1. PARTIES

This Agreement is entered into by and between Grantee named on the Cover Page for this Agreement (the “Grantee”), and the STATE OF COLORADO acting by and through the State agency named on the Cover Page for this Agreement (the “State”). Grantee and the State agree to the terms and conditions in this Agreement.

2. TERM AND EFFECTIVE DATE

A. Effective Date

This Agreement shall not be valid or enforceable until the Effective Date, and the Grant Funds shall be expended by the Fund Expenditure End Date shown on the Signature and Cover Page for this Agreement. The State shall not be bound by any provision of this Agreement before the Effective Date, and shall have no obligation to pay Grantee for any Work performed or expense incurred before the Effective Date, except as described in §5.D, or after the Fund Expenditure End Date.

B. Initial Term

The Parties’ respective performances under this Agreement shall commence on the Agreement Performance Beginning Date shown on the Cover Page for this Agreement and shall terminate on the Initial Agreement Expiration Date shown on the Cover Page for this Agreement (the “Initial Term”) unless sooner terminated or further extended in accordance with the terms of this Agreement.

C. Extension Terms - State’s Option

The State, at its discretion, shall have the option to extend the performance under this Agreement beyond the Initial Term for a period, or for successive periods, of 1 year or less at the same rates and under the same terms specified in this Agreement (each such period an

“Extension Term”). In order to exercise this option, the State shall provide written notice to Grantee in a form substantially equivalent to Sample Option Letter attached to this Agreement.

D. End of Term Extension

If this Agreement approaches the end of its Initial Term, or any Extension Term then in place, the State, at its discretion, upon written notice to Grantee as provided in §14, may unilaterally extend such Initial Term or Extension Term for a period not to exceed 2 months (an “End of Term Extension”), regardless of whether additional Extension Terms are available or not. The provisions of this Agreement in effect when such notice is given shall remain in effect during the End of Term Extension. The End of Term Extension shall automatically terminate upon execution of a replacement Agreement or modification extending the total term of this Agreement.

E. Early Termination in the Public Interest

The State is entering into this Agreement to serve the public interest of the State of Colorado as determined by its Governor, General Assembly, or Courts. If this Agreement ceases to further the public interest of the State, the State, in its discretion, may terminate this Agreement in whole or in part. A determination that this Agreement should be terminated in the public interest shall not be equivalent to a State right to terminate for convenience. This subsection shall not apply to a termination of this Agreement by the State for breach by Grantee, which shall be governed by §12.A.i.

i. Method and Content

The State shall notify Grantee of such termination in accordance with §14. The notice shall specify the effective date of the termination and whether it affects all or a portion of this Agreement, and shall include, to the extent practicable, the public interest justification for the termination.

ii. Obligations and Rights

Upon receipt of a termination notice for termination in the public interest, Grantee shall be subject to the rights and obligations set forth in §12.A.i.a.

iii. Payments

If the State terminates this Agreement in the public interest, the State shall pay Grantee an amount equal to the percentage of the total reimbursement payable under this Agreement that corresponds to the percentage of Work satisfactorily completed and accepted, as determined by the State, less payments previously made. Additionally, if this Agreement is less than 60% completed, as determined by the State, the State may reimburse Grantee for a portion of actual out-of-pocket expenses, not otherwise reimbursed under this Agreement, incurred by Grantee which are directly attributable to the uncompleted portion of Grantee’s obligations, provided that the sum of any and all reimbursement shall not exceed the maximum amount payable to Grantee hereunder.

F. Grantee’s Termination Under Federal Requirements

Grantee may request termination of this Grant by sending notice to the State, or to the Federal Awarding Agency with a copy to the State, which includes the reasons for the termination and the effective date of the termination. If this Grant is terminated in this manner, then

Grantee shall return any advanced payments made for work that will not be performed prior to the effective date of the termination.

Any other term used in this Agreement that is defined in an Exhibit shall be construed and interpreted as defined in that Exhibit.

4. STATEMENT OF WORK

Grantee shall complete the Work as described in this Agreement and in accordance with the provisions of Exhibit A. The State shall have no liability to compensate Grantee for the delivery of any goods or the performance of any services that are not specifically set forth in this Agreement.

5. PAYMENTS TO GRANTEE

A. Maximum Amount

Payments to Grantee are limited to the unpaid, obligated balance of the Grant Funds. The State shall not pay Grantee any amount under this Agreement that exceeds the Agreement Maximum shown on the Signature and Cover Page of this Agreement.

