Re: Arkansas River Basin Water Forum 2023 Educational and
Outreach Event - PAY REQUEST No. 1 – FINAL
Reimbursement Request
CWCB Contract Number PO 2023-3282

Dear Ben:

Enclosed is Pay Request One for the costs associated with the Project. The following is a summary of all current Project charges.

Current Project Charges	\$85379.17
Previous Project Charges	<u>\$0,000</u>
TOTAL	\$85379.17
 CWCB GRANT PAYMENT (50%)	 \$44087.70
Less Previous Payments	<u>\$0,000</u>
AMOUNT OF THIS REQUEST	\$44087.70

We request payment for the amount indicated above. We have included the invoices related to the requested payment amount identified above. If you have any questions, please feel free to call this office at 719-251-2845.

Sincerely,

Insurance Expiration Dates
GRANTEE – 01/21/2024

Jean Van Pelt, Program Manager

Invoices

ARKANSAS RIVER BASIN WATER FORUM

PROGRESS REPORT – FINAL REPORT Arkansas River Basin Water Forum 2023 Educational and Outreach Event PAY REQUEST No. 1 FINAL

Project Cost expended during this Pay Request is summarized below:

Company A	Invoice Amount
DoubleTree by Hilton Venue Folio # 1078982 A 4/21/4/28/2023	\$68581.09
	\$000,000
Subtotal	\$68581.09
Company B	Invoice Amount
Encore Rental #2001-3356 4/24-4/26/23	\$8028.22
	\$000,000
Subtotal	\$8028.22
Jean Van Pelt, Program Management, Invoice # 47, May 1, 2023	\$7600
	\$000,000
Subtotal	\$7600
Amazon, 114832246958394600, April 13, 2023	\$99.48
	\$000,000
Subtotal	\$99.48
Amazon, 1146237723833840, April 14, 2023	\$132.33
	\$000,000
Subtotal	\$132.33
Staples, 10495, April 19, 2023	\$74.22
	\$000,000
Subtotal	\$74.22
Pinnacle Promotional Productions, 8951, April 19, 2023	\$863.83
	\$000,000
Subtotal	\$863.83

Current Project Charges	\$85379.17
--------------------------------	-------------------

**Project Update:**

Task 1 – Venue Catering – ARBWF provided the venue, DoubleTree by Hilton, final guaranteed numbers for catering the 2023 educational and outreach event:

1. Monday, April 24th Local Leaders Dinner – 135 attendees
2. Tuesday, April 25th Social Networking Dinner – 120 attendees
3. Tuesday, April 25th Morning Refreshments and Lunches – 287 attendees
4. Wednesday, April 25th Morning Refreshments and Lunches – 200 attendees

The ARBWF paid \$68581.09 for catering, 24% service charge and sales tax to the DoubleTree. Included in this amount is \$3335.42 for alcoholic beverages served at the Local Leaders and social Networking Dinners. Subtracting the cost of alcoholic beverages from the total catering cost brings the balance to \$65245.67. ARBWF is requesting 50% or \$32622.84 in reimbursement for Task 1.

Task 2 – Technical Support and Audio-Visual Rental – The DoubleTree venue contracts with Encore to provide these services. Encore's services are included in the DoubleTree's invoice and amounts to \$8,028.22 for providing equipment rental, setup/strike labor and a non-refundable loss damage waiver plus sales tax. ARBWF is requesting \$2,695 in reimbursement for this task.

Task 2 – Program Management – ARBWF has contracted with Program Manager Jean Van Pelt to perform the following:

- Develop, manage, and reconcile business and conference budgets. Manage, reconcile and report monthly on all revenue and expenditures.
- Develop and implement a marketing campaign to solicit sponsorships and to increase attendance.
- Responsible for leading and managing various conference planning teams in the planning and implementation process for all aspects of the conference; including attending all ARBWF Board and Planning meetings.
- Provide leadership, motivation, direction, and support to the planning team. Assign/delegate tasks to volunteers and committee members and coordinate with them to achieve the target outcome.
- Solicit, manage, and track conference sponsorships. Responsible for soliciting sponsorships and providing information on the benefits of the associated levels and ensure the benefits associated with sponsorships are delivered.
- Manage and maintain the ARBWF.org website.
- Manage and execute e-commerce ability for financial transactions to ensure sponsorships and registrations are completed efficiently and accurately.

- Solicit conference registrations and manage the registration process. Report monthly on registrations and prepare registration materials ie: deposits, name tags, lists etc.
- Solicit and manage conference exhibitors. Responsible for providing information on exhibitors' benefits, associated costs, and determination of exhibitor spaces.
- Secure and manage all on-site conference facilities and catering services.

