15). In addition, WSRF funds have been used to pay for the necessary backwash flow controls for the water treatment plant filter (Pay request #03 - \$42,169.85.) The filter is currently being built and installation of the filter is scheduled for January 2019.

Please consider this the final report for the District's WSRF Grant POGG1 2018-370. The District sincerely thanks the CWCB staff and Board for their outstanding and continued support of this important project.