B. Payment Procedures

i. Invoices and Payment

- a. The State shall pay Grantee in the amounts and in accordance with the schedule and other conditions set forth in Exhibit A and Exhibit C.
- b. Grantee shall initiate payment requests by invoice to the State, in a form and manner approved by the State.
- c. The State shall pay each invoice within 45 days following the State's receipt of that invoice, so long as the amount invoiced correctly represents Work completed by Grantee and previously accepted by the State during the term that the invoice covers. If the State determines that the amount of any invoice is not correct, then Grantee shall make all changes necessary to correct that invoice.
- d. The acceptance of an invoice shall not constitute acceptance of any Work performed or deliverables provided under this Agreement.

ii. Interest

Amounts not paid by the State within 45 days of the State's acceptance of the invoice shall bear interest on the unpaid balance beginning on the 45th day at the rate of 1% per month, as required by §24-30-202(24)(a), C.R.S., until paid in full; provided, however, that interest shall not accrue on unpaid amounts that the State disputes in writing. Grantee shall invoice the State separately for accrued interest on delinquent amounts, and the invoice shall reference the delinquent payment, the number of day's interest to be paid and the interest rate.

iii. Payment Disputes

If Grantee disputes any calculation, determination or amount of any payment, Grantee shall notify the State in writing of its dispute within 30 days following the earlier to occur of Grantee's receipt of the payment or notification of the determination or calculation of the payment by the State. The State will review the information presented by Grantee and may make changes to its determination based on this review. The calculation, determination or payment amount that results from the State's review shall not be subject to additional dispute under this subsection. No payment subject to a dispute under this subsection shall be due until after the State has concluded its review, and the State shall not pay any interest on any amount during the period it is subject to dispute under this subsection.

iv. Available Funds-Contingency-Termination

The State is prohibited by law from making commitments beyond the term of the current State Fiscal Year. Payment to Grantee beyond the current State Fiscal Year is contingent on the appropriation and continuing availability of Grant Funds in any subsequent year (as provided in the Colorado Special Provisions). If federal funds or funds from any other non-State funds constitute all or some of the Grant Funds, the State's obligation to pay Grantee shall be contingent upon such non-State funding continuing to be made available for payment. Payments to be made pursuant to this Agreement shall be made only from Grant Funds, and the State's liability for such payments shall be limited to the amount remaining of such Grant Funds. If State, federal or other funds are not appropriated, or otherwise become unavailable to fund this Agreement, the State may, upon written notice, terminate this Agreement, in whole or in part, without incurring further liability. The State shall, however, remain obligated to pay for Services and Goods that are delivered and accepted prior to the effective date of notice of termination, and this termination shall otherwise be treated as if this Agreement were terminated in the public interest as described in §2.E.

C. Matching Funds.

Grantee shall provide Matching Funds as provided in Exhibit C. Grantee shall have raised the full amount of Matching Funds prior to the Effective Date and shall report to the State regarding the status of such funds upon request. Grantee's obligation to pay all or any part of any matching funds, whether direct or contingent, only extend to funds duly and lawfully appropriated for the purposes of this Agreement by the authorized representatives of Grantee and paid into Grantee's treasury or bank account. Grantee represents to the State that the amount designated "Grantee's Matching Funds" in Exhibit C has been legally appropriated for the purposes of this Agreement by its authorized representatives and paid into its treasury or bank account. Grantee does not by this Agreement irrevocably pledge present cash reserves for payments in future fiscal years, and this Agreement is not intended to create a multiple-fiscal year debt of Grantee.

D. Reimbursement of Grantee Costs.

The State shall reimburse Grantee's allowable costs, not exceeding the maximum total amount described in Exhibit C for all allowable costs described in this Grant and shown in the Budget, except that Grantee may adjust the amounts between each line item of the Budget without formal modification to this Agreement as long as the Grantee provides notice to the State of the change, the change does not modify the total maximum amount of this Agreement or the maximum amount for any state fiscal year, and the change does not modify any requirements of the Work. However, any costs incurred by Grantee prior to the Effective Date shall not be reimbursed. Grantee's costs for Work performed after the Fund Expenditure End Date shown on the Cover Page for this Agreement, or after any phase performance period end date for a respective phase of the Work, shall not be reimbursable. The State shall only reimburse allowable costs described in this Contract and shown in the Budget if those costs are:

- i. Reasonable and necessary to accomplish the Work and for the Goods and Services provided; and
- ii. Equal to the actual net cost to Grantee (i.e. the price paid minus any items of value received by Grantee that reduce the cost actually incurred).

E. Close-Out.

Grantee shall close out this Award within 45 days after the Fund Expenditure End Date shown on the Signature and Cover Page for this Agreement. To complete close-out, Grantee shall submit to the State all deliverables (including documentation) as defined in this Agreement and Grantee's final reimbursement request or invoice. The State will withhold 5% of allowable costs until all final documentation has been submitted and accepted by the State as substantially complete. If the Federal Awarding Agency has not closed this Federal Award within 1 year and 90 days after the Fund Expenditure End Date shown on the Signature and Cover Page for this Agreement due to Grantee's failure to submit required documentation, then Grantee may be prohibited from applying for new Federal Awards through the State until such documentation is submitted and accepted

6. REPORTING - NOTIFICATION

A. Quarterly Reports.

In addition to any reports required pursuant to §16 or pursuant to any other Exhibit, for any Agreement having a term longer than 3 months, Grantee shall submit, on a quarterly basis, a written report specifying progress made for each specified performance measure and standard in this Agreement. Such progress report shall be in accordance with the procedures developed and prescribed by the State. Progress reports shall be submitted to the State not later than 5 Business Days following the end of each calendar quarter or at such time as otherwise specified by the State.

