8. Colorado River Water Conservation District Lease of Ruedi Water for Instream Flow Use - Additional Location Use

Stream and Lake Protection Section

Action: Report by CWCB staff member Linda Bassi. A motion to approve the Colorado River Water Conservation District Lease of Ruedi Water for Instream Flow Use - Additional Location Use was made by Russ George, which was seconded by Celene Hawkins. The motion was approved unanimously (10-0).

Staff recommends that the Board:

1. Amend its approval of the Colorado River Water Conservation district lease of Ruedi water to include the additional use of the leased water in the 15-Mile Reach from April 1-December 31, 2019, subject to the following conditions:

- a) Releases of Ruedi water under the Water Lease Agreement shall not cause the releases out of Ruedi Reservoir to exceed 300 cfs and shall not cause flows in the Fryingpan River below Ruedi Reservoir to exceed 350 cfs. Staff and the U.S. Fish and Wildlife Service shall coordinate with the Bureau of Reclamation to ensure that these conditions are met.
- b) CWCB staff shall consult and coordinate weekly with Colorado Parks and Wildlife staff on proposed releases to minimize impacts to the fishery on the Fryingpan River below Ruedi Reservoir.

Such amendment does not increase the amount of water leased and does not increase the expenditure of funds approved at the July Board meeting.

2. Conclude that the proposed use of the remaining leased water to be used from April 1 - December 31 is appropriate to preserve and improve the natural environment in the 15-Mile Reach of the Colorado River to a reasonable degree as follows:

- a) From July 1 - September 30, preserve the natural environment by supplementing existing ISF water rights in the 15-Mile Reach, and improve the natural environment by

- providing water above the decreed ISF rates to help meet or reduce shortfalls to the USFWS flow recommendations for the endangered fish critical habitat; and
- b) For the time periods of April 1 - June 30 and October 1 - December 31, preserve the natural environment by providing and incremental amount of water to help meet or reduce shortfalls to the USFWS flow recommendations.
