RE: Final Report Water Plan Grant – Treanor Enterprise Ditch Company

Dear Brent,

The Treanor Ditch diverts irrigation supplies from the La Plata River approximately 6.5 miles to the southwest of the Herperus Gage. The ditch loss study that was completed showed an estimated loss of up to as much as 40 percent of river diversions due to seepage. The project successfully completed lining a 1,000-foot section of this ditch where seepage losses were the greatest.

This task of lining the ditch was successfully completed on May 9, 2020.

TASK 1 - Line approximately 1,000 feet of the Treanor Ditch

Used soil amendments of bentonite, lime, and clay to line approximately 1,000 feet of the Treanor Ditch, to more efficiently convey irrigation water supplies to agricultural users.

TASK 1 – Line approximately 1,000 feet of Treanor Ditch

POND S

SODIUM BENT

DATE/LOT# 5-3-18

WEIGHT: 3000 BAG#: 1

REDMOND, UTAH 84652
