

# **Colorado Water Conservation Board**

# Water Supply Reserve Fund Grant Application

## Instructions

All WSRF grant applications shall conform to the current 2016 WSRF Criteria and Guidelines.

To receive funding from the WSRF, a proposed water activity must be approved by a Roundtable(s) **AND** the Colorado Water Conservation Board (CWCB). The process for Roundtable consideration and recommendation is outlined in the 2016 WSRF Criteria and Guidelines. The CWCB meets bimonthly according to the schedule on page 2 of this application.

If you have questions, please contact the current CWCB staff Roundtable liaison:

Arkansas Gunnison | North Platte | Colorado | Metro | Rio Grande |

South Platte | Yampa/White Southwest

	WSRF Submittal Checklist (Required)				
LM	I acknowledge this request was recommended for CWCB approval by the sponsoring roundtable.				
LM	I acknowledge I have read and understand the 2016 WSRF Criteria and Guidelines.				
LM	I acknowledge the Grantee will be able to contract with CWCB using the Standard Contract. (1)				
Applic	cation Documents				
LM	Exhibit A: Statement of Work <sup>(2)</sup> (Word – see Template)				
LM	Exhibit B: Budget & Schedule <sup>(2)</sup> (Excel Spreadsheet – see Template)				
LM	Letters of Matching and/or Pending 3 <sup>rd</sup> Party Commitments <sup>(2)</sup>				
LM	Map <sup>(2)</sup>				
LM	Photos/Drawings/Reports				
LM	Letters of Support (See approval of SW Basin Roundtable)				
Contr	acting Documents <sup>(3)</sup>				
	Detailed/Itemized Budget <sup>(3)</sup> (Excel Spreadsheet – see Template)				
	Certificate of Insurance <sup>(4)</sup> (General, Auto, & Workers' Comp.)				
	Certificate of Good Standing <sup>(4)</sup>				
	W-9 Form <sup>(4)</sup>				
	Independent Contractor Form <sup>(4)</sup> (If applicant is individual, not company/organization)				
	Electronic Funds Transfer (ETF) Form <sup>(4)</sup>				

- (1) Click "Grant Agreements". For reference only/do not fill out or submit/required for contracting
- (2) Required with application if applicable.
- (3) Additional documentation providing a Detailed/Itemized Budget maybe required for contracting. Applicants are encouraged to coordinate with the CWCB Project Manager to determine specifics.
- (4) Required for contracting. While optional at the time of this application, submission can expedite contracting upon CWCB Board approval.

Schedule				
CWCB Meeting	Application Submittal Dates Type of Reques			
January	December 1	Basin Account; BIP		
March	February 1	Basin/Statewide Account; BIP		
May	April 1	Basin Account; BIP		
July	June 1	Basin Account; BIP		
September	August 1	Basin/Statewide Account; BIP		
November	October 1	Basin Account/BIP		

Desired Timeline			
Desired CWCB Hearing Month:	March 2019		
Desired Notice to Proceed Date:	July 2019		

Water Activity Summary			
Name of Applicant	Town of Silverton		
Name of Water Activity	Town of Silverton Water Supply/Storage Investigation		
Approving Roundtable	e(s)	Basin Account Request(s) <sup>(1)</sup>	
Southwest Basin Roundtable		\$25,000	
Southwest Water Conservation District (Pending Request)		\$12,500	
Town of Silverton		\$12,500	
Basin Account Request Subtotal		\$25,000	
Statewide Account Request <sup>(1)</sup>		\$0	
Total WSRF Funds Requested (Bas	sin & Statewide)	\$25,000	
Total Project Costs		\$50,000	

<sup>(1)</sup> Please indicate the amount recommended for approval by the Roundtable(s)

Grantee and Applicant Information			
Name of Grantee(s)	Town of Silverton		
Mailing Address	1360 Greene Street, Silverton, CO 81433		
FEIN	84-6000-78		
Grantee's Organization Contact <sup>(1)</sup>	John Sites		
Position/Title	Public Works Director		
Email	jsites@silverton.co.us		
Phone	970-387-5522		
Grant Management Contact <sup>(2)</sup>	John Sites		
Position/Title	Public Works Director		
Email	jsites@silverton.co.us		
Phone	970-387-5522		
Name of Applicant (if different than grantee)	SGM C/O Louis Meyer PE		
Mailing Address	555 Rivergate Lane Suite B4-82		
Position/Title	Principal Engineer		
Email	Louism@sgm-inc.com		
Phone	970-379-1724		

- (1) Person with signatory authority
- (2) Person responsible for creating reimbursement invoices (Invoice for Services) and corresponding with CWCB staff.