B. Litigation Reporting

If Grantee is served with a pleading or other document in connection with an action before a court or other administrative decision making body, and such pleading or document relates to this Agreement or may affect Grantee's ability to perform its obligations under this Agreement, Grantee shall, within 10 days after being served, notify the State of such action and deliver copies of such pleading or document to the State's principal representative identified in §14.

C. Performance and Final Status

Grantee shall submit all financial, performance and other reports to the State no later than 45 calendar days after the end of the Initial Term if no Extension Terms are exercised, or the final Extension Term exercised by the State, containing an evaluation and review of Grantee's performance and the final status of Grantee's obligations hereunder.

Grantee shall maintain such records for a period (the "Record Retention Period") of three years following the date of submission to the State of the final expenditure report, or if this Award is renewed quarterly or annually, from the date of the submission of each quarterly or annual report, respectively. If any litigation, claim, or audit related to this Award starts before expiration of the Record Retention Period, the Record Retention Period shall extend until all litigation, claims, or audit findings have been resolved and final action taken

by the State. The State, may notify Grantee in writing that the Record Retention Period shall be extended. For records for real property and equipment, the Record Retention Period shall extend three years following final disposition of such property.

B. Inspection

Grantee shall permit the State to audit, inspect, examine, excerpt, copy and transcribe Grantee Records during the Record Retention Period. Grantee shall make Grantee Records available during normal business hours at Grantee's office or place of business, or at other mutually agreed upon times or locations, upon no fewer than 2 Business Days' notice from the State, unless the State determines that a shorter period of notice, or no notice, is necessary to protect the interests of the State.

C. Monitoring

The State will monitor Grantee's performance of its obligations under this Agreement using procedures as determined by the State. The federal government and any other duly authorized agent of a governmental agency, in its discretion, may monitor Contractor's performance of its obligations under this Contract using procedures as determined by that governmental entity. The State shall have the right, in its sole discretion, to change its monitoring procedures and requirements at any time during the term of this Agreement. The State shall monitor Grantee's performance in a manner that does not unduly interfere with Grantee's performance of the Work.

D. Final Audit Report

Grantee shall promptly submit to the State a copy of any final audit report of an audit performed on Grantee's records that relates to or affects this Agreement or the Work, whether the audit is conducted by Grantee or a third party.

8. CONFIDENTIAL INFORMATION-STATE RECORDS

A. Confidentiality

Grantee shall keep confidential, and cause all Subcontractors to keep confidential, all State Records, unless those State Records are publicly available. Grantee shall not, without prior written approval of the State, use, publish, copy, disclose to any third party, or permit the use by any third party of any State Records, except as otherwise stated in this Agreement, permitted by law or approved in Writing by the State. Grantee shall provide for the security of all State Confidential Information in accordance with all policies promulgated by the Colorado Office of Information Security and all applicable laws, rules, policies, publications, and guidelines. Grantee shall immediately forward any request or demand for State Records to the State's principal representative

B. Other Entity Access and Nondisclosure Agreements

Grantee may provide State Records to its agents, employees, assigns and Subcontractors as necessary to perform the Work, but shall restrict access to State Confidential Information to those agents, employees, assigns and Subcontractors who require access to perform their obligations under this Agreement. Grantee shall ensure all such agents, employees, assigns, and Subcontractors sign agreements containing nondisclosure provisions at least as protective as those in this Contract, and that the nondisclosure provisions are in force at all times the agent, employee, assign or Subcontractor has access to any State Confidential Information. Grantee shall provide copies of those signed nondisclosure provisions to the State upon execution of the nondisclosure provisions.

C. Use, Security, and Retention

Grantee shall use, hold and maintain State Confidential Information in compliance with any and all applicable laws and regulations in facilities located within the United States, and shall maintain a secure environment that ensures confidentiality of all State Confidential Information wherever located. Grantee shall provide the State with access, subject to Grantee's reasonable security requirements, for purposes of inspecting and monitoring access and use of State Confidential Information and evaluating security control effectiveness. Upon the expiration or termination of this Agreement, Grantee shall return State Records provided to Grantee or destroy such State Records and certify to the State that it has done so, as directed by the State. If Grantee is prevented by law or regulation from returning or destroying State Confidential Information, Grantee warrants it will guarantee the confidentiality of, and cease to use, such State Confidential Information.

D. Incident Notice and Remediation

If Grantee becomes aware of any Incident, it shall notify the State immediately and cooperate with the State regarding recovery, remediation, and the necessity to involve law enforcement, as determined by the State. Unless Grantee can establish that none of Grantee or any of its agents, employees, assigns or Subcontractors are the cause or source of the Incident, Grantee shall be responsible for the cost of notifying each person who may have been impacted by the Incident. After an Incident, Grantee shall take steps to reduce the risk of incurring a similar type of Incident in the future as directed by the State, which may include, but is not limited to, developing and implementing a remediation plan that is approved by the State at no additional cost to the State. The State may adjust or direct modifications to this plan, in its sole discretion and Grantee shall make all modifications as directed by the State. If Grantee cannot produce its analysis and plan within the allotted time, the State, in its sole discretion, may perform such analysis and produce a remediation plan, and Grantee shall reimburse the State for the reasonable costs thereof.

