

## **75% Progress Report**

Colorado Water Conservation Board  
Attn: Ben Wade  
1313 Sherman Street Rm. 718  
Denver, CO 80203

June 25, 2019

Please accept the following report for 75% complete on the Rainwater Harvesting Demonstration Sites.

All three of the planned demonstration sites are completed with the barrels and information signs installed. Our first education and demonstration occurred May 14<sup>th</sup> at the Bayfield Primary School. We provided rainwater harvesting facts and information to 30, 3<sup>rd</sup> graders. We will provide an additional presentation at this location when the students return in the fall.

Other education presentations will occur at the Powerhouse Science Center and the Pine River Library over the course of the summer.

The remainder of the grant will be ribbon cutting with education and demonstrations, data collection and reporting to be completed in the fall of 2019.

Sincerely,

Laurie E. Dickson, Executive Director
