### Water Project Overview

Major Water Use Type	Education
Type of Water Project	Education
Scheduled Start Date - Design	10/1/2023
Scheduled Start Date - Construction	
Description	This project aims strategically to “enhance Colorado’s water communication, outreach, education, and public engagement efforts” by engaging youth and agencies in co-creating South Platte River restoration and monitoring activities and presenting those activities at a River Summit to reach an even larger audience. This process results in culturally sensitive STEM and leadership experiences for youth and an enhanced youth/community perspective for agency representatives.

### Measurable Results

New Storage Created (acre-feet)  
New Annual Water Supplies Developed or Conserved (acre-feet), Consumptive or Nonconsumptive  
Existing Storage Preserved or Enhanced (acre-feet)  
New Storage Created (acre-feet)  
600 Length of Stream Restored or Protected (linear feet)  
Length of Pipe, Canal Built or Improved (linear feet)  
Efficiency Savings (dollars/year)  
Efficiency Savings (acre-feet/year)  
2 Area of Restored or Preserved Habitat (acres)  
Quantity of Water Shared through Alternative Transfer Mechanisms or water sharing agreement (acre-feet)  
Number of Coloradans Impacted by Incorporating Water-Saving Actions into Land Use Planning  
6,000 Number of Coloradans Impacted by Engagement Activity  
Other

### Water Project Justification

This project proposal responds to specific South Platte and Metro Basin goals of the Colorado Water plan (p. 122): to protect and enhance environmental attributes, protect and enhance recreational attributes, and broaden South Platte communications, outreach, and education programs. The project increases the prospect of enhancing the river's environmental attributes by enlisting youth and their communities to work on behalf of the river and environmental quality, including land uses that impact the river. It introduces the river and its diverse recreation potential to stakeholders who may be largely unaware of the South Platte or negatively predisposed toward it. In hands-on, STEM-oriented project based learning and action, the project presents an innovative approach to education, one that holds a lot of promise to build strong ties between youth and the South Platte River.
