Statement Of Work	
Date:	March 29, 2022
Name of Grantee:	Municipal Subdistrict, Northern Colorado Water Conservancy District
Name of Water Project:	Colorado River Connectivity Channel
Funding Sources:	CWCB, NRCS, Trout Unlimited, Grand County Open Lands and River Trust, Colorado River Water Conservation District, GOCO Restore, Landowners, Various Corporate Sponsors, Northern Water, Municipal Subdistrict.
Water Project Overview:	
<p>The project involves the construction of a new connectivity channel (approximately a mile in length) that will reconnect the Colorado River upstream and downstream of Windy Gap Reservoir. The services this project is providing to the state are the environmental benefits including allowing for the movement of fish, macroinvertebrates, and coarse sediments needed for aquatic habitat, and to improve stream temperature. The reservoir will be reduced in size, with a new dam to be constructed to separate it from the new channel. A structure to regulate flows into the reservoir will be installed. The channel will be constructed to mimic a natural channel and will include aquatic habitat features. In addition, the Fraser river gauge, upstream of the reservoir on the Fraser River will be improved to allow for upstream fish passage. The environmental benefits are a service to the public and state. CWCB has agreed to pay for these benefits through the Water Plan Grant Fund and the Severance Tax Trust Fund.</p>	
Project Objectives:	
<p>The project will provide the following environmental benefits to the state:</p> <ol style="list-style-type: none"> (1) Re-establish connectivity with upstream tributaries, expanding available habitat and range for fish, macroinvertebrates and other aquatic life, (2) Re-establish transport of coarse sediment from the upstream river reaches past reservoir to alleviate downstream gravel depletion and armoring, (3) Improve water quality by moderating water temperatures, (4) Reduce nutrient loading by routing primary flows through the connectivity channel, and (5) Reduce the transport of aquatic vegetation from the reservoir that has degraded downstream riverine habitats. 	
Tasks	
Task 1 – Construction	
Description of Task:	
Construct the components of the Project including a new dam embankment and spillway, diversion structure and grade control, connectivity channel, and the Fraser Gauge Modifications.	
Method/Procedure:	

Tasks

The WG Enterprise selected Concrete Express Inc (CEI), a qualified construction contractor, to join the design team through a Construction Manager/General Contractor (CM/GC) process. The CM/GC process is being implemented to foster innovation, mitigate risk, improve design quality, improve cost control, and optimize construction schedules. The CM/GC process occurs in two phases. The first contract phase occurs during design where CEI was selected through a competitive process to serve as the Construction Manager (CM) during design. This allows CEI to integrate with the design team to work with the WG Enterprise to identify risks, provide costs projections, constructability reviews, and refine the project schedule. Once the design phase is complete, the contractor and WG Enterprise will negotiate on the price for the construction contract. If all parties agree with costs then the CM will become the General Contractor (GC) for the second contract phase which is the construction phase. If all parties cannot come into agreement with cost, the project will proceed with a competitive bid process to select the construction contractor.

The selected Contractor will be responsible for means and method of construction and for obtaining all applicable construction related permits.

Deliverable:
