Description: WPG Envir & Rec Tamarisk removal Poudre learning							
Located within the floodplain and riparian corridor of the lower Cache la Poudre River, the Poudre Learning Center (PLC) will remove invasive, phreatophytic plants, including Russian olive, tamarisk, and crack willow from riparian portions of our 203 acre campus. Once removal has been completed PLC will monitor for re-growth and will immediately remove new plants as part of our long-term management of the site. As appropriate, PLC will conduct revegetation efforts to establish plant stands that will discourage future colonization of these sites by invasive plant species. We will use staff and volunteers to accomplish the work. Currently we are in discussions with Volunteers for Outdoor Colorado, Wildland Restoration Volunteers and Weld Youth Corps to obtain their services on this project, which should reduce overall project cost. Additionally PLC will utilize our volunteer resources to further reduce costs.							
Service From: 08/17/20				Service To: 12/31/21
