<b>Description:</b> Water Plan Grant LU Sterling Ranch Rainwater Harvesting Proj						
After over a decade of data collection supporting the legal right to harvest rainwater as a water supply, Dominion Water & Sanitation District (Dominion) is moving forward with the implementation of the state's first regional rainwater harvesting (RWH) collection system at Sterling Ranch. This design-build project is an extension and retrofit of existing stormwater infrastructure to facilitate the diversion, storage, and distribution of rainwater for non-potable use.						
Dominion has selected Prospect Village as the location of the first planned regional rainwater harvesting at Sterling Ranch. Prospect Village includes two existing stormwater facilities, a regional park with non-potable demand, and existing infrastructure and easements for the distribution of rainwater harvested.
