<b>Description:</b> WPG GF Taylor Park Erosion Control & Riparian Restoration						
Taylor Park Erosion Control & Riparian Restoration Project; The proposed Taylor Park Erosion Control and Riparian Restoration Project (hereinafter "Project") seeks to restore and protect streams and watershed health in Taylor Park, Colorado in the Gunnison River Basin. The purpose of the project is to: 1) improve watershed health by stopping erosion and fragmentation of hillsides; 2) restore streams impacted by illegal routes and prevent further degradation of these streams; and 3) implement the USDA Forest Service's 2010 travel management decision while making it easier for the public to know which routes are authorized.
