Description: Quantifying Recreational Impacts and Enhancement_CMS 183291						
The objective of this project is to identify river segments that provide important value to people across Colorado, to understand the issues that affect the public's opportunity to enjoy these rivers, to quantify existing impacts and future risks from diminished streamflows, and to identify opportunities to reduce those impacts and risks. This project seeks to take many factors into account that affect river recreational opportunities and use those data to support decisions that can maintain or improve conditions that allow for sustainable river recreation.						
As a part of this agreement, please refer to Exhibit A and B (dated 5/1/23) for a complete Statement of Work and Budget.
