Description: WPG - Kawuneeche Valley Restoration Project						
The KVRM Monitoring Strategy is intended to provide crucial information about geomorphology, hydrology, vegetation, and habitat components at wetland restoration sites in the valley. Data captured through this monitoring strategy is designed to assess the status of system indicators to establish recovery rates, identify potential limitations to recovery, and ultimately determine if the restoration objectives have been met.						
As a part of this agreement, please refer to Exhibit A (dated 5/7/2024) for a complete Statement of Work and Budget.						
Service From: 05/22/24		Service To: 05/22/29
