Description: WPG Envir & Rec Yampa River Habitat & Rec Pleasant Valley						
The Pleasant Valley project will utilize the design-build approach to improve health, function, and recreational opportunities for ~4,300 linear feet of the Yampa River between Stagecoach Reservoir and Lake Catamount, including the recently acquired Hubbard Summer Camp property. This project is a strategic investment for the watershed due to its location between the two reservoirs, which impacts river functions and constrains functional habitat. The reach has a minimum instream flow right under Colorado's Instream Flow Program. The reach is adjacent to a high priority reach identified in the YWGBRT non-consumptive needs assessment. The project will improve functional habitat in a critical reach of the river and increase longitudinal connectivity of higher quality.