E. Safeguarding PII

If Grantee or any of its Subcontractors will or may receive PII under this Agreement, Grantee shall provide for the security of such PII, in a manner and form acceptable to the State, including, without limitation, State non-disclosure requirements, use of appropriate technology, security practices, computer access security, data access security, data storage encryption, data transmission encryption, security inspections, and audits. Grantee shall be a "Third-Party Service Provider" as defined in §24-73-103(1)(i), C.R.S. and shall maintain security procedures and practices consistent with §§24-73-101 *et seq.*, C.R.S.

9. CONFLICTS OF INTEREST

A. Actual Conflicts of Interest

Grantee shall not engage in any business or activities, or maintain any relationships that conflict in any way with the full performance of the obligations of Grantee under this Agreement. Such a conflict of interest would arise when a Grantee or Subcontractor's employee, officer or agent were to offer or provide any tangible personal benefit to an employee of the State, or any member of his or her immediate family or his or her partner, related to the award of, entry into or management or oversight of this Agreement.

B. Apparent Conflicts of Interest

Grantee acknowledges that, with respect to this Agreement, even the appearance of a conflict of interest shall be harmful to the State's interests. Absent the State's prior written approval, Grantee shall refrain from any practices, activities or relationships that reasonably appear to be in conflict with the full performance of Grantee's obligations under this Agreement.

C. Disclosure to the State

If a conflict or the appearance of a conflict arises, or if Grantee is uncertain whether a conflict or the appearance of a conflict has arisen, Grantee shall submit to the State a disclosure statement setting forth the relevant details for the State's consideration. Failure to promptly submit a disclosure statement or to follow the State's direction in regard to the actual or apparent conflict constitutes a breach of this Agreement.

No later than 15 days before the expiration date of Grantee's or any Subcontractor's coverage, Grantee shall deliver to the State certificates of insurance evidencing renewals of coverage. At any other time during the term of this Agreement, upon request by the State, Grantee shall, within 7 Business Days following the request by the State, supply to the State evidence satisfactory to the State of compliance with the provisions of this section.

11. BREACH OF AGREEMENT

In the event of a Breach of Agreement, the aggrieved Party shall give written notice of Breach of Agreement to the other Party. If the notified Party does not cure the breach, at its sole expense, within 30 days after the delivery of written notice, the Party may exercise any of the remedies as described in §12 for that Party. Notwithstanding any provision of this Agreement to the contrary, the State, in its discretion, need not provide notice or a cure period and may immediately terminate this Agreement in whole or in part or institute any other remedy in this Agreement in order to protect the public interest of the State; or if Grantee is debarred or suspended under §24-109-105, C.R.S., the State, in its discretion, need not provide notice or cure period and may terminate this Agreement in whole or in part or institute any other remedy in this Agreement as of the date that the debarment or suspension takes effect.

12. REMEDIES

A. State's Remedies

If Grantee is in breach under any provision of this Agreement and fails to cure such breach, the State, following the notice and cure period set forth in §11, shall have all of the remedies listed in this section in addition to all other remedies set forth in this Agreement or at law. The State may exercise any or all of the remedies available to it, in its discretion, concurrently or consecutively.

i. Termination for Breach

In the event of Grantee's uncured breach, the State may terminate this entire Agreement or any part of this Agreement. Grantee shall continue performance of this Agreement to the extent not terminated, if any.

a. Obligations and Rights

To the extent specified in any termination notice, Grantee shall not incur further obligations or render further performance past the effective date of such notice, and shall terminate outstanding orders and subcontracts with third parties. However, Grantee shall complete and deliver to the State all Work not cancelled by the termination notice, and may incur obligations as necessary to do so within this Contract's terms. At the request of the State, Grantee shall assign to the State all of Grantee's rights, title, and interest in and to such terminated orders or subcontracts. Upon termination, Grantee shall take timely, reasonable and necessary action to protect and preserve property in the possession of Grantee but in which the State has an interest. At the State's request, Grantee shall return materials owned by the State in Grantee's possession at the time of any termination. Grantee shall deliver all completed Work Product and all Work Product that was in the process of completion to the State at the State's request.

b. Payments

Notwithstanding anything to the contrary, the State shall only pay Grantee for accepted Work received as of the date of termination. If, after termination by the State, the State agrees that Grantee was not in breach or that Grantee's action or inaction was excusable, such termination shall be treated as a termination in the public interest, and the rights and obligations of the Parties shall be as if this Agreement had been terminated in the public interest under §2.E.

c. Damages and Withholding

Notwithstanding any other remedial action by the State, Grantee shall remain liable to the State for any damages sustained by the State in connection with any breach by Grantee, and the State may withhold payment to Grantee for the purpose of mitigating the State's damages until such time as the exact amount of damages due to the State from Grantee is determined. The State may withhold any amount that may be due Grantee as the State deems necessary to protect the State against loss including, without limitation, loss as a result of outstanding liens and excess costs incurred by the State in procuring from third parties replacement Work as cover.

