Description: WPG - Nexus of Land and Water: Dust on Snow						
Wright-Ingraham Institute will bring together southwest Colorado stakeholders and experts to develop pilot projects aimed at reducing dust accumulation on mountain snowpack. Participants will define target areas of study and form focus groups to develop five shovel-ready pilot projects to mitigate dust mobilization. At a three-day in-person Field Stations workshop in July 2024, participants will visit areas where dust is mobilized, share findings, and prioritize projects to pursue.						
As a part of this agreement, please refer to Exhibit A (dated 3/26/2024) for a complete Statement of Work and Budget.
