Hi Jessica~

How's lockdown life?

Kirk wanted me to email you about Bessemer. His substantial completion letter stated that I would be doing an option letter, however an option letter is not needed. When the last payment was made, it was marked as "final" which closed the contract. So there is nothing to change, as the annual payment is remaining the same as previously stated. The only thing changing is the 1% fee and that fee was not put into CORE as part of the contact total amount. Kirk would like you to file this email in laserfiche so there is a record of no option letter being completed.

Thank you,