ii. Remedies Not Involving Termination

The State, in its discretion, may exercise one or more of the following additional remedies:

a. Suspend Performance

Suspend Grantee's performance with respect to all or any portion of the Work pending corrective action as specified by the State without entitling Grantee to an adjustment in price or cost or an adjustment in the performance schedule. Grantee shall promptly cease performing Work and incurring costs in accordance with the State's directive, and the State shall not be liable for costs incurred by Grantee after the suspension of performance.

b. Withhold Payment

Withhold payment to Grantee until Grantee corrects its Work.

c. Deny Payment

Deny payment for Work not performed, or that due to Grantee's actions or inactions, cannot be performed or if they were performed are reasonably of no value to the state; provided, that any denial of payment shall be equal to the value of the obligations not performed.

d. Removal

Demand immediate removal of any of Grantee's employees, agents, or Subcontractors from the Work whom the State deems incompetent, careless, insubordinate, unsuitable, or otherwise unacceptable or whose continued relation to this Agreement is deemed by the State to be contrary to the public interest or the State's best interest.

e. Intellectual Property

If any Work infringes, or if the State in its sole discretion determines that any Work is likely to infringe, a patent, copyright, trademark, trade secret or other intellectual property right, Grantee shall, as approved by the State (i) secure that right to use such Work for the State and Contractor; (ii) replace the Work with noninfringing Work or modify the Work so that it becomes noninfringing; or, (iii) remove any infringing Work and refund the amount paid for such Work to the State.

B. Grantee's Remedies

If the State is in breach of any provision of this Agreement and does not cure such breach, Grantee, following the notice and cure period in §11 and the dispute resolution process in §13 shall have all remedies available at law and equity.

13. DISPUTE RESOLUTION

A. Initial Resolution

Except as herein specifically provided otherwise, disputes concerning the performance of this Agreement which cannot be resolved by the designated Agreement representatives shall be referred in writing to a senior departmental management staff member designated by the State and a senior manager designated by Grantee for resolution.

B. Resolution of Controversies

If the initial resolution described in §13.A fails to resolve the dispute within 10 Business Days, Grantee shall submit any alleged breach of this Agreement by the State to the Procurement Official of the State Agency named on the Cover Page of this Agreement as described in §24-101-301(30), C.R.S. for resolution following the same resolution of controversies process as described in §§24-106-109, and 24-109-101.1 through 24-109-505, C.R.S., (the “Resolution Statutes”), except that if Grantee wishes to challenge any decision rendered by the Procurement Official, Grantee’s challenge shall be an appeal to the executive director of the Department of Personnel and Administration, or their delegate, in the same manner as described in the Resolution Statutes before Grantee pursues any further action. Except as otherwise stated in this Section, all requirements of the Resolution Statutes shall apply including, without limitation, time limitations regardless of whether the Colorado Procurement Code applies to this Agreement.

Water Plan Grant - Exhibit A

Statement Of Work

Date:	May 29, 2019
Name of Grantee:	Trout Unlimited
Name of Water Project:	Blue River Integrated Water Management Plan
Funding Source:	CWCB Water Plan, WSRF and CWRP Grants

Water Project Overview:

Introduction and Background

The Blue River basin exhibits a variety of riverine ecosystems - from high mountain creeks to meandering river environments surrounded by irrigated grass-hay pasture. The streams and rivers of the basin further support an equally-varied number of non-consumptive uses (recreational and environmental) and consumptive uses (municipal, agricultural and industrial) including the municipal trans-basin diversions managed by Denver Water, Colorado Springs Utilities and the City of Golden. The health and maintenance of these water resources is vital to the dependent communities, the environment of the basin and as a headwater community to downstream water users. This is the first effort in the Blue River watershed to develop a comprehensive integrated water management plan which will be initiated with this grant request.

Trout Unlimited (TU) and the Blue River Watershed Group (BRWG) are working together to produce a basin-wide integrated water management plan (IWMP) for the Blue River basin in Summit and Grand Counties in Colorado. The long-term goal of the IWMP will be to enable consumptive and non-consumptive water users to understand and quantify current and future use and integrate those uses for the maximum benefit of all users while protecting the existing water resource. This grant request will fund the completion of Phase One of the IWMP and will focus on two primary objectives to be completed in four tasks. The results of Phase One are intended to inform the implementation phase (Phase Two) of the IWMP.

Combinations of existing ecosystems, large reservoirs and differing water use divide the basin into three distinct areas: the watershed above Dillon Reservoir; the Blue River (and tributaries) between Dillon Reservoir and Green Mt. Reservoir; and the Blue (and tributaries) from Green Mountain Reservoir to the Colorado River confluence. Accordingly, the IWMP project sponsors have divided the river into the following reaches or areas. This is done for organizational purposes and is sometimes referred to in this application. For instance, determining the reason for the declining fishery is focused on Reach 2 while the literature search, compilation and integration task is focused primarily on Reach 1. The reaches are further described as follows and indicated on (Map 2).

