March 20-21, 2019 Board Meeting

Case No. 18CW3211 (Water Division 5); Sunny Ranch, LLC

Summary of Water Court Application

This is an Application for enlargement of existing surface diversion right, enlargement of existing storage right, absolute storage right, and plan for augmentation and conditional right of exchange.

Staff Recommendation

Staff recommends that the Board ratify the filing of a Statement of Opposition filed on behalf of the Board in February 2019 to protect CWCB's instream flow water rights.

CWCB Instream Flow Water Rights

The CWCB holds instream flow water rights, including the following water rights in Water Division 5 in the Roaring Fork Watershed, that could be injured by this application:

Case Number	Stream	Upper Terminus	Lower Terminus	CFS Rate (Dates)	Approp. Date
85CW0646	Roaring Fork River	confl Maroon Creek	confl Fryingpan River	30 (10/1 - 3/31) 55 (4/1 - 9/30)	11/08/1985
85CW0639	Roaring Fork River	confl Fryingpan River	confl Crystal River	75 (10/1 - 3/31) 145 (4/1 - 9/30)	11/08/1985

Potential for Injury

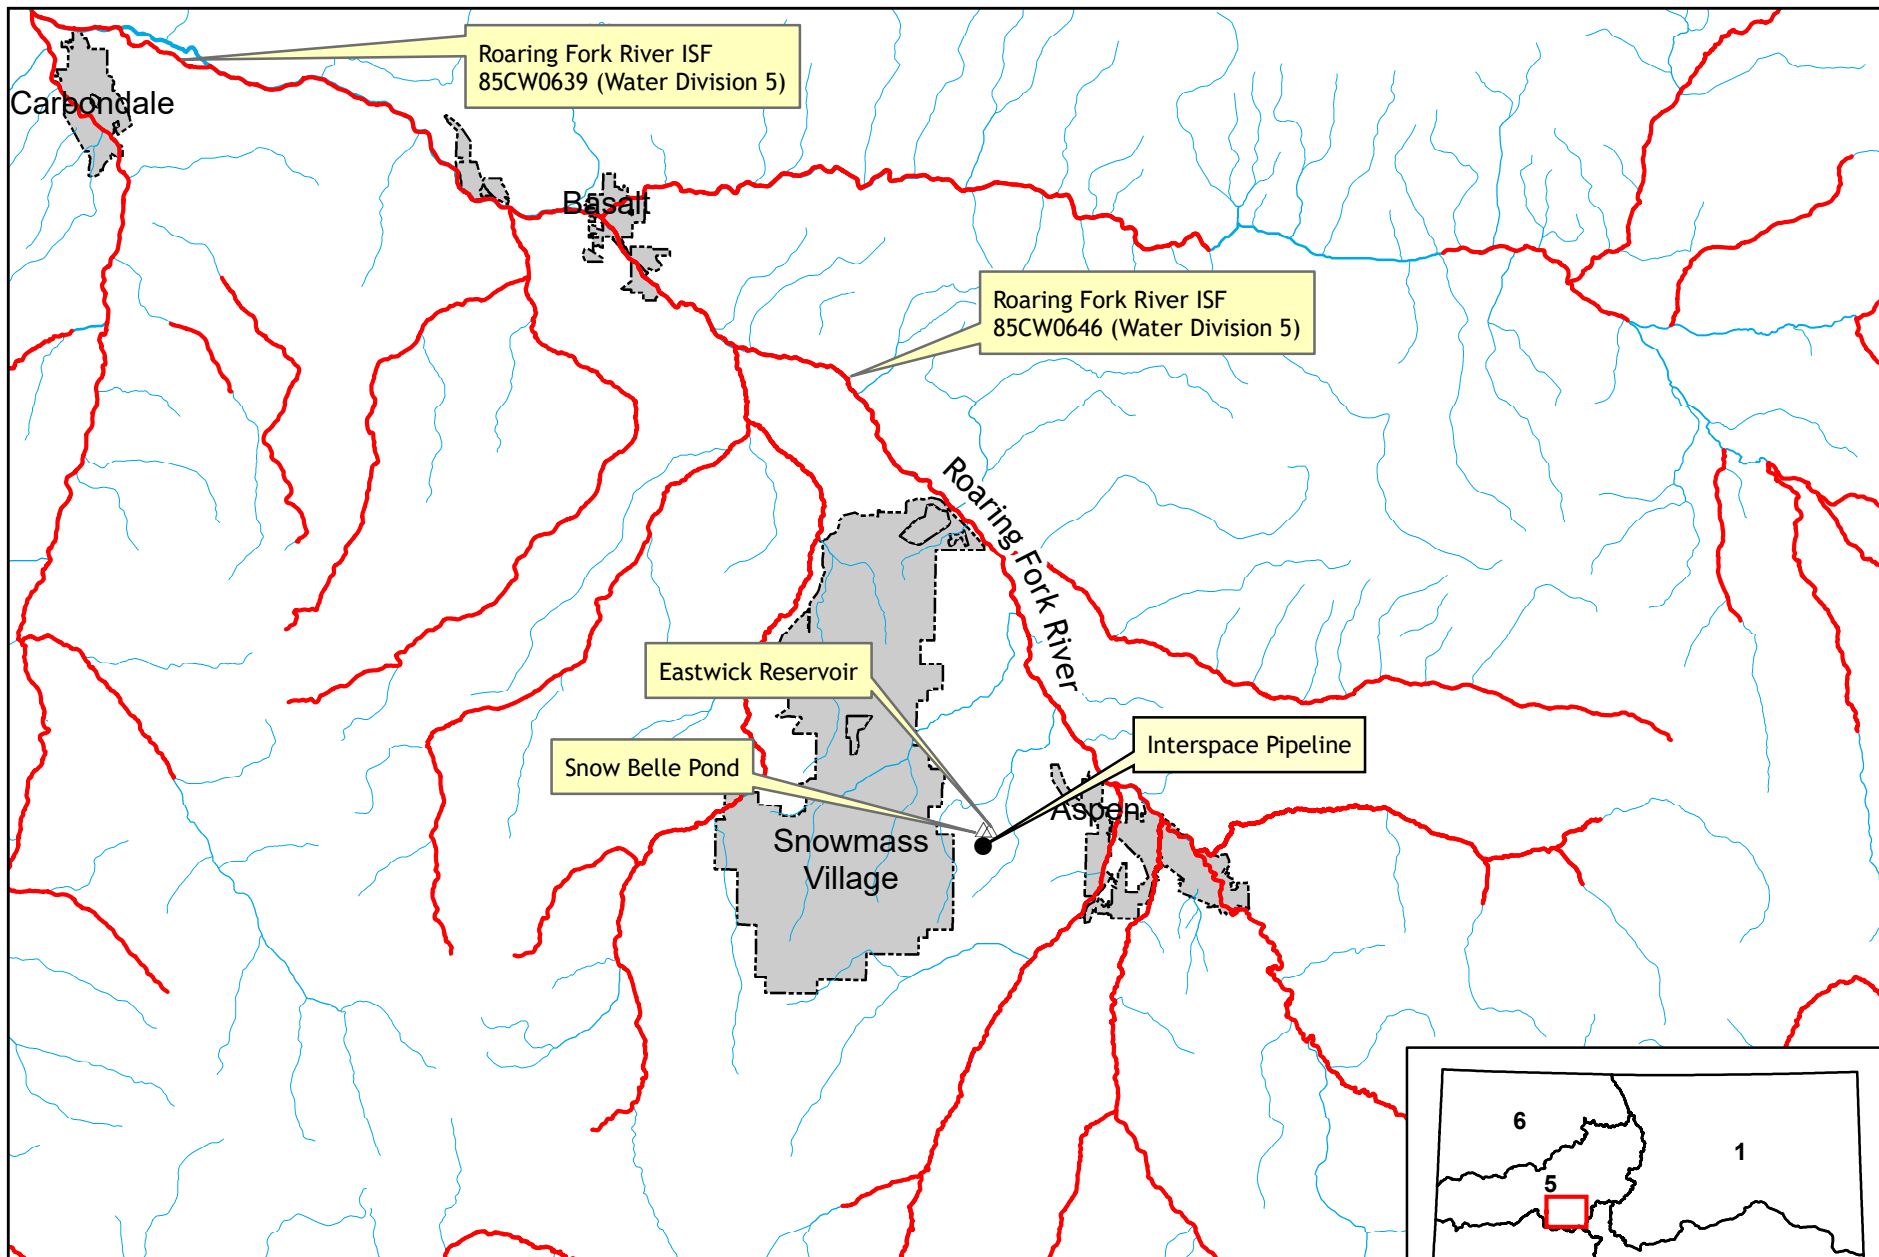

- The proposed plan for augmentation and exchange may not replace depletions in the proper time, place and amount, which could injure the CWCB's instream flow water rights.
- Terms and conditions should be included in the decree to ensure that the proposed decree will not injure the CWCB's instream flow water rights by expansion of use of water rights that are senior to the instream flow water rights.