# **Description of Grantee**

Provide a brief description of the grantee's organization (100 words or less).

The Town of Silverton is a statutory town that is the County seat of, and the only incorporated municipality in San Juan County, Colorado. Silverton is a former silver mining camp, most or all of which is now included in a federally designated National Historic Landmark District, the Silverton Historic District. The Town population is 531 based upon the latest census.

Silverton provides potable water and wastewater services to residential and commercial customers within the Town limits. Silverton is a hub of recreational activities in the San Juan Mountains, and is a portal for skiing, fishing, hiking, camping and commercial services in the San Juan National Forest. Silverton is the destination of the Durango-Silverton Narrow Gage Railroad and is the end finish for the annual Ironhorse Bike Classic bike race.

	Type of Eligible Entity (check one)				
Х	Public (Government): municipalities, enterprises, counties, and State of Colorado agencies.  Kederal agencies are encouraged to work with local entities. Federal agencies are eligible, but only if they can make a compelling case for why a local partner cannot be the grant recipient.				
	<b>Public (Districts):</b> authorities, Title 32/special districts (conservancy, conservation, and irrigation districts), and water activity enterprises				
	Private Incorporated: mutual ditch companies, homeowners associations, corporations				
	<b>Private Individuals, Partnerships, and Sole Proprietors:</b> are eligible for funding from the Basin Accounts but not for funding from the Statewide Account.				
	Non-governmental organizations: broadly, any organization that is not part of the government				
	Covered Entity: as defined in Section 37-60-126 Colorado Revised Statutes				

	Type of Water Activity (check one)			
Х	Study			
	Implementation			

	Category of Water Activity (check all that apply)				
	Nonconsumptive (Environmental)				
	Nonconsumptive (Recreational)				
	Agricultural				
Х	Municipal/Industrial				
	Needs Assessment				
	Education & Outreach				
	Other	Explain:			

Location of Water Activity				
Please provide the general county and coordinates of the proposed activity below in <b>decimal degrees</b> . The Applicant shall also provide, in Exhibit C, a site map if applicable.				
County/Counties	San Juan County			
Latitude	37.8119 °N			
Longitude	-107.6645 °W			

## **Water Activity Overview**

Please provide a summary of the proposed water activity (200 words or less). Include a description of the activity and what the WSRF funding will be used for specifically (e.g. studies, permitting, construction). Provide a description of the water supply source to be utilized or the water body affected by the activity. Include details such as acres under irrigation, types of crops irrigated, number of residential and commercial taps, length of ditch improvements, length of pipe installed, area of habitat improvements. If this project addresses multiple purposes or spans multiple basins, please explain. The Applicant shall also provide, in Exhibit A, a detailed Statement of Work, Budget, and Schedule.

This application requests funding for a water resources study for the Town of Silverton (Town) to study alternatives and improvements to the Town's current Bear and Boulder Creek water supplies which are at risk from physical hazards, a changing climate and legal water rights administration from an extended and unprecedented drought.

The current supplies are at risk from extended droughts, fires, mud and debris flows, avalanche slides, rock fall hazards and a changing climate. The drought of 2018 and changing temperatures have changed the surface water hydrographs to earlier peak runoff cycles resulting in lower flows later in the season. The mud and debris flow from the aftermath of the 416 Fire demonstrated the potential risk to the Boulder and Bear Creek surface supples. The Gold King Mine Spill in August of 2015 resulted in an increased awareness of the vulnerability of headwater tributaries from mining activity. Both sources have legal water rights vulnerable to an administrative curtailment during an extended drought period from calls placed by senior downstream water rights holders in the Animas River valley.

This study and resultant report will identify redundant new sources of surface and groundwater supplies and feasible locations for source water storage. Storage will allow for water security from the multiple natural hazards to the Towns supply. The study will identify all feasible alternatives and provide cost estimates and implementation schedules and strategies.