Reach 1: Upper Blue River above Dillon Reservoir (includes major drainages such as the Swan R., Snake R., Tenmile Cr., and the Blue R.).

Reach 2: Middle Blue River between Dillon Reservoir and Green Mountain Reservoir, includes the main-stem of the Blue River and numerous smaller order tributaries.

Reach 3: Lower Blue River from Green Mountain Reservoir to the Colorado River Confluence.

(Map 2) Blue River Reach Designation

Project Objectives.

Objective #1

The continuing decline in overall trout population abundance and size distribution in the Blue River main-stem between Dillon and Green Mountain reservoirs has resulted in the recent removal of Colorado Parks and Wildlife Gold Medal status. The Blue River Enhancement Workgroup (BREW) was formed to examine the situation, however, while the group has made strong advances in stakeholder engagement and initial data gathering, the cause of the fishery decline remains unknown. This middle reach of the Blue River provides one of the most important recreational assets in Summit County, including fishing, boating and other outdoor related opportunities for visitors and residents. The basin-wide community has placed a high priority on determining the cause(s) of the decline and returning the river to its once-productive condition - thereby returning to Gold Medal status.

To determine the cause of the fishery decline, the BREW has been working with Dr. William Lewis (Professor/Director, Center for Limnology, CU-Boulder) to define and study the biological and physical parameters of this reach of the river. Those parameters include: water temperature, relative abundance and distribution of aquatic invertebrates, type and distribution of periphytons (algae), morphological characteristics, channel armoring and historic flow regimes. In 2013, Dr. Lewis examined seven sites along this reach. However, this work, along with previous studies, have not provided conclusive data that would enable definitive conclusions about the changes occurring in this trout population. In order to understand these changes and discover potential mitigation measures, funding is needed to secure a multi-year study that systematically examines the identified parameters and integrates historic data.

Objective #2.

The upper Blue River basin (Reach 1) primarily consists of high altitude rivers and streams which exhibit similarities in terms of natural high altitude biological capacity. Conversely, the upper basin's streams and rivers have experienced differing historical human impacts (mining, development, dams, ski industry, etc.) which have manifested in a wide variety of existing water quality and quantity conditions. This is clearly demonstrated by the differing physical and biological conditions and flow regimes in the four sub-basins (Snake, Swan, Blue and Tenmile) that feed Dillon Reservoir. These conditions have been widely studied and quantified in each of these sub-basins as well as areas downstream of Dillon Reservoir. While this information is extensive and has often resulted in conclusions and recommendations, it has never been coalesced for the purpose of providing integrated water planning on an intra or inter-basin basis.

Accordingly, the primary goal for Objective #2 will be to conduct a water-focused literature inventory review, assess the inventory for completeness, and make recommendations to either fill voids in the inventory or move forward with identification of goals and objectives such as multi-use projects or innovative management techniques. This same review, assessment and identification process will be applied to the downstream areas (Reach 2 and 3) but on a less intensive basis.

In addition to the literature and data review, this objective will also include a stakeholder-driven outreach component to the recreational and agricultural communities. Recreation is a major economic driver in Summit County. Non-consumptive uses such as fishing, boating and other water related activities are a core component providing business and employment opportunities for many basin residents. Conversely, consumptive recreational uses such as the ski and golf industries are also vital economic generators. It is important that both of these non-consumptive and consumptive recreational uses be accounted, understood and incorporated into the goals and objectives that will form the IWMP-Phase Two.

The agricultural community exists on the working irrigated ranches located downstream from Dillon Reservoir. Friends of the Lower Blue River (FOLBR), Summit County Open Space and Trails, Continental Divide Land Trust and private landowners have worked to preserve these ranching operations and the irrigated hay fields and grazing meadows through open space designations and other mechanisms. Pre-compact water rights typical of these ranches are key to their survival and important to the upper Colorado River basin. The fields are primarily flood irrigated and provide return flow to the Blue River. Maintaining irrigation infrastructure is important to preserving these rights and providing return flows to tributaries and the Blue River main-stem.

In order to protect irrigated agriculture in the valley, TU and BRWG will work with FOLBR and willing AG producers to inventory existing irrigation diversion structures and study return flows on ranches below Dillon. The objective will be to assess and identify opportunities to upgrade diversion structures, turn-outs and ditches to maximize water application efficiency, reduce labor and potentially improve production. To increase the understanding of return flow timing and its relation to the Blue River, the project will additionally provide, install and monitor piezometers in irrigated fields.

Tasks

Task 1: Stakeholder Outreach and Advisory Committee Development.

Description. Identify stakeholders and form an Advisory Committee to provide input and guidance on IWMP-Phase Two objectives and goals. The Advisory Committee will include representatives from the environmental community, water managers and municipalities, recreational community non-consumptive uses such as boating and angling, recreational community consumptive uses such as skiing and golf, the agricultural community, and local, State and Federal agencies. The stakeholder based Advisory Committee will guide and inform the identification of concerns and important issues, goals and objectives, analyses and studies, framework for long-term monitoring and the development of an community driven plan that will be carried forward in Phase Two.