Other Objectors

No other Statements of Opposition were filed.

Attorney Representing CWCB

Andrew B. Nicewicz, Assistant Attorney General, is assigned to this case and can be contacted at andy.nicewicz@coag.gov, or 720-508-6259

i. In Case No. W-2281, Division 5, the Court decreed that 453 acre feet of annual consumptive-use credits were available to these ditches, and that 300 acre feet could be stored in an unnamed reservoir. The Basalt Water Conservancy District owns 412.89 acre feet of the 453 acre feet, and makes the water rights available to contract allottees for use pursuant to an approved substitute supply plan or decree of Court. ii. The Troy and Edith augmentation water can be delivered to the Frying Pan, Roaring Fork or Colorado Rivers by bypassing water at the headgate on the Frying Pan River. D. - (1) The BWCD owns 441 shares of Class 1 stock issued by the Robinson Ditch Company. The said 441 shares equal 24.16% of the total shares and are associated with 9.73 cfs of the 40.26 cfs decreed to the Robinson Ditch. (2) District Court in and for Garfield County i. Legal Description of Point of Diversion: The point of diversion as decreed is located on the North bank of the Roaring Fork River one-half mile below the mouth of Sopris Creek in Section 11, T. 8 S., R. 87 West, 6th P.M. ii. Historic Use: Irrigation of approximately 137.2 acres of hay and pasture under BWCD's interest in the Robinson Ditch water rights. In Case No. 93CW319, the