Ms. Van Pelt's services for the months of February, March, and April amounted to \$16400. The February invoice #45 in the amount of \$2440 and March invoice #46 in the amount of \$6360 are both considered a cash match of \$8800. Ms. Van Pelt's May 1, 2023 invoice #47 in the amount of \$7600 is a part of this reimbursement request.

Task 4 – Infographic, Registration, and Signage – The ARBWF Planning Committee spent 44 in-kind hours at \$40 an hour creating the infographic for an in-kind match amount of \$1700. Colorado Springs Utilities printed 400 copies of the infographic for the in-kind amount of \$1000. The infographic was distributed at the 2-day forum. The remaining copies of the infographic were provided to the Purgatoire River Watershed Partnership, Lower Arkansas Valley Water Conservancy District, Colorado State Forest Service and Colorado Spring Stormwater Enterprise to aid them in their water education and outreach efforts.

ARBWF spent \$1169.70 on registration supplies which includes the following:

1. Amazon \$99.48 ink for printing name badges and signage
2. Amazon \$132.33 for Avery name badge holders
3. Staples \$74.22 ink for printing name badges and signage
4. Pinnacle Promotions \$863.83 for lanyards and pens for registration

The ARBWF is requesting \$1169.70 in reimbursement for task 4.

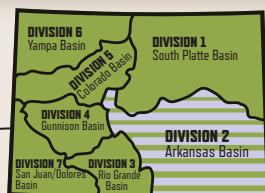

Task 5 – Tour Transportation - ARBWF did not incur any costs for tour transportation because the Arkansas River Outfitters Association and Colorado Springs Utilities provided vans and volunteer drivers to transport tour participants to and from the tour locations and the venue. This in-kind match easily meets and exceeds \$2,500.

PLEASE NOTE: The Arkansas River Basin Water Forum always performs a survey to evaluate the attendees' experience, what worked well and what did not work well. Attached to this report are the survey results as of May 2, 2023. Results are still coming in.

2023 Water Facts

ARKANSAS RIVER BASIN WATER FORUM

MAJOR ARKANSAS RIVER BASIN TRANS-MOUNTAIN DIVERSIONS

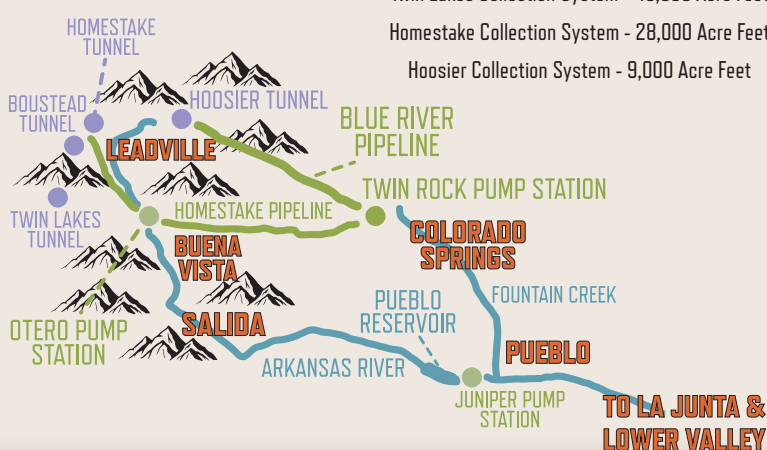

The Arkansas River Basin has 4 major collections systems and their average volumes are as follows:

Fry-Ark Collection System - 56,000 Acre Feet

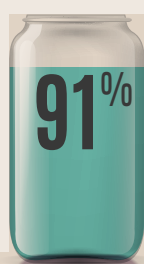

Twin Lakes Collection System - 43,000 Acre Feet

Homestake Collection System - 28,000 Acre Feet

Hoosier Collection System - 9,000 Acre Feet

HOW COLORADO USES WATER

Agriculture

Industrial

Municipal

Our population could nearly double by 2050.

ARK BASIN MUNICIPAL WATER SUPPLY GAP

The Arkansas River Basin's future water supply gap ranges from 42,400 to 100,600 acre-feet. Growing demands will be supplied by a combination of moving water from irrigated agriculture to cities, conservation, reuse, and storage.

WATER WHAT?

ACRE-FOOT – 325,851 gallons or enough water to cover a football field 12 inches deep.

DENVER BASIN – Deep aquifer that is used but not replenished.

FRY-ARK – One of several transbasin water projects.

GROUNDWATER – Water held underground in rock pores and crevices.