Method. The BRWG and TU have initiated this process by identifying stakeholders and contacting key personal. A list of current stakeholder contacts is attached. Both groups are currently working with the River Network and the Cross-watershed Network to organize a "stakeholder outreach and planning training" that will further enhance the actions and results of Task 1.

When the stakeholder outreach and identification process is complete, each will be asked to participate as a member of the advisory committee and to assign a designee.

- 1) The Advisory Committee will meet (6) times during the grant period.
- 2) The first Advisory Committee meeting will be organizational. After this meeting Project Staff will organize (3) community outreach meetings to be held in Breckenridge (upper Blue), Silverthorne (middle Blue), and Kremmling (lower Blue). Project Staff will select and hire a facilitator (Facilitator) to coordinate and conduct the community outreach meetings. By having an established advisory committee in the beginning of the process, we believe that the community outreach events will be better attended and form stronger links to the ongoing process. At the completion of the community meetings, the Project Staff and Facilitator will summarize the minutes and submit a report to the advisory committee in advance of their second meeting.
- 3) The Advisory Committee will consider this report and make recommendations to the Consultant regarding community priorities, issues, concerns, etc. that should further guide Tasks 2 and 3.
- 4) The subsequent three Advisory Committee meetings will consider and review findings and recommendations from the Consultant as they work on Tasks 2 and 3. Prior to each of these meetings the Consultant will provide a progress update on Task 2 and 3 based on the work to date and formulate recommendations about the goals, objectives, projects and innovative water management techniques that will make up Phase Two.
- 5) The sixth and final Advisory Committee meeting will be the culmination of the process of developing the next steps for Phase Two. The committee will make final recommendations on goals, objectives, projects and water management techniques that will inform Task 4 and ultimately, IWMP-Phase Two.

Deliverables:

- 1) Project Staff has completed the stakeholder outreach training with River Network and Cross-watershed Network.
- 2) Project staff will organize and conduct three community meetings to be held throughout the Blue River Watershed.
- 3) Six BRIWMP Advisory Committee Meetings
- 4) Summary of Consultant reports and other materials generated during the community meetings and Advisory Committee process to be provided as part of the final CWCB project report.

Task 2: Assess declining fishery between Dillon and Green Mountain Reservoirs

Description. Colorado Parks and Wildlife Gold Medal status was removed from a 19 mile stretch of the Blue River north of Silverthorne in 2016. The stretch had not met Gold Medal criteria for 15 years prior. In 2013 Dr. William M. Lewis and James McCutchan¹ prepared a study, reporting on aquatic life use attainment following the State of Colorado Multi-Metric Index method (MMI) as described in the Colorado Department of Public Health and Environment's Aquatic Life Use Attainment Policy, Section 10-1 (CDPHE 2010). Seven sites were assessed along an 11-mile reach of the Blue River downstream of Dillon Reservoir. Samples or measurements included water temperature, pH, dissolved oxygen, pebble counts and aquatic invertebrates. Additional studies by others on aquatic invertebrates, trout population/distribution and temperature have been completed or are ongoing in various sites in Reach 2. These studies have not been integrated with Dr. Lewis' study. However, according to those familiar with the situation, that even in aggregate they do not provide the conclusive evidence necessary to identify the reasons for the declining fishery.

Method. The purpose of Task 2 is to expand on the 2013 study footprint and analysis and to integrate previous and ongoing studies to further understand the fishery decline in the Blue River from Dillon to Green Mountain reservoirs. To accomplish this task, Project Staff will work with BREW to fully integrate previous studies, assess the scope and design of studies currently proposed and modify as necessary the scope of study proposed in this application within the requested budget. The process will be initiated at the annual BREW meeting on November 14, 2018. Subtasks include the following and assume the full agreement and support of BREW (Subtasks may be modified on the basis of input from BREW):

- 1) Work with the BREW to develop the assessment program, verify proposed study sites (2013 sites and additional sites) and study parameters (see below). Project sponsors began this process November 14, 2018 at the annual BREW meeting in Silverthorne, CO.
- 2) Incorporate the original 7 sites into future studies to provide consistency and a general baseline for comparative analysis.
- 3) Add additional temperature monitoring sites if determined to be required to enable up and downstream baseline comparisons to the study reach.
- 4) Assess invertebrate populations, trout diet, trout growth rates and collect periphyton in Reach 2 and 3.
- 5) Perform a creel census in Reach 1, 2 and 3.
- 6) Review previous studies on potential contamination from upstream sources (cadmium, zinc, molybdenum (for instance, studies have sampled and examined Dillon Reservoir substrate samples for the presence and concentration of heavy metals).
- 7) Review and correlate Colorado Parks and Wildlife (fish population and distribution) and U.S. Forest Service (invertebrate populations and water temperature) field work and assessments, with Dr. Lewis' work and the stream assessment.
- 8) Integrate objectives with stream assessment and data review to develop priorities.

