Subject: Question about ag structures
To: Houck - DNR, Kevin kevin.houck@state.co.us

Hi Kevin,

Thank you for the informative presentation today.
I will try to clarify my question about ag structures.

When discussing the lowest floor and the area being used for parking only, this brought to mind the gulf homes where the ground level can be used for parking of vehicles with the residential living areas above.

Why would ag structures that are vented and waterproofed appropriately be regulated differently than homes along the coasts?