Measurable Results				
To catalog measurable results achieved with WSRF funds please provide any of the following values.				
10-20 Ac-FT	New Storage Created (acre-feet)			
200-300 Ac-FT	New Annual Water Supplies Developed or Conserved (acre-feet), Consumptive or Nonconsumptive			
Potential with Molas Lakes	Existing Storage Preserved or Enhanced (acre-feet)			
	Length of Stream Restored or Protected (linear feet)			
	Efficiency Savings (indicate acre-feet/year OR dollars/year)			
Area of Restored or Preserved Habitat (acres)				
	Length	of Pipe/Canal Built or Improved		
Provide reliable drinking water supply	I ()ther I Explain: Provide reliable drinking water			

## **Water Activity Justification**

Provide a description of how this water activity supports the goals of <u>Colorado's Water Plan</u>, the most recent <u>Statewide Water Supply Initiative</u>, and the respective <u>Roundtable Basin Implementation Plan and Education Action Plan</u> (1). The Applicant is required to reference specific needs, goals, themes, or Identified Projects and Processes (IPPs), including citations (e.g. document, chapters, sections, or page numbers).

For applications that include a request for funds from the Statewide Account, the proposed water activity shall be evaluated based upon how well the proposal conforms to Colorado's Water Plan criteria for state support (CWP, Section 9.4, pp. 9-43 to 9-44;) (Also listed pp. 4-5 in 2016 WSRF Criteria and Guidelines).

- 1. This section will provide Water Activity Justification by citing compliance with Colorado's Water Plan and the Southwest Basin Implementation Plan as follows:
- 2. The Southwest BIP and the 2010 SWSI both identified the need for storage for the Town of Silverton (ID 11-a). The SWBIP specifically included this project:
  - Town of Silverton: Physical water supply is presently adequate, but the Town is applying for an augmentation plan to firm up supply from a potential senior call on the Animas River. The augmentation plan would utilize existing and enlarge capacity of Molas Lake as storage for augmentation water. If necessary, alternative storage sites may be reviewed to replace and or supplement Molas Lake
  - The remaining steps state: Water is decreed, maintain diligence, Develop IPP to make use of project
  - Molas Lakes storage will be one of several storage sites to be studied as part
    of this report. Molas will provide augmentation storage but not physical
    storage and therefore other sites that can provide both physical and
    augmentation storage will be studied.
- Colorado's Water plan identified that headwater communities water supplies are vulnerable
  from impacts of climate change and other natural hazards. Those without upstream storage
  and reliant upon flow of the stream diversions are particularly at risk. This study will identify
  more secure water supply options and upstream storage sites.
- 4. This project is consistent with the stated goals of the SWBIP including the following:
  - Identifies specific and unique projects that are important to maintaining the
    quality of life in this region and should accommodate the development and
    maintenance of flows,including domestic supplies, environmental needs,
    agriculture, recreation, and commercial/industrial needs to provide for further
    economic development.
  - Intends to preserve the Southwest Basin's ability to develop Colorado River Compact entitlements and to meet our water supply gaps.
  - Recognizes and addresses the challenges to all water uses that future drought and/or climate variability may bring.
- 5. One of the 7 themes of the SWBIP included:
  - C. Meet Municipal and Industrial Water Needs

## **Measurable Results**

- 6. This project complies with the Measurable Outcomes of "Meet Municipal and Industrial Water Needs" of Table 1 of the SWBIP which state:
  - 1. Complete 40\* IPPs aimed at meeting municipal water needs.
  - 2. Consistently meet 100% of residential, commercial and industrial water system demands identified in SWSI 2010 in each sub-basin, while also encouraging education and conservation to reduce demand.
  - 3. Implement at least 1\* IPP that protects or enhances the ability of public water supply systems to access and deliver safe drinking water that meets all health-based standards.

## 7. The Executive Summary of Colorado's Water Plan States:

Chapter 6 opens with scenario planning, which provides the framework for how Colorado will address its water future, no matter what water supply and demand challenges we may face. Scenario planning also indicates what Colorado needs to first accomplish in the short term, and the rest of Chapter 6 explores specific approaches to meet our water needs. Chapter 7 examines factors beyond supply and demand—such as natural hazards, watershed health, and water quality—that affect water availability.