Deliverables:

- 1) Consultant will provide 3 study updates to the Advisory Committee for their interim meetings (Meetings 3, 4 and 5).
- 2) Consultant will provide an additional report that summarizes work to date and, if possible, make preliminary conclusions on the reasons for the declining fishery for consideration at Advisory Committee meeting 6. This information will be used by the committee to help inform goals and objectives in Phase Two.
- 3) Consultant will provide a final report at the conclusion of the 18 month study.
- 4) The final report will either conclusively define the causes of the declining fishery or provide the most probable factors that are contributing to the decline. This information will help inform Task 4 and the next

steps to be taken in IWMP-Phase Two. If conclusions are not reached, it is assumed that the study will continue to gather data in Phase Two until conclusions can be made as to the reasons for the declining fishery and possible remedies.

Task 3: Compile and review existing available data, information and studies.

Description. The Objective 2 narrative describes the wide array of basin studies, data and other valuable information that remains unintegrated. Task 3 will compile, review and integrate this array of information for use in developing IWMP-Phase Two management goals, objectives, multi-use projects and innovative management techniques. As this information is collected, analyzed and integrated, it will be disseminated to the Advisory Committee and considered at committee meetings in the same method and format as Task 2.

Method. Data compilation will be implemented through the use of the CMU website, as well as information gathering through interviews and discussions with stakeholders, agencies and other resources in a data collection effort as follows:

- 1) Collection and review of existing available studies, restoration efforts, data, and anecdotal information. Identify relevant resources that can support and help in the assessment of existing biological, hydrological, and geomorphological conditions at a reach scale in the area above Dillon. This same process will be applied to downriver reaches on a less intensive basis.
- 2) Summarize water operations, diversions for local and major water users.
- 3) Inventory recreational uses. Coordinate with the boating and angling community (river and marinas) and skiing and golf community.
- 4) Meet with producers and inventory and assess use and conditions of agricultural irrigation infrastructure. Coordinate with producers to understand needs and methods to improve operations.
- 5) Identify critical needs for additional assessments and studies.

Deliverables:

- 1) Consultant will work with project sponsors to synthesize and summarize existing available data, information and studies into periodic updates for consideration by the Advisory Committee at meetings 3-5.
- 2) Consultant will work with project sponsors to create a summary report for consideration by the Advisory Committee prior to meeting 6.
- 3) Based on the final recommendations of the Advisory Committee, the Consultant will prepare a final report will consider stakeholder needs, funding needs and identify a list of goals, objectives, potential future demonstration projects and innovative water management techniques that will inform Task 4 and form the basis for IWMP-Phase Two work.
- 4) The periodic and final reports provided to the Advisory Committee will form the basis for the required CWCB-Six Month reports. The reports will further provide a project progress report that relates directly to the grant proposal. There will be a minimum of two of the interim reports provided to CWCB.

Task 4: Develop BRIWMP Goals and Objectives for Phase 2.

Description. The information generated by the Consultant and Project Staff in Tasks 1 through 3 will be utilized to inform the Blue River community and Advisory Committee on relevant issues and support the development of the IWMP through implementation goals and objectives in Phase Two. Those goals and objectives will likely include multi-use projects and innovative water management techniques that will be vetted through the development of environmental, agricultural and recreational values and goals that were identified during community meetings and through the Advisory Committee review and recommendation process. In no instance will a project or water management technique be endorsed that potentially harms an existing consumptive use. Phase One will further identify temporal, geographical, legal, or administrative constraints and opportunities that may limit or assist in the basin's ability to meet environmental and recreational goals.

Method. The purpose of Task 4 is to take the results of the community meetings and the final Advisory Committee recommendations and formulate the goals and objectives for Phase Two.

Work completed prior to Task 4.

- 1) Project Staff and the Consultant will have jointly reviewed the periodic Consultant reports prior to their submission to the Advisory Committee and developed written recommendations on evolving goals and objectives for Phase Two. These recommendations will have been presented to the Advisory Committee prior to meeting 2 (regarding the community meetings) and 3, 4 and 5 (regarding Tasks 2 and 3). At each successive meeting the Advisory Committee will have provided continuous feedback thereby ensuring that stakeholder goals and values are met over the course of the project. As stated, Project Staff and Consultant will have made final recommendations for Phase Two goals, objectives, projects and water management techniques to the Advisory Committee for consideration at meeting 6 and the Advisory Committee will have provided a final set of goals, objectives, projects and water management techniques.

Once all prior work is complete, Project Staff and Consultant will:

- 1) Synthesize the information gathered at community meetings, the recommendations of the Advisory Committee and the data, maps and reports generated by Tasks 2 and 3 into a final report that will provide a community driven guide for Phase Two of the IWMP.

Deliverable.

The following three deliverables will be combined into a CWCB final report which will comply with and meet the requirements of the Final Project Report to be submitted to CWCB at the conclusion of this grant.

- 1) Blue River IWMP-Phase Two-Goals and Objectives.
- 2) List of demonstration projects in all three reaches of Blue River Watershed
- 3) Updated stakeholder outreach plan for Phase Two.