RETURN FLOW – The unconsumed portion of water deliveries that return to the stream.

TRANS-BASIN – Water delivered from one water basin to another, usually from the West Slope.

WATER RIGHT – Right to use water.

ARKANSAS RIVER COMPACT IS CELEBRATING 75 YEARS

AGREEMENTS

Colorado must comply with nine interstate compacts and other water-sharing agreements at our state borders.

The Arkansas River Compact requires water deliveries to

20-year average annual state line flows are **80,414 ACRE-FEET**.

2023 Water Facts

ARKANSAS RIVER BASIN WATER FORUM

WHERE YOUR WATER COMES FROM

Average Annual Native Arkansas River Supplies **600,000 ACRE-FEET**

130,000 ACRE-FEET of water from the West Slope is imported to the Arkansas River Basin on average, annually.

El Paso County water suppliers import much of their supply from the West Slope.

Rural homeowners and small communities rely on wells in the Denver Basin and other ground water sources.

WATER AT YOUR HOUSE

1/4 ACRE-FOOT is delivered to a typical home annually.

Rainfall on roofs and pavement flows directly to streams.

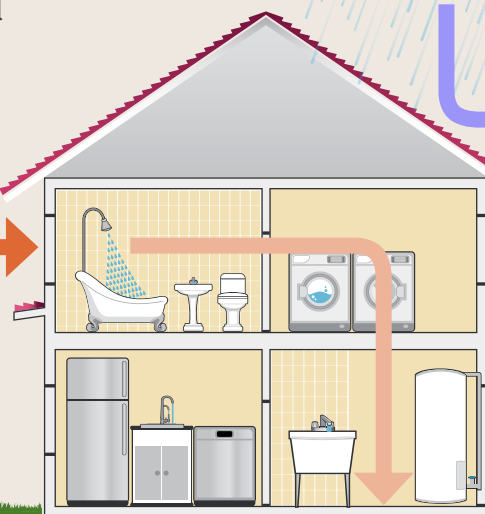

HOME WATER USAGE

60% INSIDE

40% OUTSIDE

A small fraction of water used outside returns to the stream.

RETURN FLOWS

95%

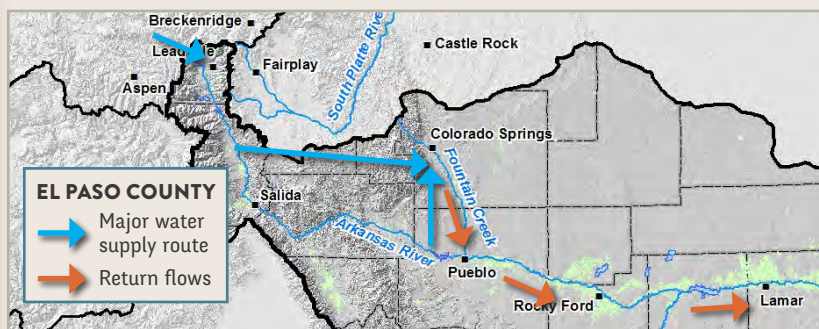

of water used inside returns to the stream through the treatment system.

WHERE YOUR WATER GOES

Arkansas River Basin Water is reused **MORE THAN ONCE**

RETURN FLOW REUSE

Return flows benefit downstream users directly or as an offset for well pumping to supply farms and towns. Water suppliers also exchange return flow for additional upstream supply.

Water suppliers coordinate with recreation & environmental groups to improve streamflow timing in the upper Arkansas River.

