

PROGRESS REPORT – May 9, 2019 through June 6, 2019
City Lake Dam Rehabilitation and Enlargement Project
City of Walsenburg – CTGG1 2019-094

Project Update:

The construction contractor advanced the following work items:

- Placed earth fill and filter sand in the dam embankment. Earth fill was obtained from the reservoir basin.
- Constructed approximately 85 percent of the toe drain including slotted and solid drain pipe, filter sand, filter gravel, and manholes.
- Continued Dewatering and Reservoir Control
- Continued Reservoir bypass waterline
- Transported riprap material to the Site
- Procured cathodic protection materials
- Procured and stored slide gates, the canal gate, and accessories
- Transported welded steel pipe to the Site.
- Ancillary project work

All work completed to date is considered satisfactory and is acceptable. Project is approximately 60% complete.