Simply put this WSRA Application addresses the future of Silverton's Water Supply by using scenario planning to consider the impacts to its present water supply from climate change, Watershed health, impacts from fires, impacts from Avalanche danger, and water quality and water quality concerns.

8. The Executive Summary of Colorado's Water Plan States:

The success of Colorado's Water Plan will ultimately be measured by whether or not the municipal water supply-and-demand gap is closed, and the choices we make to close it. With increased efforts on conservation, storage, land use, alternative transfer methods, and reuse, Colorado can close its gap, balance its water values, and address the effects of climate change on water resources.

Silverton's goal of securing a safe and reliable water supply is a small step toward meeting the municipal water supply and demand gap.

9. The Executive Summary of Colorado's Water Plan States:

Colorado must also develop additional storage to meet growing needs and face the changing climate. Tomorrow's storage projects will increase the capacity of existing reservoirs, address a diverse set of needs, and involve more partners. New storage projects will be increasingly innovative, and will rely on technologies such as aquifer storage and recharge. In addition, water managers will need to be more agile in responding to changing conditions, so that storage can be more rapidly added to Colorado's water portfolio while maintaining strong environmental health. To do this, we must address a broken permitting system that currently produces uncertainty and fosters mistrust among all stakeholders.

- 10. Silverton's effort to investigate storage as a hedge against drought, climate change and natural hazards complies with the effort to develop more storage. Many of the storage sites will be on federal lands and thus require regulatory permitting. This is an opportunity to collaborate with many different entities to achieve storage high in the basin which can help water users in the entire Animas River Basin.
- 11. Theme C of the Southwest Basin Roundtable Basin Implementation Plan states:

## **Measurable Results**

Meet M&I Water Needs. This project is a step in meeting that need.

#### 12. Section 6.5.3 of Colorado's Water Plan states:

Colorado's Water Plan sets a measurable objective of attaining 400,000 acre-feet of water storage in order to manage and share conserved water and the yield of IPPs by 2050. This objective equates to an 80 percent success rate for these planned projects. Silverton's goal of developing raw water storage meets this measurable objective.

(1) Access Basin Implementation Plans or Education Action Plans from Basin drop down menu.

## **Matching Requirements: Basin Account Requests**

**Basin (only) Account** grant requests require a 25% match (cash and/or in-kind) from the Applicant or 3<sup>rd</sup> party and shall be accompanied by a **letter of commitment** as described in the 2016 WSRF Criteria and Guidelines (submitted on the contributing entity's letterhead). Attach additional sheet if necessary.

Contributing Entity	Amount and Form of Match (note cash or in-kind)		
Town of Silverton	\$12,500		
Southwestern Water Conservation District	Application submitted for \$12,500 and decision pending.		
Total Match	\$25,000		
If you requested a Waiver to the Basin Account matching requirements, indicate the percentage you wish waived.			

#### **Related Studies**

Please provide a list of any related studies, including if the water activity is complimentary to or assists in the implementation of other CWCB programs.

- 1.) Town of Silverton Infrastructure Engineering Services, SGM May 2017
- 2.) John Sites Data for Molas Lake and Ditch Decree
- 3.) 2015 Kaiser Report
- 4.) Silverton Water Rights Portfolio
- 5.) Harris Water Engineering Report

## **Previous CWCB Grants**

List all previous or current CWCB grants (including WSRF) awarded to both the Applicant and Grantee. Include: 1) Applicant name; 2) Water activity name; 3) Approving RT(s); 4) CWCB board meeting date; 5) Contract number or purchase order

None

# **Tax Payer Bill of Rights**

The Tax Payer Bill of Rights (TABOR) may limit the amount of grant money an entity can receive. Please describe any relevant TABOR issues that may affect the applicant.

Silverton has no Tabor requirements relative to this grant request.

