Water Supply Reserve Fund – Grant and Loan Program Water Activity Summary Sheet July 15, 2020 Agenda Item 16(a)

Applicants & Grantee:	Trout Unlimited	
Water Activity Name:	Boles and Manny Ditch Infrastructure Improvement Project	
Water Activity Purpose:	Ag & Env/Study & Implementation	
County:	Delta	
Drainage Basin:	Gunnison	
Water Source:	Uncompangre River	
Amount Requested:	\$33,500 Gunnison Basin Account	
Matching Funds:	Applicant & 3 rd Party Match (cash & in-kind) = \$25,350 • 76% of the Basin Account request (meets 25% min)	

Staff Recommendation:

Staff recommends approval of up to \$33,500 from the Gunnison Basin Account to help fund the project titled: Boles and Manny Ditch Infrastructure Improvement Project.

Water Activity Summary: WSRF grant funds, if approved, will assist Trout Unlimited and the Boles and Manny Ditch water users address aging infrastructure and deferred maintenance by installing new infrastructure including: in-river diversion weir; headgate; measurement weir; and control structures in the proper locations at the heading of the ditch. This work will include grading and placement of material adjacent to the Uncompahgre River that will promote healthy riparian growth and stabilized banks. Contractors will also spread native seed mix on disturbed areas. These initial improvements will allow water users to access water for all lands under the ditch, which is not now possible. The water users intend to contract with an engineer to complete a ditch-wide assessment, which will guide future improvements including lining, piping and other upgrades related to water efficiency and salinity control.

Discussion: This effort will assist the Gunnison Basin Roundtable meet the goals 5, 7 & 8 of their Basin Implementation Plan by: protecting environmental and recreational water uses; encourage beneficial relationship between agricultural and environmental & recreational water uses; and restoring and modernizing infrastructure.

Issues/Additional Needs: The applicant must provide all outstanding letters of matching commitment prior to entering into a grant contract with the state, otherwise no issues or additional needs have been identified.

Eligibility Requirements: The application meets requirements of all eligibility components: General Eligibility, Entity Eligibility, Water Activity Eligibility, and Eligibility Based on Match Requirements.

Evaluation Criteria: n/a

Funding Sources/Match	Cash	In-kind	Total	<u>Status</u>
Trout Unlimited	\$0	\$6,000	\$6,000	Secured
USFWS Partners Program	\$2,500	\$0	\$2,500	Pending
Boles and Manny water users	\$9,000	\$7,850	\$16850	Pending
Sub-total Matching Funds	\$11,500	\$13,850	\$25,350	
WSRF Gunnison Basin Account	\$33,500	\$0	\$33,500	Secured
Total Project Costs	\$45,000	\$13,850	\$58,850	

CWCB Project Manager: Craig Godbout

May 26, 2020

Craig Godbout Colorado Water Conservation Board 1313 Sherman Street Denver, CO 80203

Re: Gunnison Basin Roundtable Approval of Boles Manny Diversion Improvement WSRF Application

Dear Mr. Godbout,

I am writing on behalf of the Gunnison Basin Roundtable to let you know that the members have approved a request for funding from the Water Supply Reserve Fund for the Boles Manny Diversion Improvement Project. The request was for \$33,500 of Basin funds for a total project cost of \$67,650 to replace a diversion from the Uncompaghre River just above Delta and install a measuring weir. This diversion irrigates approximately 400 acres of farm land south of Delta and has been deteriorating for some time.

Boles Manny serves 10 landowners with 3 decrees, two of which are pre-Compact water rights. Although not mentioned in the BIP, the project is in line with numerous Basin goals including preservation of current uses, improving aging infrastructure, maintaining agricultural use and improving the environment (minimizing the disturbance of the Uncompaghre River as well as reclaiming a wetlands area near the diversion). The project is supported by US Fish and Wildlife funds, Trout Unlimited and the water rights owners.

If you need additional information, please let us know. Thank you very much for your consideration.

Best Regards,

Kathleen Curry

Kathleen Curry, Chair Gunnison Basin Roundtable 54542 US Highway 50 Gunnison, CO 81230 <u>kathleencurry@montrose.net</u> Cell 970-209-5537 Home 970-641-0699

Colorado Water Conservation Board

Water Supply Reserve Fund Grant Application

Instructions

All WSRF grant applications shall conform to the current 2016 WSRF Criteria and Guidelines.

