Description: GF; CO's Private Lands Conservation Plan							
Through this project we will define the future of private lands conservation by identifying shared priorities for land and water conservation based on science and proven models for community conservation. The plan has two primary areas of emphasis. It will 1) Focus our collective protection efforts on the priority lands, waters and habitats necessary to create resilient and connected physical landscapes in the face of climate change and population growth; and 2) Establish models for conservation based on effective programs that connect people with their local landscapes, a concept we have dubbed "community conservation."