ARBWF 2023 Out of Basin Attendees List

What did you like or dislike about the Water Forum?	How organized was the Water Forum	Was the Forum's length too long, too short, or about right?
	Excellent	Just Right
	Excellent	Just Right
I love the event but feel that speakers, particularly state policy makers, are "wagging the dog", so to speak, regarding Colorado's water challenges. I would appreciate more pointed and controversial positions to be heard. There isn't enough water. Colorado's growth can't go on forever, no matter what the distribution of water is. Ag as it is stands no chance against urban needs without direct state intervention to block ag to urban transfers. great diversity of stakeholders	Excellent	Just Right
	Excellent	Just Right
	Excellent	Just Right
I like the mixture of educational sessions and then tours after Presentations and tours were very current on issues facing the water community.	Excellent	Just Right
	Good	Too Short
	Good	Just Right
The comradery, hearing opinions of other water users from different areas of the state and what the I-25 corridor is planning and doing. The interest in keeping agriculture whole while sharing water.	Excellent	Just Right
Minor tech issues from presenters. Perhaps better communication or staff presence to ensure lunchtime events progress as planned. Very timely topics. Good space. Additional vendor possibilities? SNOTEL session was a bit more technical than necessary - would've been nice to get more interpretive and Ark Basin relevant info	Good	Just Right
All the great people!!	Good	Just Right
The IT needs to be vetted next time at the venue	Excellent	Just Right
Nothing really. There were a few minor glitches but nothing to worry about	Excellent	Just Right
A/V issues during some sessions, departure for some tours was unorganized.	Excellent	Just Right
Solid program, interesting participants, lots to learn.	Excellent	Just Right
While the entire Forum was very good, I most enjoyed the networking opportunities.	Excellent	Just Right
Sitting near the back, the constant in and out of attendees and noise from the outer hallway was a distraction, although a minor one.	Excellent	Just Right
	Excellent	Just Right
Excellent facilities, good food, great panels and moderators.	Excellent	Just Right
	Good	Just Right
I enjoyed the presentations as I learned many things and got to put faces to many names. I attended the Fountain creek tour...while I understand the weather was not optimal, the tour itself was nearly unbearable. There was no ringleader to help direct/organize around departure location...very confusing. The USGS water monitoring and CPW fish stations were just ok, the others were simply endured...dry, uninspiring presentations in a cold driving rain ...a few EZ ups would have been nice given the forecast.	Good	Too Long
The networking and percolation was great. The only dislike was the Fountain tour in the rain, which was unavoidable. Generally I liked the food and the programs. Good job!	Excellent	Just Right
	Excellent	Just Right
Great opportunity to meet new people and discuss.	Excellent	Just Right
	Good	Just Right
The presentations were a little long. I think you could have shortened the keynote and the sessions by 15 minutes each and fit in one more topic each morning.	Good	Just Right
Job well done by all!	Excellent	Too Short
	Excellent	Too Short
Sound and visual quality was low.	Good	Just Right
CS-U seems to be the one driving the forum. New material and other presenters would be nice.		
Love the tours in the afternoon and great keynotes.	Good	Just Right
There were some tech issues with presentations, especially any videos. I'm not sure if that was due to the presenter or the Double Tree rooms.	Excellent	Just Right
Great food and venue.	Excellent	Too Long
	Good	Just Right
	Excellent	Just Right
The venue was good and the food service was some of the best I have experienced.	Good	Just Right
Loved the dinner and breakout sessions	Excellent	Just Right
Attendees were friendly and fun to talk to. The outdoor afternoon tour at Fountain Creek was worthwhile, even though it was cold and raining. The afternoon tour at Security WSD was outstanding!	Excellent	Just Right
Everything was properly coordinated, almost.	Excellent	Just Right

Thank for attending the 2023 Arkansas River Basin Water Forum. Were looking forward to seeing you next year!

We're headed to La Junta in 2024. What should we keep in mind? Please provide any and all additional feedback and suggestions.

Option 1

I think La Junta is a great choice and I would like the water forum to focus on the economics of the lower basin and what both past decisions and current trends mean for the lower part of the basin.

Option 1

I would like to see more information about water conservation within the Basin.

Try to get more of the community involved. La Junta has a large ag community that would probably love to come listen and ask questions about Keep the current events style going. I heard a few people mention that another day or half day would be nice.

Option 1

Option 1

Option 1

Much more rural setting. Challenging tour options. More community involvement? Try to showcase rural area offerings that are nit as easily known as larger cities/venues.
yay!

Option 1

Option 1

Option 1

Option 1

I know you will but focus on what is local.
Keep up the great work!

Option 1

I really appreciated the way the tables were set up for the listening audience. Too many times at these conferences round tables are used placing

Option 1

I know that tour host are volunteers and typically not skilled as "tour guides" but perhaps having organizers encourage more hands on and interactive elements may help presenters better frame their activities and information.
Try to involve the CSU Experiment Station and any projects they may be working on. It would be of interest to me to see any dry-up projects that

Option 1

Drive time to the venue from other areas and scheduling.

Option 1

The food was good.

That the forum, needs to concentrate on the value of the Arkansas River to the Valley!

Option 1

Option 1

More material and informations from the local farmers and ranchers and a session on the Conduit would be great.

Option 1

Option 1

The second day tours may be too much.

Have scheduled breaks every 90 minutes at the most.

Option 1

Option 1

I would make sure that the food service provider for the VIP Dinner and the event is well vetted

For a lanyard with a swivel hook, please provide badges with the name of the attendee on both sides of the ID badge holder. A lot of attendees were walking around with ID badges that were blank, because their ID badge holders had turned around.

Option 1
