Ed Orr, Manager

Proposed System Conservation Pilot Program Project Description Summary (if needed, provide details on additional sheets attached to this application)

Applicant has historically irrigated approximately 870 acres of hay meadows and pasture lands as shown on the attached map with the water rights attached. Applicant purposes to seize diversion of the water rights and irrigation.

Project Location -

Please see attached map.

Description of Current Water Use

Water has been diverted to irrigate lands as shown on attached maps.

Water Right Information

Please see attached.

Diversion Point(s) and Measurement Device(s)

Map attached. Ditches contain measured flumes.

Estimated Amount of Water Conservation Per Year or Over the Life of the Proposed Project (Acre-feet)

See attached.

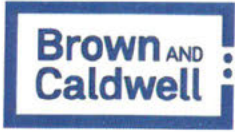

Proposed Verification Method

Verification site visits of the property.

Timeframe/Schedule
Irrigation historically begins approximately June 1 and ends from September 1 to October 15 annually.
Funding Request