To receive funding from the WSRF, a proposed water activity must be approved by a Roundtable(s) <u>AND</u> the Colorado Water Conservation Board (CWCB). The process for Roundtable consideration and recommendation is outlined in the 2016 WSRF Criteria and Guidelines. The CWCB meets bimonthly according to the schedule on page 2 of this application.

If you have questions, please contact the current CWCB staff Roundtable liaison:

Arkansas

Description of Grantee

Provide a brief description of the grantee's organization (100 words or less).

Trout Unlimited (TU) is the nation's largest coldwater conservation organization with approximately 150,000 volunteers and roughly 277 employees nationwide working to protect, reconnect, restore and sustain America's fisheries. TU's volunteers and their local chapter groups work on a variety of initiatives that meet the unique needs of their watersheds.

TU's focus in the Gunnison Basin is to find win-win solutions to water supply and infrastructure issues by collaborating with water users

Type of Eligible Entity (check one)

Public (Government): municipalities, enterprises, counties, and State of Colorado agencies. Federal agencies are encouraged to work with local entities. Federal agencies are eligible, but only if they can make a compelling case for why a local partner cannot be the grant recipient.

Type of Eligible Entity (check one)

Public (Districts): authorities, Title 32/special districts (conservancy, conservation, and irrigation districts), and water activity enterprises

Private Incorporated: mutual ditch companies, homeowners associations, corporations

Private Individuals, Partnerships, and Sole Proprietors: are eligible for funding from the Basin Accounts but not for funding from the Statewide Account.

Non-governmental organizations: broadly, any organization that is not part of the government

Covered Entity: as defined in Section 37-60-126 Colorado Revised Statutes

Type of Water Activity (check one)

Location of Water Activity			
Please provide the general county and coordinates of the proposed activity below in decimal degrees . The Applicant shall also provide, in Exhibit C, a site map if applicable.			
County/Counties	Delta		
Latitude	38.67743N		
Longitude	108.01989W		

Water Activity Overview

Please provide a summary of the proposed water activity (200 words or less). Include a description of the activity and what the WSRF funding will be used for specifically (e.g. studies, permitting, construction). Provide a description of the water supply source to be utilized or the water body affected

Water Activity Overview

by the activity. Include details such as acres under irrigation, types of crops irrigated, number of residential and commercial taps, length of ditch improvements, length of pipe installed, area of habitat improvements. If this project addresses multiple purposes or spans multiple basins, please explain. The Applicant shall also provide, in Exhibit A, a detailed Statement of Work, Budget, and Schedule.

The users of the Boles and Manny ditch, located near Delta Colorado, have been addressing aging infrastructure and maintenance issues that has affected the usefulness of the ditch over the past year. The Boles and Manny ditch provides water to 10 users on approximately 400 acres of land. The users wish to build upon recent efforts to improve efficiency and address operational issues. Trout Unlimited, in partnership with the users of the ditch, are applying for grant assistance to assist the users with making necessary uprgrades to diversion and water control infrastructure and to analyze the system for future improvements. TU is assisting in the project because the improvements to the infrastructure will reduce impacts on the Uncompany river and lead to more efficient use of water. The Boles and Manny is not an incorporated ditch company which makes contracting grant funds difficult.

Specifically, the ditch users wish to construct a diversion from the Uncompany River that does not require frequent maintainance and is not a detriment to the health of the river and the riparian lands nearby. The ditch company also plans to install a new headgate structure, measurement weir at the diversion and near the end of the ditch as well as adequate splitter boxes in at least 2 locations.

The water users intend to contract with an engineer to complete a ditch-wide assessment which will guide future improvements including lining, piping and other upgrades related to water efficiency and salinity control.

The ditch company diverts water under irrigation rights adjudicated in 1890, 1914, and 1941. The total amount decreed to the ditch is 17.96cfs

Measurable Results			
To catalog measurable resu	To catalog measurable results achieved with WSRF funds please provide any of the following values.

	Other Explain:		

Water Activity Justification

Provide a description of how this water activity supports the goals of <u>Colorado's Water Plan</u>, the most

Water Activity Justification

recent <u>Statewide Water Supply Initiative</u>, and the respective <u>Roundtable Basin Implementation Plan</u> and <u>Education Action Plan</u>⁽¹⁾. The Applicant is required to reference specific needs, goals, themes, or Identified Projects and Processes (IPPs), including citations (e.g. document, chapters, sections, or page numbers).

For applications that include a request for funds from the Statewide Account, the proposed water activity shall be evaluated based upon how well the proposal conforms to Colorado's Water Plan criteria for state support (CWP, Section 9.4, pp. 9-43 to 9-44;) (Also listed pp. 4-5 in <u>2016 WSRF</u> Criteria and Guidelines).

This infrastructure improvement project is being undertaken in large part to address multiple needs including those of neighboring water users and the environment. On page 4 of the first chapter of the water plan, the need for – "implementing projects and methods that take into account potential multiple beneficiaries, potential multiple uses, and the effects on river systems on which all Coloradans rely" is addressed.

By implementing this project, the ditch users, with help from the State will be addressing what the Water Plan refers to as one of the key Values which is - A strong environment that includes healthy watersheds, rivers and streams, and wildlife. (Chapter 1 page 6 WP)

The concept of protecting agriculture along with the environment is discussed on page 18 of Section 6.2 – Water Supply Management. This project addresses that common concept by assisting in protecting senior water rights while reducing impacts on the environment. By completeing the structural improvements and planning, the ditch company and partners will ensure that all lands under the ditch will have access to water which is not now the case.

The goal of promoting "restoration, recovery, sustainability, and resiliency of endangered, threatened, and imperiled aquatic- and riparian-dependent species and plant communities" is listed on page one of Section 6.6 of the Water Plan. While the primary goal of this project is to restore agricultural irrigation infrastructure it will also meet the environmental goals listed by the Water Plan.

This project will help achieve the following baisn goals listed on page 28 of the BIP:

The primary goal is to protect existing water uses this will be acheieved by improving the infrastructure necessary to divert, measure and control water. The Boles and Manny Ditch was originally put into use in 1881 and was adjudicated in 1890 and has been used since that time.

The project will also support the second goal of discouraging conversion of productive agricultural land to other uses by ensuring that the lands under the ditch can easily access the amount of water they need to produce crops.

By improving the efficiency along with the diversion structure and reclaiming the disturbed lands around the diversion, the project will meet goal 5 – protecting environmental and recreational water uses, as well as goal 7 – encourage beneficial relationship between agricultural and environmental & recreational water uses. There are populations of bluehead sucker, flannelmouth sucker, and roundtail Chub, the species commonly referred to as the "three species" which are listed by US Fish and Wildlife service as species of special concern, in the Uncompanding near Delta as well as resident populations of bluehead suckers in the Uncompanding upstream from the project site. It can be inferred that these important native fish rely on tis portion of the river and will benefit from efficiency and restoration practices.

Goal 8 of the BIP will be supported by restoring and modernizing the infrastructure along the ditch. Some of the lands around and under the ditch have been altered by development which has changed how the ditch can and should operated. By investing in improved control structures, pipe or lining the

Water Activity Justification

ditch company can continue to provide water to those users who are still irrigating without creating conflict.

(1) Access Basin Implementation Plans or Education Action Plans from Basin drop down menu.

Matching Requirements: Basin Account Requests

Basin (only) Account grant requests require a 25% match (cash and/or in-kind) from the Applicant or 3rd party and shall be accompanied by a **letter of commitment** as described in the 2016 WSRF Criteria and Guidelines (submitted on the contributing entity's letterhead). Attach additional sheet if necessary.

Contributing Entity	Amount and Form of Match (note cash or in-kind)
US Fish and Wildlife Partners Program	\$2,500 (cash)
Trout Unlimited	\$6,000 (in-kind)
Boles & Manny water users	\$9,000 (cash)
Boles & Manny water users	\$7,850 (in-kind)
Total Match	\$25,350
If you requested a Waiver to the Basin Account matching requirements, indicate the percentage you wish waived.	

Matching Requirements: Statewide Account Requests

Statewide Account grant requests require a 50% match as described in the 2016 WSRF Criteria and Guidelines. A minimum of 10% match shall be from Basin Account funds (cash only). A minimum of 10% match shall be provided by the applicant or 3rd party (cash, in-kind, or combination). The remaining 30% of the required match may be provided from any other source (Basin, applicant, or 3rd party) and shall be accompanied by a **letter of commitment.** Attach additional sheet if necessary.

Contributing Entity	Amount and Form of Match (note cash or in-kind):		

Matching Requirements: Statewide Account Requests		
Total Match	\$	
If you requested a Waiver to the Statewide Account matching, indicate % you wish waived. (Max 50% reduction of requirement).