# Water Supply Reserve Fund Water Activity Summary Sheet March 21, 2019 Agenda Item 24(r)

**Applicant & Grantee:** Town of Silverton

Water Activity Name: Town of Silverton Water Supply/Storage Investigation

Water Activity Purpose: Municipal Supply Study

County: San Juan

Drainage Basin: Southwest

Water Source: Bear and Boulder Creek

**Amount Requested:** \$25,000 Southwest Basin Account

**Matching Funds:** Applicant Match (cash & in-kind) = \$25,000

• 100% of the Basin Account request (meets 25% min)

• 50% of the total project cost of \$50,000

## **Staff Recommendation:**

Staff recommends approval of up to \$25,000 from the Southwest Basin Account to help fund the project titled: Town of Silverton Water Supply/Storage Investigation.

Water Activity Summary: WSRF grant funds, if approved, will aid the Town of Silverton with an alternatives and improvements supply study. Silverton's current Bear and Boulder Creek water supplies are at risk from physical hazards (fires, mud and debris flows, avalanche slides, rock fall hazards), a changing climate (extended droughts), and legal water rights administration. Both Bear and Boulder Creek sources have legal water rights vulnerable to an administrative curtailment during an extended drought period from calls placed by senior downstream water rights holders in the Animas River valley.

This study and resultant report will identify redundant new sources of surface and groundwater supplies and feasible locations for source water storage. Storage will allow for water security from the multiple natural hazards to the town's supply. The study will identify all feasible alternatives and provide cost estimates as well as implementation schedules and strategies. The characterization will be from the source watershed to the Town's existing Water Treatment Plant. The water supply will be characterized for age, physical availability, legal water rights, compliance with CDPHE Primary Drinking Water Regulations, and Potable Water Design Criteria, and finally Colorado Municipal water system industry standards and best management practices.

**Discussion:** As described in the Southwest basin roundtable (BRT) chair's recommendation letter, this project was supported and recommended for approval by the roundtable on January 9, 2019. The project addresses the Basin Plan measureable goal *11-A* and *Outcome C* as well as the Colorado Water Plan goal of 400,000 acre-feet of storage to meet municipal water needs. The Town of Silverton is a statutory town that is the County seat of, and the only incorporated municipality in San Juan County, Colorado. Silverton is a former silver mining camp with a current population of 531. Silverton provides potable water and wastewater services to residential and commercial customers

within the Town limits. Silverton is a hub of recreational activities in the San Juan Mountains, and is a portal for skiing, fishing, hiking, camping and commercial services in the San Juan National Forest.

**Issues/Additional Needs:** No additional needs have been identified.

**Eligibility Requirements:** The application meets requirements of all eligibility components.

Evaluation Criteria: Staff has determined this activity satisfies the Evaluation Criteria.

# **Funding Summary / Matching Funds:**

Funding Source	<b>Cash</b>	In-Kind	<u>Total</u>
Town of Silverton	\$12,500	\$0	\$12,500
Southwest Water Conservation District	\$12,500	\$0	\$12,500
<b>Sub-total</b>	\$25,000	<b>\$0</b>	\$25,000
WSRF Southwest Basin Account	\$25,000	n/a	\$25,000
Totals	\$50,000	<b>\$0</b>	\$25,000

**CWCB Project Manager:** Megan Holcomb

SOUTHWEST BASINS ROUNDTABLE Michael Preston, Chair c/o Dolores Water Conservancy District P.O. Box 1150 Cortez, Colorado 81321 970-565-7562

January 17, 2019

Megan Holcomb Water Supply Management Section Colorado Water Conservation Board 1580 Logan Street, Suite 600 Denver, Colorado 80203

SUBJECT: Town of Silverton Water Supply/Storage Investigation - \$25,000 Southwest

Basin Fund

## Dear Megan:

The Southwest Basin Roundtable has approved funding in the amount of \$25,000 from the Southwest Basin fund for the Town of Silverton Water Supply/Storage Investigation. The application was considered in detail at the January 9, 2019 meeting of the Southwest Basin Roundtable. There was a quorum of Roundtable members present.

The Project addresses Southwest Basin IPP 11-A, BIP Measurable Goal and Outcome C: Meet Municipal Needs, and Colorado Water Plan Measurable Objective of attaining an additional 400,000 acre feet of water storage from implementation of IPPs.

The completed Grant Application will be forwarded directly to you by the applicant. Please contact the applicant directly or me at 970-565-7562, <a href="majoratric">mpreston@frontier.net</a>, if you have questions or wish to discuss this application in more detail.

Sincerely,

Michael Preston

Southwest Basin Roundtable Chair
