Description: Water Plan Grant AG Middle Colorado AG Collaborative						
This project is intended to build on the two successful projects in this area. Partners in the agricultural community, local watershed groups like Middle Colorado Watershed Council and Colorado Parks and Wildlife all have acknowledged increased numbers of spawning fish, active redds and now juvenile trout in Elk Creek and monitoring is taking place in Canyon Creek since completion of construction this winter. Project partners would like to leverage this good will into a larger, more comprehensive project that will open miles of spawning/ juvenile habitat in all three of the subject basins.