Court decreed that 360 acre feet of annual consumptive-use credits are associated with said irrigation. In that case, the Court also decreed a change of use of BWCD's Robinson Ditch rights to include augmentation. BWCD makes the credits available to contract allottees for use pursuant to an approved substitute supply plan or decree of Court. 8. Description of the Plan for Augmentation and Appropriative Rights of Exchange: By this application, Sunny Ranch seeks to augment, either directly or by exchange, out-of-priority evaporative depletions from Snow Belle Pond, described in Paragraph 5 above. A. Augmentation Plan: To permit the requested out-of-priority evaporative depletions, Sunny Ranch proposes to cause the release of or otherwise commit to the Roaring Fork and Colorado Rivers from the BWCD contract water described in Paragraph 7 above. The replacement water will be provided upstream of the location of the calling water right. The precise timing and amount of releases from the BWCD contract water shall be subject to administration by the Division Engineer and/or the Water Commissioner. B. Depletion Assumption: It is assumed that all evaporative depletions from Snow Belle Pond are 100% consumptive. As denoted on the tables attached hereto as Table 1, total annual losses from Snow Belle Pond have been estimated to be 0.52 acre feet (0.16 surface acres). The total out-of-priority dry-year evaporative losses are anticipated to total 0.347 acre feet over the .16 surface acres as shown on Table 1. C. Exchange Plan Reach: When an exchange is necessary to augment its out-of-priority depletions, Sunny Ranch seeks the right to operate the following appropriative right of exchange: Sunny Ranch seeks approval of a plan to augment by exchange out-of-priority depletions from Snow Belle Pond pursuant to its contractual right to the delivery of the BWCD contract water described in Paragraph 7 above. Downstream Termini: The points of replacement on the Roaring Fork and/or Colorado Rivers of the BWCD's water rights listed in Paragraph 7 above and described with particularity as follows: For the exchange of Green Mountain Reservoir water: The confluence of the Roaring Fork and Colorado Rivers, located in the SE ¼ of the NW ¼ of Section 9, Township 6 South, Range 89 West of the 6th P.M., at a point approximately 2,200 feet from the North Section line and 2,350 feet from the West Section line; For the exchange of Ruedi Reservoir and/or Troy and Edith Ditch water: The confluence of the Roaring Fork and Frying Pan Rivers located in the SW ¼ of the SE ¼ of Section 7, Township 8 South, Range 86 West of the 6th P.M., at a point 750 feet from the South Section line and 1,500 feet from the East Section line; and For the exchange of Robinson Ditch water: The headgate of the Robinson Ditch on the Roaring Fork River as described above. Upstream Terminus: The inlet of Interspace Pipeline in the SW 1/4, NW 1/4, Section 9, Township 10 South, Range 85 West, of the 6th P.M. at a point 2,608 feet from the North section line and 142 feet from the West section line. A map of the BWCD's augmentation supplies is attached as Exhibit B. D. Rate of Exchange: The maximum rate of exchange is .005 c.f.s. up to 0.347 acre feet per year. E. Priority Date: A December 20, 2018 priority date is sought in connection with the subject plan for exchange, which is the date of filing of this application. F. Administration: In the event of a call that cannot be augmented by the above described plan for augmentation, Sunny Ranch shall allow the water level of Snow Belle Pond to fall commensurate with evaporation. The exchange or any portion thereof described herein shall only operate in priority and only at such times as there is a live flow of water in the exchange reaches on the Roaring Fork River and Owl Creek. 9. Measurement Devices: So as to ensure the operation of the augmentation and exchange plan, Sunny Ranch will install and maintain such water measuring devices and implement such accounting procedures as may be required to verify that the amount of augmentation and exchange water equals or exceeds the amount of out-of-priority depletions resulting from the use of water under the claimed plan for augmentation and exchange. 10. Names and addresses of owners of land upon which structures are located, upon which water is or will be stored, or upon which water is or will be placed to beneficial use: Applicant. WHEREFORE, Sunny Ranch requests that this Court enter a decree that: 1. Finds that as a result of appropriation and beneficial use, Sunny Ranch has an absolute water right for the Interspace Pipeline, Second Enlargement as described in Paragraph 3 above; and 2. Finds that as a result of appropriation and beneficial use, Sunny Ranch has an absolute water right for Eastwick Reservoir, a/k/a Becca's Lake, First Enlargement as described in Paragraph 4 above; and 3. Finds that as a result of appropriation and beneficial use, Sunny Ranch has an absolute water right for Snow Belle Pond as described in Paragraph 5 above; and 4. Approves the plan for augmentation and conditional right of exchange to replace out of priority evaporative depletions in Snow Belle Pond as described in Paragraph 8 above; and 5. Finds that as a result of the finding of absolute water rights and plan for augmentation and conditional exchange, there will be no injury to any owner of or persons entitled to use water under a vested water right or decreed conditional right.
